

FORT BENNING BAYONET

VOLUME 1, NUMBER 8

Published By The Ledger-Enquirer Co.

FT. BENNING, GA., THURSDAY, NOVEMBER 12, 1942.

For America's Most Complete Post

PRICE FIVE CENTS

This issue, commemorating the 24th anniversary of Fort Benning's founding, is dedicated to the American Soldier of 1942, in whose hands the fate of our nation rests.

MEN, EVENTS HIGHLIGHT BUSY HISTORIC YEAR

As Benning Goes On War Footing

The story of Fort Benning in the last twelve historic months has been one of men and events. It has been a tale, first of capable, hard-driving Army men who accepted the responsibility of leadership and intelligent initiative in the all-important task of troop-training, and secondly of important events closely related to the development of a war-time America.

The assignment of top-flight military leaders to the vital installations at Fort Benning was one of the immediate developments after Pearl Harbor. Their work, its results and the consequent promotion of many of them formed the basis for the most important news stories of the year at Fort Benning.

So all-important was Fort Benning in the War Department's plan for victory that the Chief of Staff, General George C. Marshall, twice visited the post and many others of the highest-ranking mil-

itary and government officials of the United States and its allies were at the post during the twelve months.

In the early months after the news of Pearl Harbor broke on a startled nation, the tremendous enlargement of the Infantry School at Fort Benning through the creation of another student training regiment for officer candidates was indicative of the expansion program of the Army.

Hard on the heels of the reorganization for expansion came the announcement of Fort Benning's determination to cooperate with officials of Columbus, Ga., and Phenix City, Ala., in "cleaning up" vice conditions in the Fort Benning area. The Army and the municipalities hammered long and hard at vice conditions that national attention was attracted to the results in the spring of 1942.

As brigadier general, he was frequently in command of Hood's famed Division of the First Corps. See GEN. H. L., Page 2

This official OWI photo was taken at Fort Benning by Alfred Palmer. The subject is a member of the famous 29th Infantry.

Benning's Bond Sales Soar; Breakfast Set For Sunday

Pvt. Pierre Huss, Who Knows Hitler, To Speak At Affair

Fort Benning's all-soldier War Bond Breakfast, the first of its kind in the Nation, has skyrocketed "over the top" with the sale of more than \$75,000 in securities this week—more than doubling the original quota—and with the announcement that Private Pierre J. Huss, famed war correspondent, would deliver a personal "Message to Hitler" at the gala affair next Sunday morning at 10 o'clock.

Pvt. Huss, who has visited more than 50 battlefields in Europe and had a personal interview with the Führer of the Nazis a year ago this month, a few weeks ago was inducted into the Army of the United States to fight for the right of freedom of the Allied nations. He is now at Fort Meade.

America's democracy will highlight the Fort Benning War Bond Breakfast as Brigadier General Walter Scott Fulton, commanding general of Fort Benning, will introduce Private Huss as the principal guest speaker.

Several other high ranking Army officers are expected to attend the breakfast as well as enlisted men from the Fort. For admission, each person must buy at least a War Bond with a \$25 maturity value.

All subscriptions to the War Bond breakfast are in addition to post in the continental United States more than \$200,000 invested through the thousands of Benning branches in regular pay reservations for War Bonds. Each day since the innovation of the Bond sale

COMPLETE COOPERATION

Whole-hearted cooperation has been extended by all units and organizations at Fort Benning in the promotion of the War Bond sales. All subscriptions by soldiers and officers at the Post have been completely voluntary.

A group of 25 young women civilian employees at Post Headquarters and other Post offices this week have launched a drive at the Post to "Buy a bond from a Bond-A-Day". This group of volunteer saleswomen is divided into teams and throughout the week, in their spare time, the young women are visiting service clubs and canteens and exchanges to take orders for bonds from any soldiers wishing to buy one. With the purchase of one bond, each individual is then entitled to buy See BENNING, Page 2

Post's History Depicts Rapid Growth of Army

Fort Benning—originally the home of The Infantry School and the Infantry Board—has mushroomed from a camp of a few acres in 1918 to what is now considered the most complete Army post in the continental United States, embracing approximately 187,000 acres. First located about three miles east of Columbus, Fort Benning now sprawls 22 miles south over the pine-covered hills of Georgia with other important installations on the west shores of the Chattahoochee.

As the Post grew in size, new Army activities blossomed forth. Parachute troops, air-borne Infantry, air-borne artillery, armored units—the latest adaptations of warfare among the newest branches which have been assigned to Benning for training. See POST'S, Page 2

No 2nd Front Fulton Says

U. S. To Open 100 Fronts Of Battle

There will be no second front but a hundred fronts in the present world conflict, Brig. Gen. Walter S. Fulton, commanding officer of Fort Benning, declared Wednesday in an Armistice Day address before the Charles Harrison post of the American Legion.

"As I utter these words the black and white type screams and the radio blasts. The American Eagle has spread his wings encompassing another front, Algiers has capitulated and Morocco knows the liberating, firm tramp of the doughboys. A mighty Allied Armada is silencing the shore batteries manned by the Vichy French, and our fliers already operate from air bases captured a few hours ago. Our forces move to unite with those of the victorious British 8th Army who chase the fleeing remnants of Rommel's Afrika Corps and the Italians. It is unknown who runs faster, the robot German or the Italian."

General Fulton declared that Americans have no quarrel with the freedom-loving France of Lafayette, Clemenceau, and Foch, but only those afflicted with the disease of Axis collaboration.

"This evil disease shall be cured. Yes, wherever intolerance, fear, hate, and despotism trample the rights of free people and disfigure the faces of nations, there our boys will go. And this time they'll stay until right makes right instead of might making right."

The speaker told the Legion that it is duty bound to fight on the front of morale, the defense of our spirit, our determination, our objects in this war.

"We must constantly remember the 'Four Freedoms'; we must keep them alive and write them into the next peace. We must keep America a country worthy of victory."

Benning Alumni Are In Action In African Blitz

Two major generals well-known at Fort Benning for their work at the post last year and in previous years are in command of important theaters in the U. S. invasion of French Africa.

Capable, aggressive, colorful Maj. Gen. George S. Patton, known to the Army as "Old Blood and Guts" and former commanding officer of Fort Benning, commands the West African landing. General Patton was the commanding officer of the 2nd Armored Division and the First Armored Corps while he was at Fort Benning. He left last year to command desert training in California.

Maj. Gen. Lloyd R. Fredendall, another former post commander and the chief of the 4th Motorized Division while the division was at Fort Benning, is the commander of forces invading Oran.

Another leading general who is acting as deputy commander-in-chief under Lt. Gen. Dwight Eisenhower, commander of the invasion forces, is Maj. Gen. Mark W. Clark, former chief of Army ground forces and a visitor at Fort Benning earlier this year, with General George C. Marshall, chief of staff.

The three-pronged invasion of French Africa was considered a major operation by the Allied nations and was hailed as a "second front" in many quarters. It was timed to coincide with the British Eighth Army's advance against Rommel in Egypt.

Gen. H. L. Benning Honored By Designation Of Army Fort

Confederate Officer Made Famous In Battle

Where Ft. Benning gets its name is one of the things that most new soldiers want to know when they arrive on the post. And for that matter a great many of those who have been here a long time don't seem able to give them much enlightenment, either.

The post was named in honor of Brigadier General Henry Lewis Benning, jurist and soldier of Columbus, one of the members of the Convention of Georgia which adopted the Ordinance of Secession.

Born in Columbia County, Georgia, April 2, 1814, he was educated at the University of Georgia at Athens, graduating at the head of his class in 1834. In that same year he began the study of law at Tallabot, in the office of George W. Towns, later a member of Congress and still later a Governor of Georgia. The young man was admitted to the bar in May, 1835, at Columbus, where he then made his home.

In 1837 he was appointed by Governor McDonald to serve as solicitor-general of the Chattahoochee circuit and in 1838 was elected by the general assembly for a four-year term. In the following year, however, he was married to Mary Howard, daughter of Col. Seaborn Jones, and resigned his position to form a partnership with Col. Jones in the practice of law. In 1850 he, together with Martin J. Crawford and James N. Ramsey, were delegates to the Southern Convention at Nashville, Tenn., and in the fall of 1853 he was elected one of the justices of the Supreme Court of Georgia, serving for six years.

JOINS CONFEDERATES

In December, 1860 he was elected by his county as a member of

the Convention of Georgia, and was an earnest advocate of adoption of the Ordinance of Secession. He then was sent as a commissioner to the Virginia convention in January, 1861, and made one of the main speeches urging that body to adopt a similar ordinance. In August, 1861, he entered the Confederate Service as Colonel of the Seventh Georgia regiment.

For some time he was in command of the Twenty-third brigade of the Army of Virginia and in little more than a year he was made a brigadier-general. One of the last acts of John C. Breckinridge, Secretary of War in the Confederate Cabinet, was to attach his signature to the commission making him a major general.

As brigadier general, he was frequently in command of Hood's famed Division of the First Corps. See GEN. H. L., Page 2

GENERAL H. L. BENNING

Post's Good Old Days When Things Were Really Tough Are Revived By Fort Historian

By LAURA M. BAILEY

Every community and town has its pioneers and early settlers. The foresight and courage displayed by the founders of any locality are always an inspiration and guidance for those who follow in later years. Fort Benning is no exception to this rule. It has a long list of pioneer army families who are affectionately known as the F. B. B. first families of Benning.

Each age group of army family has had its personal difficulties and trials minimized by tales of greater hardships endured by those ahead of them. Well known are the stories of army life on the western frontier, Indian fighting days they were and the wives who followed the flag lived under incredible hardships unknown to the city women of her day. The regimental spirit and happy near they created out of their talents are as good as new in army history.

Later years knew hardships on the Mexican border. Adobe huts, heat and the bare necessities of living. Life in the Philippines when it meant living in huts, sharing the only white woman within hundreds of miles among hostile natives. Today those who find life difficult at Fort Benning are reminded of the hardships of army families when Camp Benning was first established. It was directly after World War I that the first families came to Benning. When general and colonel, became major and captain. Lieutenant colonel became first sergeant. Living conditions were outrageously high. The drop in pay with the change in rank meant a serious adjustment of living for army families.

MACHINE GUN COURSE
One of the first officers to be assigned a machine gun course was Col. William D. Denton. A lieutenant at that time the school was held on the Macon road. Property for Camp Benning had not yet been purchased for the purchase of land which was later to become the world famous Infantry School of Fort Benning, officers were ordered in for courses of instruction in the School of Musketry. Wooden barracks like buildings were erected for the school. As time went on the men were put in inadequate to take care of the housing shortage brought on by their arrival. Reports of inferior food and discipline based in many instances upon the actual commutation received by the officer.

Many weird housing accommodations were found. One family could look through the knot holes of their floor to the landlord's living room. Another family lived in an apartment distributed through the house of the landlord. The living room was the kitchen, the bedroom on the second floor of another corner, the kitchen on the far corner of the same second floor. In order to get from room to room of their apartment, they had to pass through the rooms occupied by their landlord. They waited their turn, they waited their turn, a chair, a bed and a rickety table.

ROAD UNPAVED
Camp Benning was unpaved. Automobiles were a luxury to most army families. The first group to arrive at the post were the highly-prized and much-used automobiles. After heavy rain it was impossible to drive the sticky roads. Officers commuted from town to classes on the post by train. Catching the train morning and night became a feat of endurance and close attention to the clock.

In order to relieve the difficult situation a tent area was established as officers quarters. Five tents were lined up one behind the other, later to become known as the famous shot-gun houses. The quartermaster provided wooden floors and sides. Changes of temperamental eccentricities tested the ingenuities and temper of the cook. The tents were heated in the winter by Sibley stoves. Plumbing was impossible in the tent houses. A common bath house was used by the families. Bathing in bathtubs, clothing bars of soap and towels.

LUCKY US
As crude as the quarters were, the wives of those days considered themselves lucky to occupy them, for they were living on the Post. Eligibility for such quarters was based on the size of the family. If one had two children, they were entitled to a tent house. If the family was larger, they were assigned to the wooden shacks hastily erected by the labor battalions.

Women are always the persistent urge behind improvements. It wasn't long before the officer husbands were boarding up the tent tops and laying paper over the leaky roofs. Storms weakened them until they leaked like sieves. Many an army family slept under raincoats and umbrellas during heavy rains.

BUILD THEIR OWN
Officers were allowed to build their own homes. Plans were drawn and negro carpenters were hired to erect these quarters, which were the source of much personal pride. After school hours the officers would be found in the dining rooms, Colonel and Mrs. Morris G. Stubbs built a set of quarters near the Commandant's quarters, which was the original Bussey plantation house. A nearby neighbor, Captain Leven C. Allen, lived in the bachelor tent on the lawn of the post. General and commandant of the Infantry School, Brig. Gen. G. H. Weems, assistant commandant, was another occupant of the bachelor tent area.

the primary objective at the post. General Fulton's diversionary activities for sports and recreation for the troops here to balance the program for the men. Football, basketball, baseball, swimming pools, tennis courts, several theaters, Service Clubs and field houses are among the so-called "extra-curricular" activities which provide diversion for the soldiers when they have occasion for recreation and social activities at the post.

Fort Benning is literally a metropolis within itself. The vast number of troops here necessitate a large utility system which would dwarf those available to many communities with a like population. The water supply and drainage systems heating and lighting systems, transportation and living facilities, offices and recreational facilities are so planned and directed that Fort Benning has come to be known as "the most complete post in the United States."

Directing the administration of this huge post is a brigadier general, Walter S. Fulton, a veteran Army officer and a man well acquainted with the extensive problem of the little-like animals.

General Fulton has been on duty at Fort Benning for two years and a half and served as executive officer of the Red Cross Work Room. Long waiting lines were in existence during those days. Wives who weired of waiting were called by her name of polishing the furniture of her quarters with dye and shine shoe polish. That seemed an extraordinary manner of housekeeping.

The children on the post were taken into Columbus in an old World War reconnaissance car. This was impracticable for the younger children, so the wives established a school and took the responsibility of teaching the pupils. Miss Ann Lee Grimes, principal of the school, was in charge of the school and took those responsibilities in 1920.

MAIDS were hired at \$1.00 a week. If they were paid \$1.25 a week. Their usefulness as maids was somewhat hampered by their inexperience. The school children on the post. The maids were quartered in a tent area known as Hollywood. Canny misadventures, the kitchen and the pick-up on Saturday night. Such "weirds" were often used to settle amatory disputes.

COLUMBUS was colorful on Saturday night when the negroes came in from the country on mules. After walking up the muddy roads they were uncomfortable. They were moved with unabashed forthrightness and carried them under their own power the remainder of their stay in town.

All the discomforts from struggling with coal stoves that blew up with gas, from lack of reasonable living comforts and the problems confronting the early settlers, faded into the background of life that has always leavened the hardships in the army.

OFFICERS' CLUB
The wooden story building near the present flag pole served as the Officers' Club. Saturday Night Hops alternated between the Officers' Club, the Big House, the Mess, and the Post Exchange Grocery and the Polo Club. Gay dinner parties were held in the tent houses with complete unconcern for the surroundings. Wives found pleasure in riding classes and bridge clubs. A dramatic club presented plays at regular intervals. The mess and the mess hall were headquarters for the post entertainment. The Muscogee Club in Columbus was the place for many a gay Saturday night dance. The mess hall was the place for many a gay Saturday night dance.

Robert was the place for many a gay Saturday night dance. The mess hall was the place for many a gay Saturday night dance. The mess hall was the place for many a gay Saturday night dance.

Men,—

(Continued from Page 1)

the conditions threatening the health and welfare of troops stationed here was Brig. Gen. Walter S. Fulton, who on April 8 assumed command of Fort Benning after a distinguished record of service in other administrative positions on the post and in the Army during his long career as an officer.

In the news of Fort Benning last spring were other far-reaching events. The Parachute Training School, after months of training at Fort Benning, was formally established and an able, experienced officer, Brig. Gen. George P. Howell, then a colonel, was brought to Fort Benning as commandant with Maj. William T. Ryder, pioneer parachute officer, as assistant commandant.

Stepping into a vital position as commandant of the Infantry School was Maj. Gen. Leven C. Allen, who took over the administration of the school at a time when its expansion was in full swing.

Establishment of a Women's Red Cross Motor Corps and a unique observance of Mother's Day by 20 mothers from all over the nation were brought to the post to visit their sons were methods in which Fort Benning stepped with the rest of the nation in the late spring.

June 9 brought the first high-ranking official to the post, General Marshall, Sir John Dill, chief of the British Commonwealth, and Major Gen. Mark W. Clark, chief of the American ground forces.

Seven days later, Col. Frank Murphy, left his position as associate justice on the Supreme Court bench and inconspicuously began combat training at the Infantry School.

A new adjutant arrived to assume duties at Fort Benning on July 8 when Lt. Col. J. D. Rosenberger, Jr., reported at Post Headquarters.

DISTINGUISHED VISITORS
The parade of distinguished visitors to the post in the last few days of Fort Benning welcomed Under Secretary of War Robert P. Patterson and Lt. Gen. William S. Knudsen, chief of the War Production Administration.

Two days previously, a new unit of the armed forces, the 10th Airborne Division, was activated. The new unit was commanded by Gen. Paul J. Newgard, an Army officer of recognized ability, assumed command of the new division.

August saw the arrival of hundreds of men for the new division and also the arrival of 26 hand-picked Canadian troops for the 1st Canadian Parachute Battalion. The Canadians left a month later, after completing training, to organize the first Canadian parachute unit.

The need for "lightening up" on persons visiting the post was brought about by a system of civilian identification early in September at Fort Benning and thousands of civilians were photographed and fingerprinted.

Mary Ann Mercer, singing star of NBC, was at the post for a war bonds rally and a few days later the 2nd Lt. W. L. Batts, Jr., from Officer Candidate School.

Fort Benning turned its attention to the nation's collection of scrap metal in September and after the dust of the first few weeks activity had cleared, Fort Benning had contributed more than 100,000 pounds of metal.

Sept. 16 brought another unprecedented event when the first all-post camp newspaper, the "Fort Benning Post," went to press. The following week came probably the most significant news story of the year when the 18th Infantry in France having earned a commission by attending officers training school in 1918.

He held a reserve commission in the National Guard of Florida from 1920 until 1940. A graduate of West Point Military Academy in 1917, Brig. Gen. George H. Weems has held important positions in the service since World War I when he was decorated for gallantry in action.

Another far-reaching news story of the year was the Army's decision to adopt a "pay as you go" policy at all Army camps. The ruling went into effect at Fort Benning on Nov. 1, 1942.

As the special edition of the BAYONET went to press, arrangements were completed for the huge war bonds breakfast in the post gym on November 15, the first of its kind held in an Army camp in the nation.

First Lieutenant Henry T. Gay, Jr., of the 1st Infantry School, and Capt. James A. Wynne, Company H, First Student Training Regiment, were winners of the "Fort Benning Bayonet."

Pictured here are the commanding general of Fort Benning, Brig. Gen. Walter Scott Fulton, and his staff at post headquarters. From left to right are Col. J. H. McFall, finance officer; Col. A. J. Bain, post engineer; Col. Edward A. Noyes, commanding officer of the station hospital; General Fulton; Col. William Denton, station surgeon; Col. Stephen B. Massey, director of supply; and Lt. Col. Frank Thompson, chief of the Middle East. Also in the group are Lt. Col. C. A. Will, provost marshal; Lt. Col. K. Kirby, chemical warfare officer; Major J. R. Johnson, post inspector; Lt. Col. J. D. Rosenberger, Jr., adjutant; Major H. E. McGaffey, exchange officer; and Lt. Col. J. P. Edgerly, executive officer. In the back row are Lt. Charles McKewen, transportation officer; Lt. James Freeman, plans and training officer; Captain George Link, assistant judge advocate; Captain Russell J. Hammargren, public relations officer; Lt. Guy Snavely, Jr., adjutant; Lt. R. A. Parkins, chief of the civilian branch; Lt. W. B. Arbuthnot, chief of the military personnel branch; and Lt. Jack Gibbs, engineer property officer.

Prize Winners

Winners for last week in the BAYONET's original contribution contest include Lt. Col. J. H. McFall, finance officer, for "Observation Squadron for his 'Day-Room Duds' and cartoons by Sweeney of the First Student Training Regiment. No prize was awarded for verse since none was published. However, a d o u b l e prize will be given this week to two contestants whose verse appears on the full page of poetry we publish this week. Keep on trying, soldiers.

5 Class-Mates At West Point Made Colonels

Five lieutenant colonels of the Infantry School, all of whom are graduates of the West Point class of 1918 of West Point and all of whom have held 16-colonel appointments since September 15, 1941, have been promoted to full colonels Major Gen. Leven C. Allen, commandant of the Infantry School, announced Monday.

They include Col. Richard R. Coursey, director of training; Col. J. H. McFall, finance officer; Col. A. J. Bain, post engineer; Col. Edward A. Noyes, commanding officer of the station hospital; and Col. Stephen B. Massey, director of supply.

Gen. H. L.—

(Continued from Page 1)
He participated with gallantry in the battles of Second Manassas, Chancellorsville, the Wilderness, Thoroughfare Gap, Malvern Hill, Lookout Mountain, Fort Loudon, Knoxville, Petersburg, Farmville and others. He was distinguished for coolness and daring and was twice cited for gallantry in action. In the second-day fighting at the Wilderness, he was wounded severely.

Following the end of the war, he returned to Columbus and resided there until his death. He died on July 10, 1875.

Benning—

(Continued from Page 1)
A ticket of admission to the breakfast for 50 cents.

Organizations and units at the Post can use company funds with which to invest in War Bonds, as announced by the War Department. The drive has suggested that as many units as possible invest surplus funds in the drive.

Two men will be admitted from each unit buying a \$50 bond. Private Huss, who followed information of the Nazi regime is well-known throughout the country, has been a foreign correspondent since 1928. Huss was Bureau manager of INS in Berlin since 1934 until last year when he was expelled from Germany for war against Germany and he was repatriated.

Among the other well-known persons at the breakfast were Harold B. Black, Birmingham, Ala., department store executive, who conceived the war bond breakfast idea to sell bonds, and who was recently cited by Secretary of the Treasury Morgenthau. To date more than \$75,000,000 in war bonds have been accumulated by breakfasts of civilians throughout the country.

Fort Benning's all-soldier affair is expected to be followed by similar affairs to be staged at other Army camps throughout the country.

All units of the 17th Infantry Regiment, commanded by Col. Grant Schleicher, have purchased War Bonds, the first organization to do so in the fall.

Dr. J. H. D. Rosenberger, Jr., vice-chairman, Lt. H. H. Shoemaker, Jr., distinguished guests, and publicity, Capt. R. H. Hammargren, Lt. W. B. Arbuthnot, Lt. Col. Karl Thornburg, Lt. James K. Guthrie, tickets and reception, Maj. A. H. Healey, Capt. H. H. Hammargren, Lt. Col. Karl Thornburg, Lt. James K. Guthrie, Lt. Guy E. Snavely, Also 10th Armored Division,

FIGURES DON'T LIE

Here is the record of the 124th Infantry Regiment in demonstration work for the Infantry School during August and September:

OCTOBER

Superior, 47.2 per cent.
Excellent, 49.9 per cent.
Good, 3.8 per cent.
Fair, 1 per cent.
Unsatisfactory, 0.0 per cent.

SEPTEMBER

Superior, 34.4 per cent.
Excellent, 58.0 per cent.
Good, 7.6 per cent.
Satisfactory, 0.0 per cent.
Poor, 0.0 per cent.

AUGUST

244 Programs
Superior, 27.5 per cent.
Excellent, 64.4 per cent.
Good, 8.1 per cent.
Satisfactory, 0.0 per cent.
Poor, 0.0 per cent.

IMPRACITABLE JOKERS

The trouble with anti-tank Company H at Camp Barkeley, Texas, used to be practical joking. It was that, until pranksters caught a rattlesnake and tied a fine wire around its neck to make it rattle near Private Benjamin J. Gorski, company cook. Pretty soon Private Gorski saw the snake. But did he see the wire? Anyway, Private Gorski ran so fast, so fast, that Company H didn't get any dinner that night. It was harder work than it was to catch the snake, and nobody is sure yet that Private Gorski didn't hide the wire. He was scared of the three guys he caught raiding the pantry. "Practical joking used to be the trouble in Company H."

Four Sawmills Fashion Timbers For Buildings

With a systematic forestry program being carried on four sawmills are kept busy at Fort Benning.

The Post Engineer's office "harvests" the virgin pine and other trees on the post after the forestry service determines that they should be cut. Three sawmills are humming with the results of the lumberjacks' work.

At the same time, the Area Engineer's office maintains on sawmills to make timbers and lumber from the trees cut down in clearing land for major projects at the Post.

It was that, until pranksters caught a rattlesnake and tied a fine wire around its neck to make it rattle near Private Benjamin J. Gorski, company cook. Pretty soon Private Gorski saw the snake. But did he see the wire? Anyway, Private Gorski ran so fast, so fast, that Company H didn't get any dinner that night. It was harder work than it was to catch the snake, and nobody is sure yet that Private Gorski didn't hide the wire. He was scared of the three guys he caught raiding the pantry. "Practical joking used to be the trouble in Company H."

Infantry Board Proves Quality Of Equipment Issued For Battle Use; Tests, Verbal Battles Show Results

If Equipment Is Good, It Will Stand Up Under Gruelling Tests Here

The War Department said the Garand rifle was good. But Fort Benning's Infantry Board, which tests all equipment slated for use by the infantry, reported "Well, well, well..."

As an example, the Infantry Board, which is an astute organization of veteran officers of the Regular Army, called for an M-1 rifle. They took it out for tests. Sand was thrown all over the rifle, inside and out, and then blown out and the piece was fired. The board then covered the rifle with mud, wiped it, and fired it. Then the rifle was drenched in a water and fired. Finally, the rifle was dropped—with a loud thud—the magazine open. Then it was fired.

Well, the Infantry Board put its official stamp of approval on the Garand M-1 rifle as a good firearm for the infantry. Tests similar to the above are

characteristic of the Board's "show me" policy. The Infantry Board, which from 1927 to 1932 included George C. Marshall, the Army's chief of staff, on its role, puts equipment and material through more rigorous tests than it is liable to be subjected to on the field of battle.

Everything from khaki shirts to mess kits and neckties are tested by the Infantry Board. Major General Leven C. Allen, commander of the Infantry School, is president of the Board. Present members of the organization is Col. Matthew J. Gunner.

Colonel Gunner says that he wants no "yes" men on the Board. Consequently, the director points out, it is not infrequent to find the members of the board at a round-table discussion one morning, variably groping at one another's throat with pro and con arguments, and shortly afterward amicably lunching together in the Officers' club.

Each of the officers on the Board is possessed of an analytical mind. No one of the Board members has had less than 18

years' Army experience. Thus the officers have many questions about the value of all equipment. A round table discussion may veer off into a heated argument, with hands thrusting on the tables, or bursts of inventive passing back and forth.

But, were it not for such a "show me" policy, American doughboys would not be considered the best equipped infantrymen in the world. Shortcomings in various types of equipment are readily discernible to the wry eyes of the Infantry Board. And when out on the field of battle with his equipment the modern infantryman can thank his lucky stars that Benning's Infantry Board put the equipment through all the rigors of battle conditions before approving it as standard equipment fit for the battle.

Although the Infantry Board can adopt no equipment for the infantry, it can and does freely speak for or against proposed changes in material. The War Department regularly sends new ideas and suggestions to the Board's director, who then assigns them to an officer to delve into an exhaustive study of the innovations. Models of new weapons and equipment are forwarded to the Infantry Board which assigns them to the section to determine if the material will stand up under the impact of battle.

The test section of the Infantry Board carries on tests of every piece of equipment. The War Department regularly sends new ideas and suggestions to the Board's director, who then assigns them to an officer to delve into an exhaustive study of the innovations. Models of new weapons and equipment are forwarded to the Infantry Board which assigns them to the section to determine if the material will stand up under the impact of battle.

BEST DARNED CANDIDATE I'VE SEEN!

World War I, Col. Harold G. Sydenham, the section is made up of specialists in various fields of whom various tests are assigned. Incidentally, it was Col. Sydenham who conceived the idea for the new type helmet worn now by Uncle Sam's army. After getting the idea he constructed models he convinced the army that this new helmet offers greater protection and more comfort than that worn by any soldier of any other country.

Tests put to the Garand rifle were not extraordinarily tough. They were just symbolic of the standards demanded of equipment for American soldiers who must fight this war with the best equipment and material available.

Army "Photogs" From Benning "Shoot" The War

Cameramen Trained A Post In 161st Signal Co. Overseas

Skilled photographers, many of them veterans of maneuvers and other campaigns and all former members of the 161st Signal Photographic Company at Fort Benning, are now taking "shots" of American and allied troops in several theaters of operations throughout the World.

Photographic technicians from the 161st Signal Company have been detailed to form separate detachments during the past year and now are overseas serving in Australia, India, China, Iceland, Ireland, and England.

The Signal Company, which is made up of still cameramen, newsreel cameramen, laboratory technicians, drivers, and mechanics, has long used Fort Benning as a base of operations. Presently units from the Company are on detached service recording the Tennessee, Louisiana, and Desert Maneuvers in California—among other things. A unit of the 161st still is functioning at Benning, serving the photographic needs of the Post.

Captain John N. Harman, Jr., commands the present organization, which has produced many skilled cameramen who received training in the laboratories here at Benning and out in the field on special assignments.

and combat operations was recognized soon after the United States entered the war and the services of outstanding still and movie photographers were requested for this important duty.

STARTED IN 1917

Working with equipment and materials which would be considered wholly inadequate today, the Signal Corps photographers of 1917-18 produced a record of war training and combat that proved of great value for subsequent military study and as a historical document.

Long before the United States entered the present war, the Signal Corps made plans for a thorough camera record of every Army activity. A Photographic Laboratory was established at Fort Monmouth, N. J., for the development of both still and movie cameramen and the production of instructional training films was commenced on a large scale. Upon mobilization, some of these activities were extended into the field and the 161st Signal Photographic Company was activated and placed into operation.

Through the new method of Army classification, skilled professional and amateur photographers have been located and sent to the Signal Corps for a thorough training in all phases of photography. Equipped with the finest American-made cameras and supplies, these soldiers are coached and trained in its use under every conceivable field condition. Mobile darkrooms are improvised in regular Army trucks and photographers are expected to produce pictures regardless of difficulties that may be encountered.

During World War I, the value of photographic records of training The 161st, operating in the field, supplements the regular training course of the Signal Corps laboratory, and has already sent out several photographic units with out overseas forces. Such units operating at great distances from home bases, must be able to cope with all unusual local conditions and bring back a complete record, in both still and moving pictures of every important activity on these fronts.

We Are Glad to Extend

Veteran Army Sarge Ray Is Commissioned

Former Non-Com Did Muscle Work In Salvage Drive

For 24 years a soldier in the regular army, Sargeant Grant L. Ray, who has served as Salvage and Reclamation Sergeant at the district Motor Transport Repair shop at Fort Benning for the past three years, has been commissioned a First Lieutenant. He will report November 1, to Fourth Service Command headquarters at Atlanta, for assignment to duty.

Lt. Ray, now 42 years old, was born at Bluffs, Illinois, and enlisted when a recruiting officer came through Scott county with a promise that "every day in the army is just like Sunday on the farm." So the young farm lad said "Hand me out a stack of that and I'll try it."

"I soon found out that the army was plenty hard work but I loved it," he says now. "I was sent to Jefferson Barracks, Mo., in the old Sixth Infantry, then we went to Colones as part of the First

Division in the Army of Occupation. ARMY IN BLOOD

After that he went to Camp Taylor, Kentucky, and served at Camp Dix, N. J., then tried a bit of civilian life from 1921 to 1923 but returned to the army, being sent to Fort Worth, Texas, for three years. He also served in New York and San Francisco in the Motor Transport, then was sent to the Quartermaster department at Ft. Lewis, Washington. Ft. Leavenworth, Kans.; Fort Meade, S. D.; then attended the Holabird Motor Transport School at Baltimore; then went to Ft. Meade; then to Cheyenne, Wyo.; and then came to the Quartermaster at Ft. Benning.

"I want to come back to serve right here at Fort Benning, as it is the best post I have ever served," he said today.

Lt. Ray set a record in the scrap campaign heading up a unit that turned in hundreds of tons of scrap metal, hauling most of the heavy material that was discovered on the post.

Patriotic Songs Gushing From Composers' Pens

"Remember Pearl Harbor!"

This battle challenge sung over every microphone, played on every juke box, and whistled on every street corner during the grim days following Dec. 7, is only one of a long line of war-songs that have stirred American spirits high in times of national stress. "Call the Infantry" by Lt. F. M. Schilling of Benning, is another.

Ever since the thirteen colonies struck out for themselves back in 1776, American history has been written into its patriotic songs. In each major struggle in which the country has been involved, many a stirring, swinging tune has helped to send U. S. fighters over the top to victory.

Revolutionary Patriots had the "Liberty Song" of colonial John Dickinson and the fanatical ballads of Tom Paine, but the most lasting song to come out of that period was "Yankee Doodle," first taken up as a derisive chant and later adopted by the Concord Minute Men at their own anthem.

During the Civil War, Confederate Armies marched to the "War Song of Dixie," while northerners rallied round to the tune of "When Johnny Comes Marching Home Again." Julie Ward Howe's "Battle Hymn of the Republic" appeared at a poem. An unknown soldier, Pvt. Miles O'Reilly, composed a song to the Old 10th Army Corps.

THE SPANGLED BANNER

Greatest patriotic song of all—our national anthem—arrived in the War of 1812, during an exchange of British and American prisoners at Fort Mifflin, when Francis Scott Key was inspired at the sight of the "Star Spangled

Banner" proudly waving over the smoke of battle.

VMI's March "To the Cadets" is also among the Veterans.

Old as the Navy itself is its song-love. From "The True Navy Sails" down to "Anchors Aweigh," U. S. naval forces have gone to sea singing.

So have the Merchant Mariners, those sturdy adventurers who have helped to light and win every war. Their is a just love, a making of ships and waterfronts, beginning with the famous line—"As I Was Walkin' Down Paradise Street."

Spanish American War days brought the sentimental ballad in which were celebrated the triumphs of the heroes of Manila Bay and San Juan Hill, as well as "The Flag My Father Bore." Most people may not realize that "There'll Be a Hot Time in the Old Town Tonight," since become the model for many a college pep-song, first became popular at this time.

BERLIN AND COHAN

World War I gave us Irving Berlin and George M. Cohan. The Berlin Bugle Song "Oh, How I Hate to Get Up in the Morning" was sung by every doughboy, and Cohan's "Over There" and "You're a Grand Old Flag" stirred many war-torn hearts. Interesting sidelight on the development of crude air warfare in 1917 was "Daddy Is a U. S. Aeroplane Man."

Now every branch of the armed service has its own rousing theme-song, most kindly known of which is probably "The Marines Hymn." Fred Waring's "Sky Anchors" celebrates the Navy Air Corps, while the Army Air-Corps' official song was composed by Robert Crawford, copyrighted in 1938. "The Caisson Song," traditional Field Artillery song, is familiar even to civilians.

"Keep 'Em Rolling" is dedicated to the Quartermaster Corps, and "Arms for the Love of America" is the Army Ordnance Song, dedicated to Maj. Gen. C. M. Wesson, Army Chief of Ordnance.

Berlin has come through again with his million-dollar musical "This Is the Army," whose catchy tunes have already found a place in everybody's song-repertoire, especially the one which commemorates that tragedy peculiar to doughboys, "I Left My Heart at the Stage Door Canteen," and the humorously true-to-life "This is the Army, Mr. Jones."

Pre-war community gatherings loved to let loose on "God Bless America" or "The White Cliffs of Dover," but the soft sentimentalism of these songs was forgotten when Japanese bombs burst over Pearl Harbor.

THE LEDGER-ENQUIRER COMPANY

Telephone 8831

To the American Soldier

Today the BAYONET commemorates the twenty-fourth anniversary of the founding of Fort Benning. But we are not dedicating this anniversary edition of our paper to Benning. We dedicate it to the individual American soldier who is the symbol of the millions of men who today are bearing arms under our country's banner in the training camps, on the high seas, in the air, in Alaska, in Iceland, in Europe, in the Solomons, in the burning desert sands of far-away Egypt, and now in North Africa. He represents the faith of a nation in the belief that truth, right, and justice will prevail. Sometimes these abstractions must be translated into a concrete form; sometimes they must be translated into a concrete form; sometimes they must be translated into a concrete form.

A Soldier's Prayer

In lasting memory of Armistice Day, November 11, and dedicated to every Soldier in the Armed Forces of the United States Army.

Almighty and everlasting God, whose days are without end, and whose mercies cannot be numbered; and who art the giver of all victory: I humbly beseech Thee, stretch forth Thy almighty hand to strengthen, protect and support me in the day of battle and from the violence of the enemy. And in the hour of peace keep me safe from evil: Grant that I may cheerfully perform all necessary duties: Guide and direct me in the maintenance of my country's honor, so that I may be a safeguard unto the United States of America, committing myself and my loved ones to Thy trust, until I am finally called into Thy haven of rest and lasting peace: Through Jesus Christ our Lord—Amen.

GEORGE CARTER SMITH,
Co. "B" 1st Inf. Div. Ft. Benning, Ga.

Whose War Is It?

Did you every stop to think whose war this is? You know the Irishman who set the street light going on. He asked "Is this a private fight or can anybody join in?" In total war everybody pitches in.

What are you going to win the war? Buying War Bonds? Doing Civilian Defense work? Working in a war plant? That's fine, but more is needed if we are to win this war.

We need three things:

1. Men.
2. Ships, planes and guns.
3. A fighting spirit that unites and inspires the whole country.

We need everybody in the right place pulling his weight with all he's got. Do you take the kind of responsibility for your family and friends that holds them to their highest contribution to national service?

Marriage and the War

Last week Dr. JANET FOWLER NELSON of New York University, noted consultant and sociologist, delivered an address in Columbus, the principal headquarters of the BAYONET, on the subject of marriage and the war. Dr. Nelson, acting as a consultant to the national YWCA, has spent fifteen months touring the nation, studying conditions in various military camps and training stations. As an expert who has scrutinized the situation first-hand, she should know whereof she speaks.

Dr. NELSON represents a very large majority in this country who are terribly concerned over the emotional instability which has resulted in hasty marriages, the rise of prostitution, and an increase in illegitimacy.

M. M. I.

Many enlisted men and officers in the army are soldiering under a distinct mental hazard; something on the order of the man without a country, although not quite as tragic. They are the men without middle names, doomed for the duration as military misfits unless some action is taken to remedy the situation.

I have first hand information on the situation, being fitted out with only two names from the time of my birth. I was not in the army long when I first realized the disadvantage. At the post of my induction I filled out a form and passed to a sour adjutant. He shoved it back to me, "Include your middle name."

"Haven't one, sir," I said.

He looked at me pityingly, saying mutely that all the better people come equipped with middle names built in. As my military education progressed and I learned the difference between the M-I helmet and a spittoon, I realized more and more that one insignificant letter had saved a great deal of wear and tear on my mental superstructure.

G. I. clerks have numerous methods of remedying the deficiency. The (NMI) type is the best known. However, sometimes the parentheses are omitted and your name resembles a string of box cars. Then the "None" method would work, if it weren't for the fact that the "none" is always being misspelled and you're left with a variety of strange cognomens.

Sometimes I toy with a fiendish idea. Why not adopt an "Aloysius," or a "Friedbert," or some revered old family name like "Cruxfield?"

Editor-in-Charge of Checking-Misspelled-Names comes to the fore and I abandon the idea, through sheer pity toward the clerks.

Only one solution remains. The army will have to issue G. I. Middle Names, M-I. I am ready to draw mine.

LT. WALTER (NMI) WILCOX.

Many nice things have been said since the first appearance of the Bayonet two weeks ago. We are truly proud that the paper has met with such wonderful reception. But just to keep us from resting on our laurels and to keep us interested, a kick where it will do the most good can be of supreme advantage at times.

Our biggest job at home is to make our country worth fighting for.

Bricks and mortar were used even by the builders of Babel. Mud slinging never built anything.

War isn't the only rift to conquer. There's a division over wages-bickering over the family budget.

The USO Presents

By CPL. SOLOMON KLEINDORF

Now is the time for all good men to come to the aid of their party... And the party is at the Salvation Army-USO Club in Columbus this coming Tuesday... That is if you are a paratrooper in the 805th... If you're not, I'm afraid that you will not be welcome... Some one has finally remembered the "forgotten men of Alabamas."

At the same club, each Thursday, there is a gathering known as the Friendship Circle... Here they try to make you feel at home... Anything that you do at home can be done at the club on Thursdays... Even to taking off your shoes and throwing away the carpet... Informal singing, piano playing, small games, and just general conversation, with Mell Toltbert, who I spelled the name right, acting as mother of the brood.

For the first time since the skating started at the Army and Navy YMCA-USO I went down and watched it... No wonder all they do down there is talk about it... Can you imagine a nicer way to spend Sundays from 2 to 5 in the afternoons, than skating under a cool Indian Summer sky in the open air patio?... With just enough of a breeze coming off the river and the leaves of the trees falling all around you... Well, that's the way it looked to me and I was all set to chuck this job of knocking out a USO column and getting a pair of skates for myself.

The "Army Hour" broadcast coming from the same club has been pushed down to 10:30 p. m. This time the directors hope it is there to stay... The poor

thing has been kicked around from time to time until the performers don't know whether they are arriving too early or too late for the program... Just so long as it isn't "Too little and too late" we will forgive them.

All of you O. C.s who claim that you can't do anything in town can go to the Army and Navy "Y" and have a real good dancing every Friday... Speaking of dances brings to mind that there are good old time square dances held at the same club every Monday evening.

This coming Sunday sees the final day of the "Salute to the States" program with a finale that is equal to any that has ever been held before... The program will be held at the 9th St. USO and will honor all those states that have not been honored before... "There are no regular prize for the winner of the quiz contest, which is a free long-distance telephone call to his home state, there will be five winners and five free telephone calls.

And here is a scoop... The 9th St. USO is putting a steam table in order to be able to serve hot dishes from their snack bar during the winter months.

The Basketball League of the 9th St. USO will take the place of the Salute to the States on Sundays... Ten teams will participate in the tournament and will play one game Tuesday evening, two games Friday evenings, and two on Sunday afternoon. Watch this column for a full schedule.

Mrs. Singer is still leading the volunteer workers of the USO-Travelers Aid with 106 1-4 volunteer hours for the month of October.

Strictly Back Fence

By EVE

No one has much to say about the widows of Bataan. What can one say of wives who live with nothingness and terror? What is there to offer of consolation to them? Words of sympathy are meaningless. Much more to them are the words they read in current magazines of possible horrors of Japanese prison camps.

Each word must be a stab in the heart, a heart that prays their beloved one is safe from such humiliation of body and soul.

Then quickly they must take those prayers back. They didn't mean that, but quick insinuations of hellfire, wouldn't death be preferable? Would sleep come easier if they knew their husbands weren't hungry, thirsty and shamed as a proud white race before the yellow man?

Each woman has learned the torment of the agony known as loneliness. If she could only touch him. Just once feel the warmth of his arm about her. If she could talk with him of the simple, quiet things that made up the happiness and companionship of their marriage. Decisions are so hard for her. Everything rests on her now, the future for herself and the children.

The children. Without them life wouldn't function with surface acceptance. The success of her outward acceptance of tragedy is proved in their childish prattle, an or man in our country to

By CHAP. FRANK M. THOMPSON

I shall always remember the rejoicing that took place in a little village in France, on the first Armistice Day. Everywhere you could hear, "Fin la guerre, fin la guerre." Children cried. Old men and old women wept aloud. And the whole wide world witnessed like scenes. Poems of praise and thanksgiving went up to a good God: that the cataclysm of horror which had engulfed the nations of the earth was of the past; henceforth humanity would travel a new road.

But alas—"We hoped for peace, there came a sword, Goodwill and still there grows discord; The snow with bloody slaughter red, Passion is rampant, God is dead."

Over all the earth the war gods are marching on. Untold suffering and death follow in their wake. And no one knows when "Universal peace will lie like a shaft of light across the land."

However, we are not to despair. Mankind is rather foolish and mulish. But slowly and surely as the tree adds foliage he does garner a little wisdom. And the time will come when the prophecy of old shall be fulfilled. "They shall beat their swords into plowshares; and their spears into pruning hooks; nations shall not lift up sword against nation. Neither shall they learn war any more."

NO FISH STORY: It happened recently on maneuvers. A cavalry platoon captured one lieutenant colonel, one major, four captains, five first lieutenants, one second lieutenant and 137 enlisted men from the "enemy." But the sergeant who led the group was despondent in the face of many congratulations. "Aw, that was nothing," he said. "We had a major general, too, but he got away."—Mitchell Beacon.

SCHOLAR: The other day we met a new recruit at the Field, a learned fellow who has spent long years at American universities. After only two weeks in the Army, this man of many degrees—including B. A., M. A. and Ph. D.—is entitled to add some more letters to the string—K. P.

In keeping with his high academic standing, he was given a rating of "magna cum laude" in culinary science. — Mitchell Beacon.

laugh while this agony tears at her heart?

What right has anyone to forget for one moment that men are waiting in Bataan? Their women are waiting, and waiting in their homes while the days of the calendar move slowly toward another month and then another year.

Thru the Peep-Sight

By SGT. H. E. WHITEMORE

The grey ghosts of those who died 24 short years ago to make the world safe for democracy raced with the hurrying armored legions of Britain's Eighth Army in Egypt; fought with the bottled-up U. S. Marines at Guadalcanal; and stood with the Russians at Stalingrad this week as the anniversary of mighty Fort Benning brought back memories of World War I and of other warriors, who died for their cause.

The armistice was the news that three America into wild hysteria just short of a quarter century ago, when Fort Benning was a group of uncompleted wooden buildings only a few weeks old standing bleakly on the pine-covered Georgia hills near Columbus.

One year ago electrifying news was again received at Fort Benning, now a bastion of American military might—the Japs were at Pearl Harbor and the Philippines, and once again the nation turned to war and death and sacrifice.

Today the headlines tell of the achievements of the sons of those men who fought in France and big, black letters on the front page told of victories this week that might turn the tide of war.

In the African desert, Germany's "desert fox," blued of supplies through incessant, savage attacks by Allied air force fighters and face to face this time with a British general—Gen. Bernard L. Montgomery—as able as the Axis leader, was striving desperately to gather the remnants of his Afrika Korps around him and stave off complete defeat.

At week's end, the crushing British Army, supported this time by powerful air arms and artillery, had cut mighty gashes in German and Italian defense lines and armored divisions were relentlessly pursuing the fleeing enemy across the desert sands. Unless Rommel, who had lost two of his top commanders, could again reorganize his army, it seemed a case of complete victory for the Allies and the prospect of invasion of the Italian peninsula later.

Holding grimly in the Solomons and killing five Japs to every Marine killed were the U. S. Marines were ordered to attack. So many of the yellow-men have been killed by the defending Marines, that the Japanese have been reduced to a grim toll of Jap merchant ships and submarines taken by U. S. submarines in "silent war" since the fighting started between Japan and the United States in December of 1941.

In India, American Negro Army troops took time out to introduce baseball to Calcutta. The Calcutta police force team 11 to 3 in the first ball game ever seen in India.

A houseboat on the Nile was stretched out by a headquarter's club for U. S. warrant officers and non-commissioned officers in the Egyptian theater of war.

The Jap out of every island in the Pacific was under way, but at best it was "a long job ahead."

The Russians, still holding the Germans and still killing them in waves, prepared to battle a second grim foe—winter and starvation—and at the same time were, massing men and materials for a probable winter offensive against the hard-pressed Germans.

Election was over in the United States, and the Republicans were riding high in New York State, in Congress and in many other states. Thoughts in Washington concentrated away on such vital problems as manpower, the draft of young men, and rationing.

Congress prepared to settle the battle of whether the 18 and 19-year-olds soon to be drafted could be sent to combat field with less than a year's training. Lined up against the measure were the armed services and most government officials, who worried that inclusion of such an amendment would create a "soldier bottleneck" when it came time for more and more outflows to go over seas.

Keeping enough men in the production lines and yet supplying the armed forces with fighting men was the tremendous problem facing the White House, Congress and the nation. Rationing of coffee, sugar, gasoline, fuel oil, all the essentials of the American way of living, continued as a topic on every tongue as more and more the iron hand of "not enough" "sold out," "no gas" reached into the most remote villages and hamlets of a war-awakening country.

The real story of war and the sacrifice American mothers and fathers are making for democracy was told this week in a few figures—casualties of the U. S. in eleven months of fighting. The toll: 47,463 killed, wounded, captured and missing. The Army lost 31,469; the Navy, Marines and Coast Guard, 15,814.

Nine Oklahoma soldiers got out of a train at Cleveland, Ohio, to stretch their legs. A nearby band, playing for a sendoff for some selectees, played the Star Spangled Banner and the camp-bound soldiers snapped to attention. While they stood at attention, the train quietly pulled out and left them standing. They were mere house rats rolling back to their homes.

In India, American Negro Army troops took time out to introduce baseball to Calcutta. The Calcutta police force team 11 to 3 in the first ball game ever seen in India.

A houseboat on the Nile was stretched out by a headquarter's club for U. S. warrant officers and non-commissioned officers in the Egyptian theater of war.

Country Editor in Khaki

By CPL. IRWIN BLUMENFELD

Soon after I leave here, a group of WAACS is going to be moved to Fort Benning, it was decided. "That's the kind of breaks I get!"

Or could it be that they've heard about me, and are guessing I'm waiting until I get out, before taking the chance of moving the gals in?

They are going to be quartered in barracks numbered 1776, which is quite appropriate for a group of modern "liberty bells."

And the "Spirit of 1776" will have a new meaning around here then.

But this feminine army is causing all kinds of complications. Picture the fate of a guy married to a top sergeant!

Or, imagine enjoying hold-in-the-middle lieutenant on your lap!

Or, sending a WAAC to the powder magazine and having her return with a freshly applied make-up, instead of ammunition.

And pity the poor civilian husband whose WAAC wife can pull the line: "Here I am, spending the best years of my life saving over a hot machine gun, etc., etc., etc."

We've been spending a lot of time recently studying military tactics, learning how to be Napoleons in six easy lessons. But we do more than merely study. We actually have a very high opinion of that exalted position, an opinion, it seems, that is not generally shared by everyone.

The following instance was cited last week by one of our officers:

A general sent a message to the War Department requesting 200 second lieutenants and one mule. He received the following reply:

Woman's Calendar

Practical Home Making—Friday, November 13, 3 p. m. Ladies lounge.

Dramatics—Thursday, November 19, 2 p. m. Ladies Lounge.

RED CROSS WORK ROOM

Surgeon's dressings—9 to 12 a. m. Monday through Friday. 1:30 to 4:30 p. m. Friday. In charge Monday, Mrs. John Jeter; Tuesday, Mrs. John Jeter; Wednesday, Mrs. Wm. McCullough; Thursday, Mrs. Wm. McCullough; Friday, Mrs. E. A. Noyes.

Sewing and knitting—9 to 12 p. m. Tuesday and Thursday. In charge Tuesday, Mrs. Paul Newgard; Thursday, Mrs. James Weaver.

MOTOR CORPS

Ambulance drill—9:30 a. m. Nov. 17. On duty Nov. 13, Mrs. Evelyn Reilly; Nov. 18, Mrs. E. A. Noyes; Nov. 19, Mrs. Evelyn Davis; Nov. 18, Mrs. Celeste Tanton; Nov. 19, Mrs. Mary Baughman.

GREY LADIES

On duty Station Hospital: Mondays—Mrs. R. C. Barlow; Tuesdays—Mrs. G. C. Elliott; Wednesdays—Mrs. C. C. Finnegan; Thursdays—Mrs. C. N. Bailey.

Wednesdays—Mrs. M. G. Stubbins; Mrs. S. W. Ackerman; Thursdays—Mrs. F. R. Underitz; Fridays—Mrs. H. W. Verable; Mrs. A. G. Hays; Mrs. E. A. Noyes; Mrs. C. C. Barlow; Mrs. C. N. Bailey; Mrs. W. S. Coughlin.

Fridays—Mrs. J. K. Winn; Saturdays—Mrs. F. R. Underitz; Sundays—Mrs. C. C. Finnegan; Mrs. R. C. Barlow; Mrs. H. L. Beall; Mrs. W. M. Hives.

Saturdays—Mrs. H. G. Elliott; Sundays—Mrs. H. P. Ferris.

STANDARD FIRST AID CLASS

Colored women—Monday, November 16, 8 p. m. Old 24th Infantry Recreation building.

Drops Bags

Infantrymen may be dropping bags on the enemy.

Infantrymen may be dropping bags on the enemy. The 29th Infantry Division is training for this at Fort Benning. The observation post is assigned to the top floor bags on the enemy troops at every place.

The Benning headquarters said that the training will be conducted by the Remount Division of the Q. M. C., the same division that is responsible for the procurement and training of both horses and dogs for the Army.

Training facilities at Camp Rimini, formerly a Civilian Conservation Corps camp, will consist of troop quarters, individual kennels, and veterinary kennels for all dogs. The enlisted men will receive instruction in sledge driving and the care of horses, mules, and dogs.

The Army Specialist Corps will provide experienced dog teamsters as instructors. Both dogs and driver will receive a six weeks' course of instruction. The Q. M. C. has requested Dogs for Defense, Inc., to obtain the full complement of animals. This is the same civilian agency that is procuring dogs for sentry duty with the armed forces.

These light observation craft likewise perform many liaison missions, engaged by units as communications carriers or to carry officer observers who may direct friendly fire upon enemy targets which may be sighted from the air.

Although many an infantryman at Benning has cursed the pilots as their flour bags have found their marks and exploded on the backs of the same soldier some months hence may well bless the pilot for having taught him the value of taking cover when enemy planes strafe and bomb the ground positions only to find Benning's soldiers stretched out in a slit trench or other suitable hole an ace before to escape injury from bomb fragments so that the results can be most readily evaluated.

Army Will Train Sledge Dogs To Move Supplies

To facilitate transportation of supplies in snow-bound areas, the Army soon will begin training sledge dogs and enlisted men as drivers at Camp Rimini, near Helena, Montana. It was announced yesterday at Fort Benning by the office of the post quartermaster.

The Benning headquarters said that the training will be conducted by the Remount Division of the Q. M. C., the same division that is responsible for the procurement and training of both horses and dogs for the Army.

Training facilities at Camp Rimini, formerly a Civilian Conservation Corps camp, will consist of troop quarters, individual kennels, and veterinary kennels for all dogs. The enlisted men will receive instruction in sledge driving and the care of horses, mules, and dogs.

The Army Specialist Corps will provide experienced dog teamsters as instructors. Both dogs and driver will receive a six weeks' course of instruction. The Q. M. Quarters for the families of enlisted men of the higher grades are shown above at Fort Benning. Since the personnel at Benning has multiplied in recent years there has been a large demand for these houses of which they are but a limited number. Non-commissioned officers who are entitled to quarters allowances for their families can apply for such quarters as these shown above. (Photo by 161st Signal Photo Company.)

Visual Aids Prove Valuable In Infantry School Class-Work

Instruction Is Made As Realistic As Possible To Get Points Across

They say seeing is believing. And the Infantry School takes this message to heart in its educational program. Although text books play an important role in the curriculum of this great training school, just as important is the great number and variety of visual aids used to drum facts into the heads of our soldiers.

Thousands of troops and thousands of pieces of equipment go into this planned training program—so that students may see with their own eyes what the instructor is trying to put across.

To teach the proper method of getting a regiment across a stream, the Infantry School doesn't stop with passing out text books on the subject. It turns out a regiment of men, and a crew of engineers. Students are put in stands at an advantageous spot. A loud speaker apparatus is set up and then the actual job of putting up a bridge, and the actual movement of troops and equipment is accomplished before the students' eyes. The instructor, meanwhile, gives a running commentary on the planning behind the operation and the reason for each and every step.

BATTLE CONDITIONS
Every effort is made to simulate actual battle conditions. Smoke screens are laid, airplane attacks are fought off by anti-aircraft equipment, and artillery fires from concealed positions. Communication systems are set up and the class listens in over the loud-speaker system as commanders of different units send out their messages.

When it is desired to impress upon the students the strength of a regiment, and of its many component parts, an entire regiment is turned out with full rolling equipment. It parades slowly before the students, again with an instructor describing the units in detail over a loud-speaker system. Men are fully equipped and weapons and vehicles are ready for action.

Even in small units, such as a patrol squad, troops are used in demonstrating the proper handling of the men by a squad leader. The patrol members are checked for clothing, equipment, ammunition and health. They are given proper instructions and made to repeat in great detail their appointed task. The school works on the theory that when without exception one or more models, usually about 15 times the actual size of the object they represent, are displayed in front of the different classes.

They range from great working models of the trigger mechanism of a pistol, to a model airplane wired to operate in a ground message pickup.

The medals are true replicas of the real thing, usually gaily painted in contrasting colors in order to aid in pointing out the many different parts. They operate exactly as the real thing and in this way the mechanics of all infantry weapons can easily be explained to students.

O. C. Class Scores High On 37 Mm. Gun Range

The 17th Company of the 3rd Student Training Regiment emerged from its first encounter with tanks in a most commendable manner recently. Waves of theoretical low silhouette, eight Nazi tanks were obliterated in the eight-hour engagement.

The officer candidates' firing positions were literally covered with shells as the batteries of efficient 37 Mm. Anti-Tank guns took their toll of targets. The decisive victory occurred on the 1000-inch Preparatory Marksmanship course on O'Brien Range and marked the second day of work for the company with the favorite gun of the majority of officer candidates. The weapons were adapted for the use of small calibre ammunition.

A class average of 88.9 per cent qualified gunners put the class 5.9 per cent ahead of the mean score for recent classes. Almost half the class qualified as experts, raising the class figure for top notch gunners almost ten per cent over the average in that category.

24th ANNIVERSARY

Fort Benning Infantry School Is Famous For Training Army Leaders

School Founded Here In 1918 Offers Variety Of Courses

BY SGT. HERBERT KALETT
(Infantry School Public Relations Office)

The Infantry School at Fort Benning has become the world's greatest institution for military education and the development of military leaders. Established in 1918, it existed primarily as an educational and testing center of the Army's largest branch of service, the Infantry, until the beginning of the present expansion program. Today, in the crisis of war, it has been given the tremendous task of training tens of thousands of soldiers to become officers of infantry and strong leaders of men.

The school was first established as the Infantry School in October, 1918, three miles east of Columbus, Ga., on the Macon road. Previously it had been known in successive stages as the School of Musketry at Presidio of Monterey, California, and the School of Small Arms Fire at Fort Sill, Oklahoma. After several months in its Columbus location, it was moved in 1919 to its present location nine miles south of Columbus on to what was soon to become the Main Post of Fort Benning.

The Infantry School is located on the most complete army post in the country. Its classrooms extend over almost 200,000 acres of ground, including all types of terrain. Making use of its hills and level areas, its woods and open spaces, its streams, creeks, and rivers, the school is able to stimulate every conceivable condition of warfare in training the leaders for the greatest fighting force ever known to man.

SCHOOL IS DEVELOPED
The home of the Infantry School was designated by the War Department in 1922 as Fort Benning, named for General Henry Lewis Benning, a distinguished Confederate Army officer and native of Columbus. Originally the post contained nothing but the school, but in recent years it has been enlarged many times.

Tex., before going overseas in World War I as a captain in command of a machine gun company. Returning to the United States, he was assigned to Camp Lee, Virginia for a short time before being transferred to Benning and The Infantry School in 1920. Each time the General has left Fort Benning, it has been to take a position in Washington. In 1924 he was assigned to the office of the Chief of Infantry, a post which he occupied until 1928. When he left here in 1941, he was transferred to the General Staff.

Other stops in the General's career have taken him to Panama as Chief of Staff of the Pacific Sector from 1928 to 1931, and to Fort Wadsworth where he served until transferred to Fort Benning with the Fourth Anti-Tank Battalion.

General Allen was made a major in 1929, a lieutenant colonel in 1938, and a colonel in October, 1941. He was promoted to Brigadier General on February 6, 1942. His present rank of Major General was attained on September 8, 1942.

VARIETY OF COURSES
Before the present emergency, most regular army officers attended the Infantry School at least once in their careers. With the beginning of the expansion program, it became the aim of the Army to send all infantry reserve officers here as soon as they were called into active duty, and before they were assigned to troops. Three regular infantry courses are presented for commissioned officers. For junior officers of company grade there is the Rifle and Heavy Weapons course which is a complete refresher course covering all weapons of the Infantry and the tactics of Infantry units up to the Battalion. As almost all junior reserve officers have already been called to active duty, no new Rifle and Heavy Weapons

"Through These Portals Pass The World's Best Soldiers"

sign Station in the Army. They are the privates, corporals and sergeants who were selected by their superior officers in having outstanding qualities of leadership and intelligence requisite for officer material. After a man has been selected for the Candidate School, he is transferred to the Infantry School Service Command and sent to Fort Benning. Here he is assigned to a candidate company and embarks on a rigorous thirteen week training program.

O. C. S. IS RIGOROUS

The candidate course is extremely difficult. From the first day at school, the candidate is made to feel that he is a prospective officer. He is observed continuously by the commissioned personnel assigned to his company to see that his bearing and deportment are worthy of an officer. His day begins with reveille at 6:45 in the morning, and he is kept very busy almost until bedtime. The actual hours of instruction are from 8:30 a. m. to 6:15 p. m., but in addition there is a compulsory study period four nights a week. Moreover he frequently finds it necessary to do more work on his own time. Lights go out in the barracks at ten o'clock, and there is a bed

The actual training is divided between the field and the classroom. Indoor classes are held on such subjects as map reading, mechanics and functioning of weapons, combat intelligence, mess and supply management, and instructional methods. Out in the wide open spaces, the candidate learns the use and manipulation of the weapons of the Infantry and gets to fire each of the ranges. In the first six weeks of the course are devoted primarily to training with weapons. The balance of the time is spent on tactics. Under this heading the student learns proper disposition and use of all tactical units up to the battalion. He learns how best to deploy a platoon of men in every conceivable attack in defense position. He is taught how to coordinate his small arms fire with supporting heavy weapons, and primarily throughout the entire thirteen weeks the candidate is TAUGHT HOW TO TEACH.

The School has taken cognizance of the fact that officers being commissioned today must be more than leaders of men in battle. Many of them have been assigned to newly activated regiments where they will be charged with the responsibility of training new recruits to be hardened, efficient, seasoned soldiers. To accomplish this, these platoon leaders must be good instructors, and so it is that The Infantry School has become in reality a school of pedagogy, a teachers' college, imparting

the latest and most effective methods of instruction to its students.

LEARN TEACHING METHODS
The Officer Candidates, for instance, receive eleven hours of instruction in training management during their first week at the school. This instruction is given early in the course so that the Officer Candidate may be sensitized at the very outset to the place of teaching methods, both in the school and in Military training in general. They are made aware of what constitutes good instruction, and are urged to study their instructors at the school. This every hour of instruction which an Officer candidate has at The Infantry School is, in effect, a demonstration of how to teach that particular subject.

This plan presupposes, of course, a high degree of excellence on the part of instructors at the school, because the Infantry School urges its thousands of graduates to adapt the training methods employed here to their own training facilities. In order to insure a high standard of training efficiency, all new instructors appointed to serve at the school are given a short but intensive period of instruction in training methods and philosophy. In addition to this, the new instructor, before he goes on the platform, is given a generous period of time to observe other instructors at the school. Then after he has mastered his material and determined his method of instruction, his presentation is given before a critical committee. The committee makes suggestions and recommendations for improving the presentation. Thus, what students at the school see on the platform before them represents the very best judgment of experienced officers on how best to instruct in that particular subject.

The relationship of the Infantry School to the training of Infantry in general is that of a wholesaler. The instruction is wholesaled to officer candidates and officer students, and retailed by them to the masses of troops now making up the new American army. Thus the position of the school is a strategic one. Its high standards require safeguarding despite the pressure of time and of numbers occasioned by the war. That it is maintaining its standards is shown by the hearty approval which its work has received from countless educational and military leaders who have come here to observe and to criticize, and who have left convinced that the instructional methods used at the Infantry School are the most efficient in the world.

This, then, is the Infantry School whose motto is "Follow Me." That motto indicates its position in the infantry branch

First Filipino Officer In Our Army Is Here

Captain Abdon Lorente is mighty proud of his home regiment, and he has good reason to be for it is the only one of its kind in the world. The First Filipino Regiment was organized July 11, 1917, under the command of Col. R. H. Otley, Class of 1917, West Point. It was organized at the request of the Philippine Government, and of Philippine people in this country. Captain Lorente, the first Filipino to be commissioned in the Army of the United States, was instrumental in its formation.

The Regiment is organized for overseas duty only, and is anxious for a crack at the Japs. Ten of its officers are at Benning now in the Advanced Classes, and 95 per cent of all its officers are from Benning. They like only Benning officers, and who can blame them?

Captain Lorente is at present a member of the advanced class at the 3d Co., of the 1st STR.

Time and the Pioneer section of the 3rd Bn. H. Q. Co., have finally accomplished their task of building a fence around the ten-court of the company. (They are now all fenced in.)

Lt. M. J. Barry Of 117th Infantry Is Made Chief

First Lieutenant Barry, of the 117th Infantry, has been promoted to the rank of captain, and is now the chief of the 117th Infantry.

Captain Barry, who has been in the army for a while, was transferred back to his present position in the army during the war, he went overseas in 1917. Here he served a year's occupation.

The captain's army after the war for a while with forces in Alaska transferred back to his present position before attending date School was chief of Fort

Confucius Say "Picture Worth 10,000 Words"; TIS Takes Philosopher Literally

Explanation, Demonstration, Application, Examination Are Keys to Formula Followed

CAPT. C. J. SIMMS and three enlisted men are shown demonstrating the use of the sighting bar for rifle marksmanship. The bar is used to test the student's ability to get the correct "sight picture."

THE BOLT MECHANISM of the Browning Automatic Rifle which is actually but four inches long is reproduced in a wooden model 15 times its actual size. The wooden model is shown as compared to the size of the instructor. The model actually works just as the real bolt in the rifle, and in this way the principles of its operation are easily explained to the student.

(Photos by 161st Signal Photographic Company and The Infantry School)

TECH. SGT. Y. T. NEWBERRY uses the enlarged model in demonstrating the intricacies of the BD 71 telephone switchboard to a class in the communications section, TIS.

MAJOR CREIGHTON uses an enlarged model to explain the control of the radio set SCR 288 to students at officers' communications course of the Infantry School.

LARGE SAND TABLES such as the one shown in the photo are proving a great aid in demonstrating tactical problems in miniature to students. Every possible type of terrain is reproduced. Enemy units are placed in certain strategic positions and students are shown the accepted method for operating against them. Model weapons, equipment, and small figures are used in demonstrations. Many similar tables but on a less elaborate scale are used in many School classes.

HERE IS SHOWN a demonstration of proper kneeling position for the firing of the M-1 cal. rifle given by Capt. W. T. Hornaday.

A SIGHTING device for use on the mortar is shown above. It is known as the Cook practical aiming demonstrator and is used to instruct by visibly exaggerating the movement of the mortar adjustments.

IN THIS PHOTO at left, St. Sgt. Tietjen demonstrated wheel alignment factors on a Weaver model to a class in the automotive section of the Infantry school.

LARGE-SCALE MURALS made by enlisted men of the Infantry School are used to demonstrate military tactics. This mural illustrates a river-line attack.

CAPTAIN J. D. BUTLER uses the enlarged wooden model to demonstrate the correct "sight" picture which students must use to recognize when they fire the Garand rifle. The black dot represents the "bull's eye" rear peep sight.

THE INFANTRY SCHOOL'S great training program is based primarily on visual education. Although it has many models, pictures, graphs, and charts there is also a great use of actual troops in the vital aid program. In the photo students are shown learning the proper equipment and proper method of inspecting a squad before it is sent out on patrol or other detail. Sometimes a whole regiment may be so employed.

Soldier Poetry

When nations go to war, it is presumed that the time for words, written-and oral, is past. Men lay down the pen and take up the sword to fight for causes they believe to be just. Nevertheless literature is not entirely dormant as every war has proven, and from the pens of soldiers on the field of battle and from those of men too old to fight have come now and then jewels which have taken their place in the great literature of the world.

For man is both militant and pacific; he expresses these moods in literature and art, and it is apparent that the two are not incompatible.

His war literature is devoted usually to the exaltation of such special qualities as patriotism, self-sacrifice, enterprise, and endurance. This literature, and we have in mind chiefly poetry, is necessarily subjective, for the poet feels and sees all the things he converts into verse. He envisages war from various points of view, and treats it from these viewpoints. His treatment may be romantic, sentimental, or realistic. The war poet may be the chronicler who celebrates some great historical war event or he may be the contemporary interpreter of military history.

This war poet has sung the fall of Troy; he has followed Caesar to the fields of battle to record in rhyme what his eyes have beheld; he has shared in the hardships, the sufferings, and the triumphs of the crusaders; he may have been at Agincourt or at Waterloo.

Consequently some of the great bards of literature have been responsible for some of our great war poetry. We need name only a few to prove this point: Milton, Dryden, Byron, Scott, Tennyson, our own Walt Whitman, Brainerd, Rudyard Kipling, John Massiefield, Rupert Brooke, John McCrae, author of "In Flanders Field," and Allen Suggs, poet of the haunting "I Have a Rendezvous with Death."

PRIZES OFFERED. Anticipating another flow of war verse from the pens of soldier-poets, A. S. Barnes and company, New York publishers, have already offered \$1,000 in prizes to soldiers submitting their work to contest judges. This contest is evidence of the importance which publishers and men of letters place on the potential crop which is now in the offing. As an example of what can be done Barnes and company has issued a collection of war poems entitled "Steel and Flame" which should serve as an incentive to soldier bards to submit their work.

Much verse has already been written in this war. Some of it is good, some bad, some indifferent, but nevertheless it is being written. One need only peruse the verse columns of camp newspapers which come through the mails to Fort Benning every day, or read periodical literature.

"HIGH FLIGHT" One verse especially has caught the fancy of literateurs. It is "High Flight," written by John G. Magee, Jr., an American volunteer with the Royal Canadian Air Force, who was shot down last December just after mailing his poem to his mother in Washington. D. C. Archibald MacLean, a Canadian of Congress and a poet of note in his own right, has termed this poem the first jewel to come from an American pen in this war. The poem has been published widely in magazines and newspapers throughout the nation, and appeared on the editorial page of the BAYONET in its inaugural issue.

Because it may have slipped by the eyes of some of our readers, and because it has inspired an other poem from a Fort Benning poet, it is reproduced here:

"HIGH FLIGHT"
Oh, I have slipped the surly bonds of earth,
And danced the skies on laughter-silvered wings;
Sunward, I've climbed and joined
Of sun-split clouds—and done a hundred things
You have not dreamed of—wheeled and soared and swung
High in the sunlit silence. Hov'ring there, I've chased the shouting wind along and flung
My eager craft through footless halls of air.
Up, up the long delicious burning blue

I am returned to whence I came
Dust unto dust, ground-soldier I am
I stand on firmness, ground beneath my feet.
Upon the base of God, the earth
And though a million tempests move to the moon and stars

When the country called that it needed men
I rushed to grab paper and fountain pen
The first in line of the "L.S." crew
To volunteer for some work to do.
Now I'm wearing the khaki, like all the rest
And I'm working hard at my very best.

I haven't worked on the martial bands
But I've washed enough dishes for dishpan hands.
I've fired the boilers, but never the guns
And I've shoveled coal (a hundred tons)
I've learned to sweep, to cook, to bake,
To clean latrines, to use a zake.
I've worked with chisels, saws, and bits
With axe and hammer I've scored my "hits".
My only "target" the head of a nail,
To "wipe-out" peanoy a whitewash pall.

Yet I'm not kicking, and I don't whine.
For this is the service for which I signed.
Yes, I know I'm not fit for combat, to fight
See the things I believe in.
Truth, Freedom, and Right.

So I'll stay here and "keep-up"
May you do the same.
The road you're on after
Are much bigger game.

— SCHILLING —

I can but sink to ground, my womb
And lie embraced in warmth, in death.
Another Benning soldier poet is the "Unknown Soldier" who has requested that he be left cloaked in anonymity. With his "Wouldst Thou?" he struck a responsive chord, and now he is back with two poems, "Mother" and "A Victory Prayer" which are reproduced below.

MOTHER
Who scrubbed your ears and dried your face,
And saw that all your things were placed
Correctly on the mantel shelf
As though you'd put them there yourself.
Whose smile is like the morning dew,
And like the roses that are new,
That's sweet and clean and pure
And also taught you not to fight.
And though she taught me not to fight,
That we may still retain our right,
Our right to say just what we please,
Our right to bow down on our knees,
And pray with all our heart and soul,
And do things that are not foretold.
Our right to mix with Jones and Browns,
Our right to move from town to town,
Our right to read the "Times" and "News",
Our right to mix with Czechs and Jews,
And Irish and English and Scotch
And Irish and English and Scotch
And Irish and English and Scotch
And Irish and English and Scotch

For there's a job, awaiting o'er seas,
That we may retain democracy.
Who always stressed the "Golden Rule",
And seldom made you late for school,
Who stroked your cheek and kissed your chin,
And always prayed for you within.
Lest we forget her tribulations,
Lest we forget our obligations,
Forever shall I keep her preserved,
She asks much less than she deserves,
She asks much less and accepts no more,
But I shall give as he's before.
To her I give my very soul,
To one that's purer than purest gold.

INFANTRYMAN
I am an earth-bound thing
With not a want to sail or fly
To play in clouds, to soar the sky
There are no wings upon my chest
Nor will there ever be
The ground is home to fight or die
The earth is good to me.

Here, with my feet set deep
Placed in, as if grown root
I stand in stubbornness, stout
My grip is firm on rifle butt
My eyes look straight ahead
No turn of head to a foreign soil
Can pass me 'til I'm dead

I'm infantrymen through and through
The moth that ne'er grew wing
A soul unharmed to the blue
The song of earth I sing
The song of sweet and bodies warm
Strained to the breaking, holding strong
Clenched fists, tight muscled, solid brown
Men all, not bound to clumsy tools to keep
Themselves alive, except cold steel thrust deep

I am returned to whence I came
Dust unto dust, ground-soldier I am
I stand on firmness, ground beneath my feet.
Upon the base of God, the earth
And though a million tempests move to the moon and stars

When the country called that it needed men
I rushed to grab paper and fountain pen
The first in line of the "L.S." crew
To volunteer for some work to do.
Now I'm wearing the khaki, like all the rest
And I'm working hard at my very best.

I haven't worked on the martial bands
But I've washed enough dishes for dishpan hands.
I've fired the boilers, but never the guns
And I've shoveled coal (a hundred tons)
I've learned to sweep, to cook, to bake,
To clean latrines, to use a zake.
I've worked with chisels, saws, and bits
With axe and hammer I've scored my "hits".
My only "target" the head of a nail,
To "wipe-out" peanoy a whitewash pall.

Yet I'm not kicking, and I don't whine.
For this is the service for which I signed.
Yes, I know I'm not fit for combat, to fight
See the things I believe in.
Truth, Freedom, and Right.

So I'll stay here and "keep-up"
May you do the same.
The road you're on after
Are much bigger game.

"A VICTORY PRAYER"
By Benning's Unknown Soldier

O'Lady of the Miraculous Medal
May thy ever loving kindness,
Thy immortal Spirit of Truth and Grace,
Ever guide me upward, upward
To soar above mankind
And with all thy every lasting Glory
Might I beseech Thee, O'Lady,
might that which thou possess
Instantaneously smothereth mine heart and soul
And covereth me as the sand so covereth the beach;
As the dew so covereth the sweet fragrance of the daffodil;
Becometh here from a part of me as the roots are of God's trees,
As the soil of Mother Earth,
Make mine heart so clean as God's ray of sunshine
Across so beautiful a horizon.
Herewith am I, O'Lady, unclean
and unfit as to visualize
Thy pure and unequalled Virgin Grace.
That might I degrade uplifting humanity.
O'Lady, might I becometh so pure as Thou?
Yes? Yes! Like a drop to the ocean,
A rock to the mountain, and unworthy am I, O'Lady;

MY WAR AIM
Capt. Roger E. Groth,
18th Company, OCS 137
I've heard of many war aims,
And things were fighting for
"World Peace"—"Security"—are claims,
And there are dozens more.
But every thinking warrior man
Is looking forward to the day,
When honorably, each soldier can
Line up for his last pay.

I'm fighting for the chance to live
My life in my own chosen way,
To work, to eat, to talk, to give,
Without first asking if I may.
I'm fighting for the chance to learn
Greater knowledge, sense, and
about much more rapid return
To home, and all the things I love.

AMERICA SPEAKS
Pvt. Emery V. O'Daniel
Hq. Co., 3rd Bn. 50th Para. Inf.
I am the land made by Americans,
A land of noble birth;
I am men's homes, hopes, safety,
And God-given earth.
On my bosom people of all walks of life tread,
To pass into the Future, glorying in the life they have lead.
I have helped in the cause of freedom,
In years that have gone by,
I have sent my sons across the seas
To conquer or to die.
My ships have sailed the ocean
For the sake of home and love,
And for me their mother country
They give thanks to God above.
Another crisis looms ahead
Caused by greed and strife;
And many Americans shall heed the call
To lay down their life.
May God in Heaven hear our call
And end this useless war;
So love, life, and Democracy
Shall be ours forever more.

I thank God for everyone
Remember God, America,
WHAT IS LOVE?
LOVE is a funny thing, I say.
I'll make you sleep the live long day.
And stay awake the whole night long.
With thoughts of one you love so true.
LOVE is blind, it cannot see.
It is also brutal to you and me.
That's when you're taken from my side.
To become another's blushing bride.
LOVE is lasting and sometimes real.
'Twas tried for years, and did not fail.
Through toll and tears and years
When he returned, full were their hearts.
LOVE is sweet, now can't you see
Them under the moon and the lone pine tree.
The moon laughs aloud as it climbs so high
As they laugh and love; so timid and shy.
LOVE is "Puppy" in the hearts of youth.
They think it's real, but it isn't truth.
Tonight they're in love; tomorrow they hate.
Of this kinda stuff, they soon get a "halt".
LOVE is two-sided, as we often see.
He's in love with her; she's not with him.
This kinda love I know when I meet.
For twice it's knocked me off my feet.
LOVE is aged and different too.
They love me today as they used to do.
Forty years ago, she'd only hold his hand.
When she loves today, "T. B." for the man.
LOVE is challenging to you and me.
Competition a-plenty among the "he's".
One sets his head to love her best.
To woo and win her from the rest.
And when he wins her little hand,
Before the "Parson" their union will stand.
Out of this thing called LOVE, I wouldn't be.
For it's the making of you and me.
—T-Sgt. W. D. Smith,
Det. Med. Dept.

SAGA OF THE MILITARY POLICE
By F. M. Schilling
This is the story of Sammy P. Kirk
Who hated all exercise, trouble, and work.
He was physically fit (like a model T five)
Took Vitamin Pills for his heart and his liver.
He looked like a ghost, and a sick one at that.
For between bones and skin was no meat . . . and no fat
But our Sammy P. Kirk got his draft card one day . . . with its
"Greetings," my friend, you are hereby I-A.
He was tested and questioned . . . was inducted, too;
Then he was sent to Fort Ben with the rest of the crew.
There he spent just one week . . . learning left face and right

Till the Sergeant took pity in Sammy's sad plight,
And the Sergeant told Sammy, the same he told me,
"Sam's not fit for a soldier, but he could be M. P."
So they spoke to the Captain and he thought it best
That Sammy be given the new M. P. test.

That night they gave Sammy two hours of sleep,
Then they gave him a post where the snow was so cold that the kid nearly froze.
(As he walked you could see just his cap and his nose.)
But Sammy trudged onward, for eight hours straight
Till the corp'l arrived with relief a bit late.

Well, when Sammy got in he was too late forchow;
If he bothered the cooks, he would just start a row;
So his turned in the pistol, and turned in the clip
When the Desk Sergeant shouted, "We've been given the slip."
To arms all you yardbirds, a prisoner's loose
And if he is not caught we'll all get the noose."
So they hunted and searched, yes, for hours and hours,
And they looked under bushes, trees, shrubs, even flowers
Yes, the story they say, at the Guardhouse they tell
The prisoner missing was found in his cell.

So Sam laid on his bunk, and he just closed his eyes
When the Corporal whispered, "Hey, Sammy, SURPRISE
You have done your job well, so here is the booty
You've been picked as best man for the traffic duty."
So Sammy, our hero, had to wave traffic
Until it just seemed as if both arms were gone.
Next morning (about seven) they found Sam in a heap;
When he came to—he said not a word nor a peep.
And he never admitted, when thawed out next day,
That his tongue was so numb not a word he could say.

So . . . they made Sam a Sergeant for being a hero
In weather that was . . . well 'twas far below zero
And the moral is this, that you, too, can be
THE PRIDE OF THE FORT AND A SCREWY M. P.
TO THE GIRL BACK HOME
Now your man is in the army—
And you'd better keep in mind
That I'll stand for no "two-timing"
Or bad acts of any kind.
Tell those guys there's no trespass
On this soldier's "private" rights;
Let there be no classy parties
And no staying out at nights.
Tell those guys who are civilians
That they haven't got a chance,
And present a cool resistance
To each single bold advance.
Let them know the line is busy;
It can't do a bit of harm.
Since your heart is in the keeping
Of a man in uniform.

If you ever are downhearted
And you can't help feeling blue
You can still write me a letter,
For I might be lonely, too;
But don't seek solace elsewhere,
When your mind is in a whirl
Let me think that you are always
Just a perfect "soldier's girl."
Pvt. Hale Reeves.

LET'S PRETEND
Let's pretend that we're happy as
onward we go,
That perfect contentment is
ours;
Let's pretend life's lovely (though
well we all know
That thorns are hidden by flowers)
Let's pretend there's a spirit of
peace in the land,
That nations by wars are not
torn;
Let's pretend that there's gladness
on every hand,
Let's pretend we've no reason to
mourn.

Let us show all our foes that we
can't be kept down
No matter what people may say;
Let us give them a smile (though
we'd much rather frown).
And pretend this we feel just

that way.
Then when evil luck seems to be
camped on our trail,
And no part of our future looks
bright,
We at least can "make believe"
joy, and beauty prevail—
Let's pretend that the world is
all right.
Pvt. Hale Reeves.

That night they gave Sammy two hours of sleep,
Then they gave him a post where the snow was so cold that the kid nearly froze.
(As he walked you could see just his cap and his nose.)
But Sammy trudged onward, for eight hours straight
Till the corp'l arrived with relief a bit late.

Well, when Sammy got in he was too late forchow;
If he bothered the cooks, he would just start a row;
So his turned in the pistol, and turned in the clip

Army Bugler Has Tough Time; Must Memorize 45 Calls

Remember that old song from World War days — "Some Day I'll Murder the Bugler!"

Well, pause for a second or two and consider the number of regulation bugle or trumpet calls that the poor bugler must carry around in his head. Most persons, soldiers included, think that the chief function of the bugler is a sort of human alarm clock who wakes up the armed forces with his hated reveille call only too early every morning.

But, believe it or not, there are about 45 regulation calls that the bugler must know. In addition to the daily life of the average military reservation, and besides that, the bugle can be — and even today, frequently is — used to give all the commands for marching and drilling.

This is especially true in cavalry units where the voice of officers cannot possibly be heard.

Use of a trumpet or some sort of brass instrument for sounding commands for the armed forces dates back to earliest times. The Egyptians and Abyssinians and other early civilizations used the trumpet to summon the martial forces and to direct them in the clash of battle.

CALLS RECORDED

Today many of the calls have been recorded and are played over loud speaker systems at the larger army posts. But while most soldiers today know only reveille, chow call, payday call and taps, the bugler must know all of them and the soldier on smaller posts learns to recognize them as they are sounded off.

"Those who think that the bugler is just a guy who wakes them up on the morning are sadly mistaken," Sgt. Grady W. Kirkland, chief regimental bugler for the 24th Infantry, said in commenting on his job. And he ought to know for he has been an army bugler for nine years, and chief bugler of the 24th Infantry for the past three years. He trains the drum and bugle corps of the regiment, having about 40 men under him, including students. The drum and bugle corps has

Horning In On Morpheus

Here's that nasty man again, the Army bugler. Just when we get to the best part of an early morning snooze, along comes that big bar of wind!

to practice several hours each day, in addition to appearing for various duties during the day.

VARIOUS GROUPS

"The various calls may be divided into several groups," he

117th Hurler Proves That They Do Come Back

There is an exception of that old adage, "They never come back" in the 117th Infantry. This exception is Sgt. James L. "Din-

kie" Vaughan, star softball hurler for Co. K.

Several years ago, while pitching the Columbia (S. C.) Essos to the City League championship, Vaughan developed a sore arm. Due to a scarcity of pitchers, he had to continue despite this ailment. This went on for three weeks in which he pitched and won 13 games. The arm did not

respond to treatment and was advised to give up soft ball.

Not content to watch his team continue from the sidelines, Vaughan went to the outfield where his hitting would be to a good advantage. In this position, he won the batting crown for two years in a row, and led the league in runs scored. His team went on to win the city championship three years and rep-

resented South Carolina in the national softball tournament in Chicago, winning one and losing one.

Then came the Army, and Vaughan wanted to continue his ball playing. Unable to find sufficient pitchers, "Dinkie" went again to the mound, but soreness date, he has won two out of three games, one being a perfect no-run game, and the other victory was a one-hit shut out.

self again. Upon going to Radio School here on the post for three months, he pitched and batted his company team to the regimental championship, and upon being transferred to the "Break Through" regiment, he has continued his winning streak. To date, he has won two out of three games, one being a perfect no-run game, and the other victory was a one-hit shut out.

"And the Star Spangled Banner IN TRIUMPH SHALL WAVE Over the Land of the Free and the Home of the Brave"

O say can you see by the dawn's early light, what so proudly we hail'd at the twilight's last gleaming. Whose broad stripes and bright stars thro' the perilous fight, O'er the ramparts we watch'd were so gallantly streaming, and the rocket's red glare, the bombs bursting in air, gave proof thro' the night that our flag was still there,

Read those words again and again. You've sung them a thousand times—perhaps too automatically, unthinkingly. You learned them first when you were a small child, hearing a thin voice in school. You learned them by heart. But is their meaning alive in your heart today? The land of the free and the home of the brave! That is how the young patriot, Francis Scott Key described these United States. And one hundred and twenty eight years later we fight again to keep it free. Today it is still the home of brave young millions of men who have reached around the world in the globe-circling war which

can only end in making every man's land a free land! But the fight will be long, and the sacrifice will be great. Lives will be given, homes broken, and loved ones torn from each other's arms. For this is a war of the people, just as ours is a flag of the people—its stripes an ever-flying banner of glory; its stars an ever-bright beacon of liberty. On this anniversary of Fort Benning, what could be more fitting than that every American rededicate himself to the cause both the words and the flag bespeak! How better can we rededicate ourselves than by reaffirming—each and every one—the pledge to . . . buy War Bonds.

ALARM CALLS

The "Alarm" calls include "Fire Call," "To Arms" and "To Horse." Two formation calls are "Assembly" and the "Adjutant's Call," signifying that the adjutant is about to form guard, or battalion, or the entire regiment. Reveille and retreat are "Service" calls. Others in this category include "Call to Quarters," summoning in all the men not authorized to be absent for the night; "Sick Call," "Mail Call," "Tattoo," which is the signal for all lights in squad rooms to be put out within 15 minutes; and "Taps," which is played as the last honor at funerals for military or naval men. Another very little known regulation governing playing of "Taps" is that it must be sounded whenever a war vessel passes Washington's Grave at Mt. Vernon between sunrise and sunset.

Also included in this group is "Recall," the signal for certain duties to cease; "Officers' Call," "Captains' Call," "First Sergeant's Call," "School Call," "Boots and Saddles," "General Call," which is issued to signal striking of tents and loading of vehicles preparatory to marching; "Issue Call," indicating that supplies are ready for distribution; "Water Call," to signal all mounted men to lead horses to water; "Inspection" and "Payday March."

NAVY HAS CALLS TOO

Many of the same calls are used by the Navy but designate different functions from those used in the Army. Besides, the Navy has many special calls of its own for various activities aboard ship.

The call "To the Colors" is given as a salute to the Colors or to the President or Vice President of the United States, as well as for an ex-President.

Bugles also may be used for sounding codes, with a short note on C to denote a dot and a long note to denote a dash. Sgt. Kirkland explained.

On the field, bugle calls are used for the various drill movements, from a section right or left to column movements, flank and oblique movements, right or left into line, deploy as skirmishers, commence or cease firing, rally by company, fix bayonets and others. There are several special cavalry or artillery calls such as prepare to mount, prepare to dismount, cannoneers prepare to mount, gallop, charge, and so on.

Each company or each battery or troop generally has at least one bugler, while many have two regular bugler buglers as well as a student. There are regulations describing color of guidons to be used by the bugle units of various companies and the guidons are often used to give signals for troop movements, he explained.

Best Wishes to Fort Benning on the occasion of their 24th ANNIVERSARY

MONTGOMERY WARD

Civil Relief Act Provisions Are Outlined For Service Men

The Soldiers' and Sailors' Civil Relief Act was enacted to give members of the armed forces a degree of mental repose through intervention of the courts to the end that their civil rights and remedies shall not be imperiled as a consequence of their being in the military service. It suspends the enforcement of civil liability against members of the armed forces in order to permit such persons to devote their entire energy to the defense needs of the nation. Consequently, an action or proceeding in which a person in military service is involved, either as a plaintiff or defendant, may be suspended or stayed, in the discretion of the court, during the period of such service or within 60 days thereafter, unless in the opinion of the court the ability of the soldier (sailor or marine) to prosecute the action is not materially affected by reason of his military service. Although the court must avoid injury to one who is devoting himself to the service of his country, this does not imply that the Act is applicable to every situation without limitation merely because such person is a member of the armed forces.

JUSTICE ITS PURPOSE

The Act is not to be employed as a vehicle of oppression or abuse; its invocation is not to be permitted for any needless or unwarranted purpose. It is to be administered as an instrument to accomplish substantial justice. The criterion then as to whether an action or proceeding is to be stayed or postponed under the Act is dependent upon two factors:

(1) Whether the defendant's inability to comply results by reason of such military service.

(2) That such military service has materially affected the ability to comply. As an illustration let us consider the case of "The Sylph." In that case, "A" purchased the boat, "The Sylph" on a conditional sales contract. "A" later was inducted. Thereafter, while "A" was in New York on leave, the seller brought an action against "A" to regain the boat. "A" did not appear to defend the action, permitting a default judgment to be taken against him. Later, in an attempt to prevent sale of the boat by the plaintiff pursuant to the judgment, "A" pleaded the Act. His plea was denied because although he was in the military service, the fact of his service did not materially affect his ability to defend the action because he could have prepared a defense while he was in New York.

DEFAULT JUDGMENTS

Under the Act, a default judgment cannot be entered unless the plaintiff files an affidavit setting forth facts showing that the defendant is not in military service or that he does not know whether or not the defendant is in the service. If the plaintiff fails to file such affidavit, the judgment can only be entered by a court order directing such entry. In this latter case, unless the court is satisfied that the defendant is not in military service, it may require as a condition of entering judgment that the plaintiff file a bond to indemnify the defendant against any loss or damage that he may suffer by reason of the judgment, should the latter be thereafter set aside.

The Act provides a further safeguard by making it a misdemeanor, punishable by imprisonment, fine or both if the plaintiff knowingly makes a false affidavit. Should judgment be entered against one in the military service during the period of his service or within 30 days thereafter by reason of his failure to appear in the action due to his being in the service, and it appears that he would have had a meritorious defense, he may have the judgment opened within 90 days after he leaves the service.

Further provisions of the Act provide that:

OTHER PROVISIONS

1. The wife, children or other dependents of a person in the military service shall not be evicted or dispossessed from their home or apartment during the period of military service if the monthly rent does not exceed \$50.00, except by the consent of the court. If an application to procure the courts consent is made, the court may stay the proceedings for not longer than three months or it may make such order as may be just, unless in its opinion the ability of the tenant is not materially affected by reason of such military service. Any person who takes part in an eviction in violation of the Act is guilty of a misdemeanor punishable by fine, imprisonment or both.

2. In action to regain possession of a motor vehicle or tractor or accessories for same purchased under a conditional sales contract, the court may not stay the proceeding unless it finds that fifty

Everhardy Is His Name, Jap!

Typifying the rugged American soldier that Uncle Sam is sending to the battlefield is Pvt. Jack Everhardy, formerly of Los Angeles, Calif., now with the 50th Parachute Infantry Regiment, stationed at Fort Benning. Besides being a qualified jumper, Everhardy is fast becoming expert in the use of basic infantry weapons, such as the Thompson sub-machine gun shown in his hands. Parachutists are highly trained specialists, skilled in the art of destruction and equal to any emergency.

percent of the purchase price has been paid. Should the court fail to find the latter situation, although it cannot stay the proceeding it may require the plaintiff to file a bond before the judgment is entered, conditioned to indemnify the defendant, if the latter is in the military service, against any loss or damage that he may suffer by reason of the judgment, should the judgment later be set aside in whole or in part.

REAL ESTATE TAXES

2. Where taxes on real estate owned by one in the military service fall due during the period of his service, such person may file with the collector of taxes an affidavit stating that by reason of his military service he is unable to pay such taxes. In such case, the property cannot be sold because of tax delinquencies except with the permission of the court, which may thereupon stay such proceeding or sale for a period not extending beyond six months after the termination of the period of military service of the defendant. However, should the property be sold, it may be redeemed by the defendant at any time within six months after the termination of military service.

4. Where the ability of a person in the military service to pay his income taxes due either prior to or during his period of military service is materially affected by reason of his service, the collection of such income taxes shall

Delfini Gets Gold Leaves

Captain Manlio T. Delfini, popular Commande of Headquarters Company in the Third Student Training Regiment in the Infantry School here at Fort Benning has recently been appointed to the rank of Major.

Formerly an Engineer and draftsman with the Combustion Engineering Company, Inc. of New York, Major Delfini resided at 2364 Lorillard Place, Bronx, N. Y., before being called to active service in November of 1940.

At that time he came to Fort Benning for three months of basic work and then was assigned to Camp Roberts, Calif. In February of 1942 he returned to Fort Benning and joined the First Student Training Regiment. When the Third Student Training Regiment was activated in March he took over his present duties with that organization.

Major Delfini graduated from City College of New York in 1930 and was on C.C.C. duty from 1933 to 1935 in California, Idaho, Washington and Ft. Dix in New York.

Three Non-Coms Advanced In Grade

The promotions of three non-commissioned officers is announced by Headquarters Company, First Student Training Regiment.

Staff Sergeant Harold M. Smith is promoted to 1st Sergeant; Cpy. Felix Perez and Pfc. Jesse L. Babineaux are promoted to staff sergeants.

Technician Gr. IV James Liaskas has left for Ordnance Officer Candidate School at Aberdeen, Md.

Lieutenant Freeman H. Bokenkamp of Headquarters Company will soon attend the Parachute School at Fort Benning.

Avoid moving around too freely in areas where you suspect the presence of booby traps or personnel mines.

Before entering a building try to find a window or some opening through which you can get the lay of the land for possible traps.

Never use a knife to cut a cord wire. Use a scissor or a wire cutter so that no pull will be exerted that would detonate the trap.

ing one year after the expiration of such period if each of the following conditions exist:

a. The policy must have been made and a premium paid thereon before the passage of the act.

b. The face value of the policy must not exceed \$5000.00.

c. Application for the benefits of this provision must be made to the Veterans Administration on a prescribed form.

The act is not applied to the following cases:

a. Where the policy has lapsed for the non-payment of premium before the commencement of military service.

b. Where premiums on a policy are due and unpaid for a period of more than one year at the time when application for the benefit of this section of the Act is made to the Veterans Administration.

c. Where there is outstanding on a policy, a policy loan or other indebtedness equal to or greater than fifty per cent of the cash surrender value of the policy.

6. A certificate signed by the Adjutant General of the Army as to persons in the army is prima facie evidence that a person named therein has not, or is, or has been in the military service. It is the duty of the foregoing officer to furnish such certificate on application.

5. No life insurance policy shall lapse or be forfeited for the non-payment of premium during the period of military service or during

Fort's Soldier-Musicians Play Important Role In Symphony

One-Minute Interviews Reveal How They Embarked On Careers

Soldier-musicians from Ft. Benning are playing an important part in the Columbus Symphony Orchestra which presented the first of a series of fall concerts last month at the USO Auditorium, 100 Ninth street.

Pfc. Harold Schreckman is conductor of the orchestra and 25 soldiers from various organizations at Ft. Benning are included in the membership—making the orchestra unique in the entire country for that reason.

Here are some one-minute interviews with a few of the soldier-musicians, prepared by Corp. Robert Sugarmann for the 29th Infantry and by Pvt. Joseph J. Roman, for the 11th Armored Regiment, to give an idea of the background of some of these men.

We lead off with our tuba, and the artist who is wrapped inside of it—ANTHONY BATTUELLO, Bassist from New York City, called "The Bat" by his confidantes. "Bat" comes from a long line of musicians and naturally followed in their footsteps. While still in grammar school, he studied trumpet. After three years of putting so much power into his little horn that it sounded like six men playing instead of one, he changed to the tuba and at once his talents became recognized. He played with the National Symphony Orchestra of New York for three years and with various military bands. With the advent of conscription, he volunteered with the old "Fighting 68th" and from there came to the 29th Infantry Band.

SGT. DELOS V. ANDRUS, 1st Horn, called "Curley" by the boys because of the wonderful crop of hair he hasn't got, began playing French Horn at the age of eleven with the Boys' Community Band of Elmira, New York. After a varied career as a bandsman he joined the army in 1934 and while an enlisted man had the honor to be elected to play with the Juilliard Symphony Orchestra. Since then he has played with the 16th and 18th Infantry Bands and now with our own 29th Infantry Band.

CPL. ROBERT SUGARMAN, Percussionist, better known as the "Duke" in his own words. "My parents decided that at the age of six their little darling was to become a violinist. I took five lessons; on the sixth I hit the professor on his bald pate with the fiddle and liked the sound of wood on skin so well that I made up my mind then and there to become a drummer. Since then my drums and I have played through out the United States and Europe and South America, traveling 365,000 miles by sea and nearly as much by land and air. In 1940 my option was taken up by the army and now it's divided between the 29th Infantry Band and the Columbus Symphony."

CPL. WILLIAM HENRY SPROAT, 1st Trombone, or "Pine Top" alias the "Deacon", was a child virtuoso of the piano at the age of 4. When he was 8 he toured the country with Skillmans Bros. Minstrel Show performing as a banjoist and vocalist. At the age of 12 his switch to the trombone was his Moment in History, for in later years it made him internationally famous amongst the musicians of the world. He was one of the few younger musicians in New Jersey to be selected to play concerts with the All-Star Band under the direction of Dr. Edmond Franko Goldman. The "Deacon" also has a very fine baritone voice. He studied with a member of the "Westminster Choir", and has sung with a number of well known choral groups. "Pine Top's" one ambition in life is to be a General.

CPL. JOSEPH J. SULLIVAN, Bb Tenor Sax, will answer quicker if you call him "Yussel" than if you use his real name. Studied music with Professor H. Rehman of New York University who is now director of Music for the Nassau-Suffolk Counties, New York, Public Schools. Joe, at the age of 13, won the New York Music Association Gold Medal and appeared as soloist in Carnegie Hall. He also played with the LeRoy Little Symphony, The Aeolian Community Chorus & Orchestra, and the Long Island Opera Guild. About the time that Joe was called to duty he was slated to go with Enric Madriguera's

CITY LINEN SUPPLY CO.

Symphony of Newark, New Jersey. When he was drafted he entered the 29th Band and took up French Horn which he mastered in no time at all... Hurry up, Vernon.

PFC. JOHN LUCAS, 2nd Violinist, whose cognomen is "Big John", studied violin under a well known Parisian teacher, and saxophone and clarinet with a New York music professor. He has played with various symphonies in civilian life. Big John has one complaint to register with the public; he says that everybody picks on him because he is such a little fellow. He only stands 6 feet 1 inch, and tips the scales at a little over 210 pounds.

PFC. THOMAS LYTEL, 2nd Trombone, has the honor of being known as the first "Father Cobb" in the 29th Band. He became interested in the tuba at the age of 16. Upon entering college he was selected to play with the Mississippi All-State Band. Prior to entering the army, Tom won honors in every Mississippi State Band contest he entered.

SGT. SAVERIO T. PRUNESTI, 1st Flutist, for some reason or another is called Sal and sometimes Prunes by his friends... Studied with Professor Anselmi of the Conservatory of Music in Naples, Italy. Sal claims that there are two things in his life besides wine, women and song, and those are his flute and a good basket ball game. Prunes was a well known basketball star back in his home town of New Rochelle, New York.

PFC. WALTER (CHERUB) F. SMITH, Eb Baritone Sax, wants to be known that he hails from Ohio, where at the age of 12 he became interested in music, particularly the type dispensed by reed instruments. At present he capably handles all of the modern reed instruments. Before he was drafted, Cherub played every passable type of music from the Symphony to Dance work.

SGT. E. MARTINETTI, flutist, whom we might in truth label chief cook and bottlewasher, for he is a distinguished chef as well as musician, wants it known he was born in Italy and has studied music from a tender age. He has travelled all over the world several times with various well-known opera companies, orchestras and music shows. He first came to the United States when he was about 20 and has been in the army for the past ten years, spending quite a while in the Hawaiian Islands where he played with the Honolulu Symphony. He came to Fort Benning with the 11th Armored Regiment Band from California where he was actively interested in several Monterey musical organizations.

SGT. JOSEPH SORCI, clarinetist, a native of San Jose, California, began the study of clarinet and saxophone about twelve years ago, and has played professionally with well-known concert ensembles, dance orchestras and radio orchestras. His main interests now are the 11th Armored Regiment Band and the Columbus Symphony.

PVT. FRANK PROVENZANO, clarinetist, first saw the light of day in Glasgow, New York. Besides being proficient with his chosen instrument, he has also appeared as a singer with various dance orchestras.

CPL. SAVERIO LEMEDICO, clarinetist, hails from Madison, Connecticut, and was educated abroad. He has played with European bands in many parts of the Old World. After studying foreign languages he has devoted his talents to the theatrical arts. He was also announcer and commentator on a Los Angeles radio station at the time Uncle Sam called, from which time he has been a member of the 11th Armored Band.

SGT. JOSEPH D. ROMANO, violinist, and your "Thumbail Sketcher", was born in Italy and early began study the violin. His tutors were prominent teachers, and when he came to America he later studied at the Juillard Institute in New York. Playing experience has been with string quartets, concert ensembles, symphony orchestras and radio orchestras. He recently appeared on the C.B.S. "Cheers from the Camps" program from Fort Benning on September 1. Before heading the army call, he was playing professionally with the Buffalo Philharmonic Orchestra.

CPL. DON E. WRIGHT, oboist, is from Aberdeen, South Dakota, and began his musical education with the study of violin. Later he took to the oboe and now it is his favorite instrument. His talents are at the disposal of the 11th Armored Band and the Columbus Symphony.

PVT. JOE SCHEITZ, violinist, comes from Bogota, N. J. He's still a young fellow, having not long ago finished high school where he was concert master and soloist with his school orchestra. Has been in the army about three months.

PVT. EARL HEISNER, violinist, from Pontiac, Illinois, and now with the Reconnaissance Company, 11th Armored Regiment, says he is still too young to have done much in a musical way besides study with a graduate of the Cincinnati Conservatory and play in small ensembles and orchestras. He appears to be enjoying his work with the Columbus Symphony.

SGT. D. G. TADDEI, violinist, began his study in 1918 with Max G. Cimblek which he continued for seven years. In 1926 he went abroad to Bologna, Italy, for further instruction by Professor Fedelco Barera of the Bologna Conservatory and leader of the Bologna String Quartet. Professor Barera also made quite a name for himself in the United States some years ago as a soloist. Later Mr. Taddei went to Paris and studied under Professor Charles Dornon, member of the examining board of the Paris Conservatory, and well-known through Northern Europe as a soloist and composer. When Mr. Taddei returned to the States he started teaching in his home state of Maine, in the meanwhile doing solo, quartet and ensemble work. It was there that Uncle Sam found him in June of 1941, and he can now be found working with the 24th General Hospital Unit at Fort Benning and spending part of his spare time with the Columbus Symphony, playing viola.

SGT. JOSEPH SORCI, clarinetist, a native of San Jose, California, began the study of clarinet and saxophone about twelve years ago, and has played professionally with well-known concert ensembles, dance orchestras and radio orchestras. His main interests now are the 11th Armored Regiment Band and the Columbus Symphony.

Civilian Teams Are Organized For Bond Drive

Civilian personnel at post headquarters, under the supervision of Lt. John J. A. Lyons, assistant adjutant, have been organized into teams of Minutes Men to foster increased pay reservations for the purchase of war bonds.

Mrs. Myrtle Jones has been appointed group supervisor, with Miss Estelle Patrick, Mrs. Mary Marley, Miss Peggy Moore, and Mrs. Roanne O'Kiley, as Minutes Men in charge of teams of 11. When the group gets into full swing, it is hoped that the objective of the Secretary of War, 10 per cent pay reservation from 80 per cent of civilians, will not only be equalled, but bettered.

The program is on a purely voluntary basis; however, it is the desire that as many of the civilian employees of the War Department, as possible avail themselves of the facilities of this monthly pay reservation plan. If pay reservations can whip the Nazis and Japs, the girls at post headquarters are going to get them!

Lack of College Degree Is No Officer Candidate Drawback

Army Survey Shows Only 70 Per Cent Have College Sheepskins

If you're undecided whether the Army is the place to get ahead, stop for a minute and realize that six of every 100 officer candidates you pass on the post proper or in the Harmony Church area are not high school graduates and that 24 out of that 100 completed high school but had no college education.

These are percentages compiled by the War Department and announced this week in a survey of the present officer candidate program of the Army.

The survey was of special interest at Fort Benning because one of the 18 officer candidate schools operated by the Army—the great Infantry School—is located at Fort Benning.

The War Department disclosed that before the end of October, the various officer candidate schools will have their highest attendance since their inception. Included in the 18 schools are 70 widely-distributed branches. In any of these schools, only a man serving in the ranks can be appointed.

ONE-THIRD COLLEGE MEN

A survey of more than 20,000 officer candidates disclosed that 64.45 per cent are college graduates.

considered as valid as college diplomas.

Men who are outstanding in their mental alertness and capacity for hard work have ample opportunities to win commissions under the officer candidate system. A man who is regarded as having the quality of leadership does not lose out through lack of academic training; he is asked to make an alternate choice as well as a first choice among the schools.

Here are the 18 different schools which men serving in the ranks are eligible to attend. The Army says the schools in which the greatest number of openings now exist are: Engineer, Anti-aircraft Artillery, Field Artillery, Coast Artillery, and Tank Destroyer.

The complete list: Adjutant General's School, Anti-aircraft Artillery, Armored Force, Army Administrative School, Cavalry, Chemical Warfare Service, Coast Artillery, Engineer, Field Artillery, Finance, Infantry, Medical Administrative, Military Police, Ordnance, Quartermaster, Signal, Tank Destroyer.

UP FROM RANKS

The Army's policy is to find its officer material in the ranks and develop it through the officer candidate schools. Commanders have been instructed, says the War Department, to study their men, to seek out those who are potential officer candidates, to give them every opportunity for development in leadership and to encourage qualified men to apply for commissions. The fact that a man is difficult to replace in the assignment he is filling will not be allowed to stand in the way of his appointment to an officer candidate school.

Selected applicants belonging to units about to go overseas will accompany their units, but will be sent to the schools, added the War Department. Those whose applications have been approved, but who have not yet been assigned to schools may also, at the discretion of their commanders, be left behind.

As a reward for outstanding leadership and initiative shown during maneuvers or unusual conditions, a general officer may appoint an enlisted man to a school without requiring him to appear before the examining board. Appointments of this nature are limited to ten per cent of the quota allotted to the command for the school in question.

NO OUTRANKING

No man at an officer candidate school is outranked by a fellow. Insignia of grade and rating are removed from their clothing during the school term.

An applicant for an officer candidate school must be a citizen of the United States, of the Philippines, or of one of the countries of the American Republics. He must have reached his 18th birthday and not have passed his 35th birthday on the date of completion of the course for which he has been selected—except in the case of the Army Administration School, where men up to 50 are eligible. Volunteer officer candidates and men in combat branches who are under 35 years of age are not accepted for the Army Administration Officer Candidate School.

A Colored Soldier's Prayer

By PFC. SIMON PETER

Dear God,
I'm asking you tonight
To think of me each day.
I'd like to feel that as I fight
You're with me all the way.
The call to arms I followed
Because I thought it was right;
The cause itself seems hallowed
In all my people's sight.
Perhaps I'm just a fool
To risk my life again;
Maybe I'm just a fool
For bigger, cravier men.
Am I just cannon fodder?
Some people say "is so."
They say—"Why do you bother?
Your glory will be woe."
But I've got a strong conviction
That this is our fight.
And contrary to some fiction—
Two wrongs don't make a right.
Freedom will never be ours
If we stand idly by.
This is no time to cower;
It's a case of do or die.
And when this war is over
For myself I'll ask no glory
But Great God I'll pray with fervor
That we'll have a different story.
That my people then may stand
To face the rising sun
In one great, united band
And know a new day's begun.
That's why I fight, Dear God:
I know that I'm not wrong;
And before I rest beneath the sod
May we all sing freedom's song.
AMEN.
(Reprinted from the GREENER FIELD NEWS.)

HONEYMOON EXPRESS

"Honeymoon on a train" was the experience of Technical Sgt. Robert B. Berlin, headquarters, 80th Medical Battalion, 10th Armored "Tiger" Division, and Mrs. Berlin, the former Miss Sarah Miller, Washington, D. C.

On a three-day pass, Sergeant Berlin rode to Washington, got married and returned to duty at the appointed time, of course, being accompanied on the return trip by the bride.

The sergeant and Mrs. Berlin are making their home in Columbus.

Benning's Hill Brothers

The four Hill Brothers, all members of Uncle Sam's Army, get together for the cameraman at The Infantry School. Three of them are members of the school command, while the fourth, formerly with the school, was a visitor here, now assigned to the 7th Armored Division. Left to right, they are: Technical Sergeant Clinton A. Hill of the school's Academic Department Headquarters; Staff Sergeant George W. Hill, lithographer in the school's Reproduction Plant; Staff Sergeant Lonnie F. Hill, mess sergeant of the 22nd Co., 1st STR; and Technical Sergeant Marshall E. Hill, the visiting member of the family, who is a transport sergeant in the 7th Armored Division. (Infantry School Photo.)

Veteran Fighter at Fort Studies for Commission

Saw Action On Mexican Border, World War I

Typical of the American spirit prevailing today is that displayed by Officer Candidate Raymond C. Fisher, of the First Student Training Regiment, commanded by Col. Thomas R. Gibson.

Combat will be no new experience for Candidate Fisher. He started dodging bullets and bayonets before most of the officer candidates here started cutting their baby pre-dates World War No. 1.

For he saw action along the Mexican border against the forces of Pancho Villa, notorious Mexican Revolutionary, before the United States entered the first World War. In France he fought through six of the seven major engagements in which American troops participated, was wounded, gassed, and twice decorated. Now he is back for more.

Before coming to Fort Benning, Fisher was a recruit instructor in the Air Corps at Miami Beach, Fla. His class here will graduate January 5, 1943.

Candidate Fisher talks little of his army experiences and then only when questioned directly.

"I think our soldiers in this army are much better trained than they were in the last war," he said.

"We had a good army then; this time we have a better one," he added.

SOCCER

A pick-up team of soccer players from Keesler Field, Miss., are engaged in a series of booting contests with a team of small, but skilled British sailors. The English lads to three ties and one close victory in the four encounters to date.

Army-Navy Production Award pennants have been given to 20 industrial plants for outstanding performance of war work.

Candidate Fisher is not only ready, he is able to fight and work. Husky and active at 44, he performs the tasks of a soldier more efficiently than many men 15 years his junior. Erect, alert, and thoroughly military in bearing, he looks like a soldier and is one.

In civilian life Candidate Fisher was an assistant department head for Benrus-Schwartz Company, watch manufacturers at Attleboro, Mass. He is married.

Candidate Fisher joined the Massachusetts State National Guard when he was a junior in High School. When he was 18 years old he was serving on the Mexican border. After returning to his home at Attleboro he finished high school and was mustered into Co. I, 3rd Bn., 26th Div., and sent overseas immediately.

The young soldier fought at Vaux, Chateau-Thierry, St. Mihiel, Verdun, Meuse-Argonne, and Aines-Marne. He was wounded

Japanese Writes First Yank Note To Hon. Tojo

First entry in the current "Nuts to the Axis" contest sponsored by YANK, The Army Weekly, came from Pvt. Freddie Shigaki, a Japanese-American in the United States Army.

Pvt. Shigaki addresses his message to Tojo without waste of words. Choosing the subject, "Doolittle Was Only the Beginning," he writes, "Doolittle was only the beginning on Tojo as he flew over Tokyo and said, 'So sorry, big mistake, excuse please.'"

And he adds tersely, "So let's all do a little more with General Jimmie Doolittle!"

Pvt. Shigaki is stationed at Camp Grant, Illinois.

Many Negroes Inducted Here For The Army

Capt. Gardner States Processing Continues Seven Days A Week

Refuting a general misconception prevalent in this vicinity that few negroes are being inducted into the Army at the Recruiting and Induction Station at Fort Benning, Captain J. H. Gardner, commanding officer of the station, stated that several thousands of colored men have been sworn in here since June 1.

Every effort is made to process the men in a 24-hour period. Induction processing includes the giving of mental classification tests and physical examinations including X-ray and Wasserman tests and the completion of induction records.

If the candidates are accepted, their induction papers are completed and they are sworn into the Army of the United States. Those who desire immediate 14-day furloughs to enable them to arrange their personal affairs are given transportation home and back to the Reception Center. The others are sent directly to the Reception Center.

One of the important functions of the Induction Station is the screening of the men to separate the literate from the illiterate. Those making better than a score of 25 on the tests are considered literate and are sworn in. The Army is also taking ten per cent of the illiterates selected from those illiterates making a score between 15 and 25. In order to determine which of the illiterates are to be taken into the Army, the classification officer and his aides conduct personal interviews. They base their rulings on the appearance, native intelligence and previous experience of the men interviewed. Those selected are sent to a compulsory opportunity school conducted in the Special Training Detachment, Colored.

where they are taught reading, writing and arithmetic as a part of their thirteen week's basic training.

Discussing the question of gonorrhea discovered among negro candidates for induction, Captain Gardner stated that those suffering with uncomplicated cases are accepted to the extent of about 4 per cent of induction. These are sent to the station hospital for treatment.

Under the guidance of S-Sgt. Les Wilson, former Boston Braves and minor league infielder, the Keesler Field, Miss., "Commander" rolled up a season record of 22 victories against only seven losses to take the State semi-pro baseball championship.

Today, We
Congratulate You
FORT BENNING
On Your
24th ANNIVERSARY

Each day, thousands of our boys in training enjoy the delicious goodness of Wells' Pasteurized Milk! Produced by carefully selected dairy herds, rushed to our plant where it is tested, scientifically pasteurized and automatically bottled in sterilized containers, Wells' wholesome milk is Nature's most Perfect Food! Our army knows the value of plenty of milk in the daily diet. . . . You, too, should see to it that every member of your family drinks Wells' milk every day! Production, pasteurization and spotless cleanliness all combine to protect the purity and delicious natural flavor of Wells' Pasteurized Milk.

Wells Fort Benning BRANCH

2332 CUSSETA ROAD

Several months ago Wells' opened their 2332 Cusseta Road Branch for the convenience of Fort Benning officers and enlisted men and residents of this vicinity. Wells' Drive-In Branch is well stocked with all the fresh dairy products they produce. . . . Drop in often . . . the dairy habit is a GOOD habit for health and refreshment!

THE MILKMAN IS ALWAYS AT WAR!

Always the number one defender of public health, the dairyman today assumes a heavy role in the critical task of keeping a nation at war strong and healthy. Wars are not won by sick armies and navies nor by ailing civilians behind them, and the dairyman is only too conscious of the part that he is expected to play. The customers that he serves receive only A-1 milk and it is his duty to see that the milk is wholesome and pure and contains only beneficial elements. Wells' dairymen are loyal and have vowed themselves toward the same service that they have always given.

Fort Gets Modern Cafe, Soda Fountain

New Post Exchange Also Opened With Much Fanfare

No sooner was the Main Branch of the Fort Benning Post Exchange completed than work was begun on another large building which will be occupied by the Exchange for the soda fountain, cafeteria restaurant and the main offices. Major H. E. McGaffey, Exchange Officer, announced.

Opening of the Main Branch was handled with the fanfare and flourish usually attendant on a regular Hollywood premiere, with band concert, attendance by Brig. Gen. Walter S. Fulton, Commanding General, Maj. Gen. L. C. Allen, commanding general of the Infantry School, and other distinguished guests, with flowers and presents presented by guests and patrons.

The new Main Branch was moved from under the South Stand of Doughty Stadium to the building formerly occupied by the Grocery which was destroyed by fire several months ago. The building was rebuilt and recon-

ditioned, with new tile floors and new ceilings. It is 160 by 60 feet, completely equipped with modern store equipment including latest type of show cases, which are fluorescent-lighted. Fluorescent overhead lighting also has been installed.

DIMENSIONS
The new building, on which ground was broken by General Fulton a short time before opening of the new Main Branch will be 188 feet by 200 feet. Part of it will be two stories in height, with the Main offices to be installed on the second floor. Cost of construction, exclusive of installing fixtures and furniture, will be approximately \$100,000.

The new Main Branch gives the Post one of the most modern and complete store buildings of any Post in the service, with several departments handling many different lines of goods and a large soft drink bar as well.

Opening of the Branch thus

Major McGaffey Inspects New Exchange

Major H. E. McGaffey, Post Exchange Officer, is pictured here with Miss Ruth Wood, inspecting a portion of the recently completed Main Branch Post Exchange. The new exchange is one of the most modern and complete store buildings of any post in the service. A business of around \$700,000 per month is transacted through the exchange.

Congratulations to FORT BENNING

And Its Personnel On Your 24th Anniversary

We have confidence in our armed forces, and our nation, and know that with the help of God we will come out victorious!

'Wouldst Thou' Drop In On Us, Unknown Poet?

gives Fort Benning one of the finest, most complete Post Exchange plants in the country, doing a business of about \$700,000 per month. In addition to the usual facilities supplied by the average Post Exchange, there is a complete grocery with produce and meat departments, garage services, four filling stations, one Main Restaurant, 11 Lunch Counters, in various branches, mail order department, watch repair shop, beauty parlor, and two soda fountains one for white and one for colored personnel.

The Exchange is under the direction of Brig. Gen. Walter S. Fulton, commanding general, and is operated by Maj. McGaffey, with Lieut. Roy F. Baker, as Assistant Exchange Officer.

800 EMPLOYEES
There are approximately 800 employees, working on 69 different activities, with four supervisors, one of whom is colored, managing 10 branches that serve colored troops with colored help only.

All employees are bonded under a blanket bond the day they enter the exchange service. All food handlers are examined before they enter the service and at least every six months thereafter. All employees are fingerprinted and photographed after having filled out the prescribed application blank.

Wouldst thou, Unknown Soldier Poet of Fort Benning, design to drop thy cloak of anonymity long enough to walk into the public relations parlors to enable us to deliver a check for two bucks which thou didst win with thy poem "Wouldst Thou?" published in the verse columns of the BAYONET several weeks ago? Wouldst thou? The poem was favorably received by many Benningites, some of whom have requested your name. Your poem was accompanied by the request that your name be omitted. Consequently we threw your signature in the wastepaper basket. Several days later we decided to encourage verse writing by awarding prizes for the best poems published in the BAYONET. Your editor must confess he was very much embarrassed a week later when your poem was named for a prize. We cannot make out your check without your name. We only know you are a corporal.

Wouldst thou design to drop by our office. Wouldst thou?

Basic Course Grads To Hold Class Reunion

The graduates of Rifle and Heavy Weapons course number 10 will hold a class reunion at the Polo Hunt Club on Saturday, November 14. All former members of the class are invited to attend.

Many of the graduates of this class are now on duty as officers at nearby camps, such as Fort McClellan. They are being contacted, and several are expected to attend. All members of the class are urged to call Major Wagoner at PB-2874 during the day or at PB-2015 in the evening, or Lieutenant Sanders at HC-373 or Columbus 8055.

Seven Officers Get Promotions

The following promotions for student officers of the 1st Student Training Regiment, have been announced: Capt. Edward Chalgren, Jr., Andrew Lipscomb, and Julian J. Ewell from captains to majors. Major Chalgren and Major Lipscomb are both from Camp Croft, S. C. while Major Ewell is in the Parachute School at Fort Benning.

Capt. Bearas, Sandridge and Morrison to majors. Major Bearas is from Camp San Luis Obispo, Calif.; Major Sandridge is with the Sixth Army Corps, New York, and Major Morrison's station is Camp Bowie, Tex.

The junior promotion in the class was that of 1st Lt. Joel Holis of the Second Army, Memphis, Tenn., who was promoted to Captain.

Fort Hq. Civilians Over-Subscribe War Bond Quota

Civilians employed at Headquarters at Fort Benning are subscribing 18.5 per cent of their payrolls in the Pay Reservation Plan for purchase of war bonds, a late report issued by Lt. John Lyons revealed.

There are 49 civilian employees at Headquarters, of whom 38 have

subscribed to the plan. Four of the civilian employees are on leave and three are leaving Headquarters, Lt. Lyons reported.

Gross total of payrolls of civilian employees under the War Department is \$3,055.33 and the employees have subscribed for a total of \$572.50, making 18.5 per cent of their total payrolls being put into War Bonds.

A vast swamp frequented by dinosaurs covered Colorado and Wyoming 80 to 100 million years ago.

Laugh Of The Week

A private stationed at the Army Air Force Basic Training Center, N. J., was ordered to wash and clean an officer's inner sanctum. Quickly he went to work. Happily humming a song, he wiped the desk, cleaned the chair, dusted the books. A half hour later the officer walked in. Everything was tip-top—except the floor.

"Private," remarked the officer, "wasn't the floor washed?"

"No," replied the private. "The irritated officer. 'No mop,' said the private meekly."

Promotions

124th INFANTRY
First Lieutenant Logan B. Hull, Medical Corps, has been promoted to the rank of captain, according to Colonel Fred A. Saffoy, Commanding Officer, 124th Infantry Regiment.

Captain Hull attended the Altoona High School, Penn State and the University of Pittsburgh, and practiced medicine in Altoona, Penn., prior to his call to active duty early in 1941.

Eight enlisted men of the 124th Infantry have been promoted to higher grades.

First Sergeants Claude F. Cason, Fort White, Fla., and James H. Moser, Miami, Fla., have been advanced to master sergeant.

Corporals Sessal C. Levins, Lynn-Haven, Fla., and Will O. Brogeon, Millville, Fla., have added another stripe to their sleeves.

The others of the "Gator Regiment" who were promoted are: Pfc. Elwood E. Rich, Oneco, Fla.; Pfc. Irving L. Altman, New York, N. Y.; Pvt. Kyle C. Davis, Cincinnati, Ohio; and Pvt. Jack H. Andrews, Sheffield, Pa., to be corporals.

LAWSON FINANCE

The following promotions in the Detachment Finance Department, Lawson Field, were announced: To technician 4th grade—Technician 3rd Grade Richard B. Collins and Bernard Glasser.

To technician 5th grade—Private First Class Americo A. Soloperto.

Lt. Bruce Palmer Gets Double Bars

G. Bruce Palmer, Dahlonga, Ga., a member of the Army Air Forces at Lawson Field, has been promoted to the rank of Captain. Captain Palmer is Tech. Supply Officer and Assistant Operations

Officer of the 7th Observation Squadron in addition to being Air Force Observation School at Commanding Officer of Flight "C." Brooks Field, Texas.

A native of Dahlonga, Ga., before reporting to the Air Force for active duty he was a 2nd Lieutenant November 1, 1941. He is a graduate of Dahlonga High School and attended North Georgia College for several years. He also attended the Army Air Force Observation School at Brooks Field, Texas.

Uncle Sam Trains Rover To Help in War Work

FRONT ROYAL, Va.—War is proving now that you can teach an old dog new tricks.

Here in its new school for dogs, the Blue Ridge Mountains of Virginia, the Army is demonstrating daily that canines as old as five, middle age for a dog, learn new tricks with remarkable speed.

Dogs are being trained for the most part as messengers, airplane detectors and for sentry duty. Their keen sense of hearing enables them to sense approaching planes much more efficiently than men.

Former household pets, 4 and 5 years old, accustomed to serving only one master, learn to respond to certain orders, no matter who gives them.

Firmness, system and patience are the secret.

Experienced dog trainers are in charge, but men from the Coast Guard and Army learn to become dog trainers themselves.

Eventually some 125,000 dogs are to be mustered into service.

NO LAP DOGS

One of the first lessons all dogs must learn is outdoor sleeping. This is hard on animals accustomed to snoring on a bed, but they are comfortable after a few nights.

Their one daily meal comes after training, which makes the dog regard it as a reward for obedience and alertness.

In the four-week basic training course dogs and handlers drill two hours daily. Commands are given by a drillmaster, but the dog does not obey until his handler, who works him on a leash, speaks.

The dog rookie is taught first to comply with the command to units by dog soldiers—now used

I am one of the fellows who made the world safe for Democracy. I fought and I fought and I fought. . . But I had to go away. I was called in Class "A".

The next time I want to be in Class "B". . . Be here when they come back. I remember when I registered, I went up to the desk and the man in charge was my milkman. He said, "WHAT'S YOUR NAME?"

I said, "You know my name." "WHAT'S YOUR NAME?" he barked. So I told him—August Childs. He said, "Are you an alien?" I said, "No, I wasn't born in Brooklyn." He then asked, "Where were you born?" I said, "Pittsburgh." Then he said, "When did you see the first light of day?"

I said, "When we moved to Philadelphia." He asked me how old was I. . . so I told him, 23 the first of September. He said, "The first of September, you'll be in France and that will be the last of August."

The day I went to camp, I guess they didn't think I'd live long. The first fellow I saw wrote on my card, "Flying Corps." I went a little further and some fellow said, "Look what the wind blew in."

as extensively abroad as in the last war.

The Front Royal dog school is the first of several being established.

Dogs are recruited in the main by Dogs for Defense, Inc., an organization of breeders and dog handlers.

According to Harry I. Caesar, president of Dogs for Defense, Inc., more than 90 per cent of canines offered have shown themselves fit to be trained. The dogs are first tested for health, disposition and reaction to gun fire.

To join the Army a dog should stand not less than 18 inches at the shoulder and be from one to five years old. A wide variety of breeds is represented—German shepherds, St. Bernards, Newfoundlands, Great Danes, Grey Poodles, Doberman pinschers, collies, retrievers, French poodles. The Chow and the bull terrier do not make good soldiers.

BOTTLENECK NO. 1

...I KNOW, BUT I'VE BEEN WAITING 3 WEEKS!

2ND STR NOTES

By the PINE-BUR STAFF

One company in the Regiment now has three captains since the recent promotion of two of its tactical officers to that rank. It's the 21st, commanded by Capt. Dwight E. Oiler. The new captain is Frank M. Pittenger and Richard H. Evans. The latter by the way is the son of Dr. Silas K. Evans, president of Ripon college in Wisconsin, where he was quite a football ace.

Capt. Joshua V. Davidow has been named executive officer of the Second Regiment, while Capt. Paul T. Hiser of 24th Company has been named adjutant succeeding Capt. Davidow, Service Club No. 8 in the Harmony Church area has a new librarian in the person of Miss Theresa Atkinson of Atlanta. Miss Atkinson got a going-away blast from the end of the social column of the Atlanta Constitution which testified for her reputation as a librarian and as a well-known member of the Atlanta youngers set.

You can call Candidate John G. Fuller of 19th Company a "rough neck" and get away with it, for that was Fuller's official title in the old days. When he worked, it's a high paying job among oilmen. Over in the 4th Company we find Candidate Israel Lettes, who once held the Southern Conference Light Heavyweight boxing title, now while he attended Maryland University, where he also starred at football.

When Candidate George F. looked at me you'd think I had started the war. Our captain yelled, "FIRE . . . at WILL, but I don't know any of their names. I guess the fellows behind me thought I was Will, because in the excitement they shot me."

Then came the Day of Atonement, I mean the Victory Day. The Victory Day was really a Chase Day. The Kaiser ran so fast not even Sergeant York could catch him.

I thought we would never get back to New York. There were so many people on Fifth avenue I thought Brooklyn had won a double header. I went home and look one look at my family and thought I was looking at the League of Nations. Boy, the things that can happen when you are gone for few weeks. My youngest son looked at me and said, "Mom, here's that tramp we threw out last week." Then, I knew I was at home at last and we lived happy ever after.

Thousands of Colored Troops Processed Here

Reception Center Only One Of Kind In This Country

Fort Benning's Reception Center for colored selectees exclusively—the first and only one of its kind in the country—has processed many thousands of troops at this Post since its inception in January, 1941.

The expansion of the Reception Center has been phenomenal: the original center, housed in one building, now occupies 47 buildings and 232 hutments; the initial total of 25 soldiers processed in one day has increased many times; the first cadre of enlisted men who classified troops has grown from 38 to 378.

In the beginning, the Center occupied the Twenty-Fourth Infantry Recreation hall on Anderson street. But, so rapid has been its expansion to meet the needs of a fast-growing Army, that, today 22 months later the Reception Center occupies a new area with several score buildings and hutments.

When it was organized, the Center was set up as a temporary installation. However, in May, 1941, it was activated as a permanent unit. From January, 1941, to the date of activation the Center showed promise of efficiently handling the ever-increasing number of Selective Service men. In June, 1941, officers at the Center heralded the "Peak Day" when 538 inductees were processed in a single day. But Capt. Boyd Baggett, adjutant of the Center, recently characterized that record as a "drop in the bucket" compared with present schedules.

The Center was organized under Lt. Col. Frank Lockhead, Infantry, the first commanding officer. Colonel Lockhead was succeeded by Lt. Col. E. L. Hubbard as the commanding officer with Maj. Ulric N. James as the executive officer. Recently, however, upon the transfer of Colonel Hubbard, Major James was promoted to Lieutenant Colonel and assigned as commanding officer of the Reception Center.

In order to carry out efficiently the technical and varied process of preparing a trainee for army service, special attention has been given to the selection of qualified officers and enlisted personnel. The enlisted personnel working in the Center has been picked through a further selective process. They are the men whose training, educational background and army test scores gave promise of educational ability which was necessary in order to qualify for a clerical job at the Center.

The Reception Center is believed to have one of the best prepared staffs of any reception center in the country. A majority of the enlisted personnel are college men. Soldiers now serving as clerks hold ratings as sergeants, corporals, privates, and technicians.

Thousands of the young colored men who were selected to join the army's ranks have passed through the Reception Center. On Friday, June 8, 1941, exercises were held honoring the 10,000th Selective Service man to pass through the processing. But, of late, processing has been stepped up so rapidly in this Center as well as in all other Reception Centers in the country that dates of the succeeding quotas are now

Recreation Center For Colored Troops

Fort Benning's Colored troops have a large, comfortable Service Club for their social and entertainment center. Service Club, No. 4, shown above, has a library, a soda fountain, and a lounge in it for the use of the troops. (Photo by 161st Signal Photo Company.)

just a matter of record in the files as restricted data. The typical selectee is held at the Center but a few days for his proper classification tests, outfitting of clothing, and assignment of duty before he is sent on his way to a permanent assignment "somewhere in the United States."

Soldiers processed at the Reception Center come from all walks of life. They represent nearly every kind of occupation found in the country. Among them are well-known musicians, carpenters, sand blasters, cooks, bakers, lawyers, artists, clerks, and men of various other civilian occupations.

A Reception Center exists for the purpose of preparing the Army selectee for acceptance into the Army. In order to provide for this, the recruit passes through numerous "sections" of the Center where distinctive tasks are performed by trained clerks, in order to carry out the processing.

Here at Fort Benning's Reception Center, after induction, soldiers are checked, tested, classified, recorded, vaccinated, im-

munized, outfitted with clothing, and assigned. The record that is prepared for each soldier as he passes through the Center, goes with him as a guiding source of information wherever he is stationed. In order to analyze and record all information of value to the individual soldier, a speedy and accurate system has been developed to carry out efficiently the several processing functions.

Realizing the importance of providing for the young soldier's moral and mental welfare as well as for his physical well-being, there is provided in each of the several companies a Recreation Room in which he may relax, write letters, read the current magazines, and otherwise entertain himself. Movies, football games, entertainments also provide social recreation for the men.

REIDSVILLE, Ga.—By drafting L. P. Chestnut, State electrician, the Army cheated death. Chestnut, removed vital parts of an electric chair as a safety measure before induction. Meanwhile Buster Shaw, convicted murderer, was not executed pending repentance and preparation of the chair.

When Captured Button Your Lip

In this war as in every war one of the enemy's objectives is to capture prisoners from whom they would like to obtain valuable information.

Before going into action destroy all papers, letters, diaries or tags that might identify your organization.

In the event of capture you should remember that the International Code in regard to prisoners dictates that the only information a soldier has to volunteer is in regard to his name, rank and serial number.

Don't believe the enemy if he promises to drop a message from you to your unit stating that you are safe.

Don't address any letters in such a way that your organization's whereabouts are disclosed.

Remember directions and landmarks, so that in the event you escape, you will be able to tell what you have learned.

R. C. Biographer Pens Sketch of Pvt. Derricks

THE SOUTH—Time passes—the South—poor, proud and prolific—sifts itself yielding cotton, sorghum, livestock and families. It still yields all these but lately it has begun to turn out capable Negro teachers, businessmen, professional women and music writers. We at Fort Benning are proud of our talented colored soldiers.

Lieut. Colonel Ulric N. James, Commanding Officer, Reception Center, and Captain E. P. Langley, Special Service Officer, Reception Center, are proud of the many soldiers who make up the chorus, the quartette, and the orchestra. Turning in his swivel chair and looking directly into the eyes of the writer, Captain Langley said, "I have another man, a soldier named Private Derricks. I want you to meet him." The next morning I was introduced to Private Derricks. Private Derricks was a tall, lanky man weighing about 150 pounds. His eyes were sincere and his voice was clear and mellow. From my first observation, Private Derricks looked as if he had been trying hard to get accustomed to army life—trying in a private's way to be a good soldier.

He smiled, and said, "How do you do?" I was sure the four word phrase was lost in the bottom of his stomach; but when the words reached his vocal cords, the phrase was truly musical. In short—his speech was superb. For two months Private Derricks had experienced the life of a soldier and now he faced the duration. Army life is tough for a man 32 years old, but this man was practical, a soldier with ideas, and music writing ability. I am sure he can take it. As I sat listening America has called him to serve.

Major J. H. Cooper, director of Service Club, Number 4, pictured above, plans entertainment and social programs for Negro troops at Fort Benning. The thousands of colored troops at Benning have a well balanced social and recreational program.

Medical Detachment Here Doubles Size Since 1941

24th Anniversary At Benning Is Celebrated

On October 7, 1941, the Detachment, Medical Department, Station Hospital, commanded by Major John E. Joyner, celebrated its twenty-third anniversary. That this unit is one of the fastest growing organizations on the post is evidenced by the fact that since its anniversary, the personnel has been doubled already.

Taking care of so many patients, even for the enlarged force, is no "quack." The hours are long and the work is hard. For that reason, high ranking detachment officers have bent every effort to keep the morale of the men high, and these efforts have been completely successful.

To afford diversion for the men in off-hours, Detachment officers have promoted some of the best entertainment programs on the post. Sports events with all of the men participating have been presented, and for those who like to take their amusement inside, they have been provided day rooms where the men may read, play pool, play cards, or listen to the radio or victrola music. There are three of these day rooms, one of which is reserved

for colored troops, who make up almost one-third of the detachment's strength.

There has also been organized an orchestra and band for the Detachment which plays at many of the gatherings of Detachment personnel as well as on post radio programs and on USO broadcasts in Columbus.

The colored troops have a spiritual quartet which has also entertained during programs on the post and in Columbus.

WELL-ROUNDED PROGRAM

The athletic and recreational program is supervised by First Lt. W. C. Sommermeier and is planned and directed by Sgt. John P. Hamill. The program includes sports of all types and features frequent tournaments with each of the 12 barracks sending two teams to compete in each event. Each Friday night a program is presented in the arena in the barracks area. These programs consist of music by the orchestra, stunts, quiz programs, and boxing. Once a month outside talent is invited to perform before the Detachment personnel. Another feature of these programs is the showing of films of current happenings.

Another monthly treat planned for the men is a smoker during

Officers Quarters At Main Post

Typical of the many attractive homes for the families of officers at Fort Benning is the one pictured above. Many officers live on the Main Post with their families but, since their number has increased many fold recently, a large number of them are obliged to reside in Columbus and vicinity. (Photo by 1st Signal Photo Company.)

which the troops enjoy musical and boxing programs and refreshments.

DEFEATS ISSC

The Detachment boasts that it puts strong teams in the competitions on the post and in Columbus. Last season the Detachment basketball team defeated the ISSC championship team at basketball, being one of the only two teams able to perform this feat. The team was also runner-up in the Columbus City softball league, losing out in the play-off after finishing the season in a tie with a strong city team.

The Detachment's Staff Sgt. James K. Guinn led the post baseball team with the highest batting average, and St. Sgt. Francis Webster was high scorer in the Bibb City basketball tournament last season with more than 60 points in three games. The team was runner-up in this tournament.

O. C. GRADES

There are other accomplishments by the Detachment of which it is rightly proud. Twenty-five men have gone out of the organization to attend officer candidate school. Only two failed to make the grade. In the War Bond drive contest this fall, the Detachment was first of all units in the number of bonds sold. It is also proud of its monthly publication, "Medicor," which ranks high among publications of its nature.

PROMOTED

Three promotions of enlisted men in the Casual Battalion of the Infantry School have been announced by their commanding officer, Lt. Col. M. C. Higgins. They are Larry O. Curry of Shreveport, La., promoted to staff sergeant; Solomon Silverbielt of Roselle, N. J., and Edward Cruz of Banes, Oriente, Cuba, promoted to technician fifth grade.

30,000 Served By Army Clinic In Columbus

Families Of Officers, Enlisted Men Treated In Doctor's Building

Serving more than 30,000 persons a year is a record of which any part of the Army's Medical Department can be proud. And that is the record that Lt. Col. George H. Clark points to when someone asks about the duties of the Army medical offices in the Doctors' Building in downtown Columbus.

The job of this office is to take care of the medical needs of the families that are dependent upon the men in the service and the officers for an operation or the setting of a compound fracture. The simplest ailment, such as "how can one take off weight?" or the most complicated case of pneumonia, is just another one on the books.

When the clinic first opened in the latter part of January, 1941, the first record of a full year showed the handling of 1,445 cases in all. During the month of September of this year 2,777 cases were listed on the books, showing an increase of almost 100 per cent.

Colonel Clark's day staff consists of three officers, seven enlisted men, two Army nurses, and one civilian receptionist. The night staff is made up of one officer and two enlisted men. Except for the enlisted men, all officers are on temporary duty. The day doctors are on duty at the clinic for a month at a time. The makeup of the office shows that one officer is on call for cases that must be taken care of in the home, while the colonel and the other two are at the clinic.

On the night shift, the officer on duty is constantly on call for emergencies and for handling of cases that the military police may bring in. The enlisted personnel consists of one driver and one Charge-of-quarters.

Colonel Clark spent more than 20 years in the National Guard as a member of the 108th Infantry in the famous 27th Division of New York. Two years ago the colonel became a member of the army of the United States at Fort McClellan when his unit was inducted into federal service.

Closer examination of the personnel shows that First Lt. Alice Johnson, army nurse corps, has been in the service for more than 24 years. She served in France in the last war and since then has not only served a great many of the forts in the States, but has been on duty in Hawaii and the Philippines. Lieutenant Johnson is said to be the favorite of the children. Second Lt. Martha Rifkin, A. N. C., is the other nurse on day duty.

Of the enlisted men, there are Sgt. James E. Lee, chief of the enlisted section; Sgt. Arnold P. Satterfield, chief clerk; Sgt. Xavier J. Lenoir, pharmacist; Tech 4th Grade Odie E. Simmons, laboratory technician; Cpl. William J. Pippin, driver.

Mrs. Mabel Farrar, the civilian receptionist, now has a son in the armed forces, in fact, he is Sgt. Jesse C. Farrar, somewhere in Australia.

Scrap Campaign Nets Many Tons Of Metal At Post

Besides staging a metal scrap drive at its own, Fort Benning has supplied trucks and men for scrap drives in Columbus, Phenix City and Cusseta to bring millions of pounds of precious steel, iron, copper, brass and aluminum, as well as rubber, to the nation's much-needed scrap heaps, according to a report by Major J. R. Johnson, post inspector, in charge of the campaign at the Fort.

More than 7,000,000 pounds of metal has been collected at the Fort alone, and an estimated 1,000 tons has been collected by the Army trucks in the campaigns in the three cities as well, Maj. Johnson reported.

Besides the metal and other material contributed to the scrap drive, nearly half a million pounds of metal have been salvaged and returned to active use on the Fort. This includes chains, hammers, chisels and many other tools and equipment.

Salvage work at the Fort also is going on, on a regular routine basis in order to conserve all sorts of materials from food to clothing and steel. Leather from worn out shoes and material from worn out clothing is being salvaged and turned into industrial or other channels. Rubber is being turned into the rubber scrap-heap. Iron and steel is being re-used or, when objects are completely worn out, turned into scrap.

One of the largest sources of scrap metal at the Fort is the "iron mine," the dump in which old metal on the post has been thrown away for 20 years. There, men under Lt. Col. C. A. Will, are finding everything from horse-shoes and nails to old motors.

More than 150 tons have been salvaged from the old scrap heap, and another 250 tons is estimated buried there, Col. Will said.

"Estimates show that steel mills consume scrap metal at the rate of more than two million tons a month," Maj. Johnson said. "The government is endeavoring to collect 17,000,000 tons of scrap to see steel mills through the winter months and we must all collect every scrap of metal possible."

"The problem now is to get at the metal in homes, in forgotten dumps, in all the places where scrap has been thrown away and probably forgotten through the years. If we can locate that and estimate its weight and the difficulties of hauling it away, we can more easily tell about the metal in plain sight in our cities and on military reservations. There we can know how much to plan on."

The campaign at Ft. Benning is just part of that now going on throughout the entire nation.

The length of axis is usually determined by the distance the weaver can reach upwards with his hand.

Army Author's Contest Opens

\$1,000 Bond Offered To Writer Of Best Book

An Army author's contest for officers, enlisted men or women serving with the army is announced by Doubleday, Doran and Co. of New York. Soldier authors are invited to submit book manuscripts, fiction or non-fiction, to compete for a \$1,000 series-Z War Bond.

The bond will be an outright prize, and in addition the successful writer will receive the regular royalties from the sale of the book. The publishers also reserve the right to publish other manuscripts of sufficient merit which are submitted, and the authors will receive royalties.

The subjects treated may be on any subject and need not be concerned with the war. At least 10,000 words of completed manuscript must be submitted plus a synopsis of the remainder.

The editors of the publishing company will be the sole judges and their decision will be final. In the event that no manuscript merits the award, the right is reserved to award no prize.

All entries must be in the judges' hands by Sept. 30, 1943. Typewritten manuscripts are preferred, but legible entries in longhand will be given equal consideration. The manuscripts are to be sent to Service Contest Editor, Doubleday, Doran and Co., Inc., 14 West 49th Street, New York. Men on overseas duty may send their manuscripts to Winifred Nerney, Doubleday, Doran and Co., 91 Great Russell St., London, W. C. 1; or to Augustus Robertson, Sydney, Australia.

OFFICERS ASSIGNED

Three second lieutenants, recent graduates of the Engineering Officer Candidate School at Fort Belvoir, Va., have been assigned to the 58th Engineer Battalion, 10th

Champion, Lt. McIntyre.

180-Day Wonder Story Of Lawson Field Growth

Construction Work Is Never Ending

The home of the Army's famous Infantry School and the almost as famous experimental 501st Parachute Battalion suddenly came to life late in 1940 with the addition of a GHQ Air Force Unit, two additional C & D Observation Squadrons, the 62nd Air Base Group, and today is rapidly growing to gigantic proportions under the command of Major John E. Albert.

So rapid has been the growth in Lawson Field since the former days of "Flight B," as the unit formerly stationed at Lawson Field was called that correspondence is still being addressed to "C. O. Flight B."

It has always been the custom of the War Department, when naming a new flying field or rechristening an old field, to select the name of one of its pioneer flying officers who had lost his life in the line of duty, for whom with propriety a field could be named. Lawson Field is named in honor of the late Captain William E. Lawson.

117th Infantry Proud Of Distinguished War Record

Regiment In Drive Which Smashed the Hindenburg Line

A long and honored history of gallant action is represented by the famous 117th Infantry, the "Break Through" regiment now located at Fort Jackson since being called to active duty two years ago. It is commanded by Col. Grant A. Schlieker, veteran Army officer who is a specialist in military research and development, formerly being attached to the staff of the Chief of Infantry, Washington, D. C.

The regimental crest is blue for infantry, with the broken chevron representing the "Break Through" of the Hindenburg Line during the World War I, while the three mullets symbolize the organization's three battle honors.

Originally organized of volunteers in Tennessee, the regiment became the 34th Tennessee Volunteers in 1847, and it was mustered into service at that time for the Mexican War campaign. The regiment continued in existence during the Spanish American war, serving under command of Col. J. P. Fyffe. The regiment then remained as the Tennessee Militia and was sent to the Mexican Border in 1916, then into Federal Service in World War I as the Third Tennessee Infantry.

IN FAMOUS ATTACK On Sept. 12, 1917, it joined the 117th Division, 30th Division, and went overseas, remaining until March 27, 1919. The regiment is credited with a large share of the glory in smashing the Hindenburg Line and also performed with valor and distinction at Ypres-Lys, the Somme Offensive and the Canal Sector.

On returning to this country after the war, the regiment was disbanded at Fort Oglethorpe, April 17, 1919. Its members then joined with the Fourth Tennessee Infantry, National Guard, and remained there until 1924, when it was reorganized as the 117th Tennessee National Guard.

Under War Department Orders, the 117th Infantry is entitled to a streamer in the colors of the Victory ribbon, embroidered for Flanders, Ypres-Lys and the Somme Offensives.

Not only in war but in peace, the regiment saw important service since it was called out in 1937 in connection with relief work during the Ohio-Mississippi River flood.

The regimental staff consists of Lt. Col. Harry M. Arthur, Unit Commander; Capt. Edgar H. Reese, 1st Lt. and Mrs. Richard J. Wolf, 2nd Lt. and Mrs. Kenneth T. Laing, 3rd Lt. and Mrs. Service Co., 11th Armored Regt., 10th Armored Division.

Pvt. and Mrs. Gerald B. Wolting, 4th Lt. and Mrs. Warren B. Haskell, 5th Lt. and Mrs. James B. Croft, 6th Lt. and Mrs. Reception Center.

Pvt. and Mrs. James B. Bishop, 7th Lt. and Mrs. Edward P. Valear, 8th Lt. and Mrs. Turner, 9th Lt. and Mrs. Paul L. Turner, 10th Lt. and Mrs. Operations Office, 11th Armored Division.

1st Lt. and Mrs. William H. Bernstein, 12th Lt. and Mrs. Student Training Regt. Dispensary, 13th Lt. and Mrs. Joseph F. Zero, 14th Lt. and Mrs. 863rd Ordnance.

ter R. Lawson, a native Georgian, an Army Air Corps hero of World War I, who was killed in an airplane accident at McCook Field, Ohio, in April, 1923. After careful study of historical data available, the airdrome at Fort Benning was christened Lawson Field in memory of him.

TRANSFER IN 1932 In 1932 a group of Air Corps officers and enlisted men from the 11th Observation Squadron, Fort Riley, Kans., was transferred to Lawson Field to be used by the Infantry School for tactical and allied problems. It is interesting to note, that at the time the 16th Observation Squadron was at Fort Riley it was under the command of then, Captain Warner B. Gates, now a colonel, who prior to the arrival of Major John E. Albert on September 12, 1942, was commanding officer of Lawson Field.

"Flight B" 16th Observation Squadron, carried on the operations of Lawson Field until the fall of 1940, when the 15th Bombardment Squadron (L) GHQ A. F., was transferred from Barksdale Field, La. In November of

the same year this group was augmented by the 16th Observation Squadron from Fort Bragg, N. C., which was commanded by Captain Fred S. Stocks and the 97th Observation Squadron from Mitchell Field, N. Y., under the command of Captain Philo G. Meisenholder. In December, 1940, Captain Stocks was transferred to command of the 62nd Air Base Group (Sp) a newly activated unit.

CONSTRUCTION ENORMOUS During this period of personnel organization the construction of service buildings and barracks seems never ending. Roads have been laid out and surfaced and hangars and parking aprons have been completed. A million dollar program of expansion has been completed adding to the field a group of thirty-five buildings both barracks and administration buildings, a Radio Control Tower, Radio Range, A. A. C. S. Station, new runways, underground gasoline servicing tanks together with improved night lighting facilities. This has made Lawson Field one of the largest, finest and best equipped air fields in the southeast. Even so a further program of enlargement of the field's facilities is now underway so that Lawson Field will be able to assume its proper share in the training of upright young men who want to and will "Keep 'Em Flying."

in 1925 with the 65th Infantry in Puerto Rico, then returned to the Tank School at Ft. Meade, Md., where he stayed as an instructor until 1929. From there Colonel Schlieker went to the French Tank School as a student in the advanced course.

In 1933 he took command of H company, 29th Infantry, at Fort Benning, serving until May, 1935 when he was sent to the University of California at Berkeley, Cal., for ROTC duty. In September, 1936 Colonel Schlieker resumed his military studies at the Command and General Staff School, Leavenworth, Kansas, then in 1937 became the executive officer of the 3rd Infantry Brigade, 2nd Division, serving until 1938 when he entered the Army War College.

From June, 1939 until June, 1940 he served as Infantry liaison officer at Aberdeen Proving Ground, Md., the Chief of Infantry's representative with the Ordnance Dept.

Until June, 1940 when the Chief of Infantry office was disbanded under Army War College reorganization, Colonel Schlieker was chief of its equipment and development branch. He later became Supply Officer for nearly a quarter of a century, Col. Schlieker was active in the Replacement and School Command, Birmingham, Ala., holding that post until Aug. 12 when he was assigned command in offices of the 117th Infantry.

Head of the organization is Col. Walter C. Royals, M. C., an army officer for nearly a quarter of a century. Colonel Royals is a graduate of Tulane University, class of 1917.

Early in the 24th General Hospital's activation, the staff members were gathered together by Lt. Col. I. M. Gage, M. C., associate professor of surgery at Tulane University. Lt. Col. Gage is at present chief of surgical service for the hospital. The unit's deputy commander is Captain R. J. Manor, M. A. C.

Lt. Col. R. P. Turner, M. C., also with the hospital, formerly professor of internal medicine at Tulane. Executive Officer, Major J. B. McLeister, was formerly a physician at Birmingham, Ala.

The 24th General Hospital's mess officer needs no lengthy introduction to "Bayonet" readers. For he is 2nd Lt. Clifford E. Clinton, a Californian, who operated the "Golden Rule" cafeterias throughout California and who has deservedly received worldwide acclaim for his work in civilian life.

Captain Thomas Reed, M. A. C., is the 24th's adjutant, and has been in the service for 24 years. In a statement Captain Reed observed that "The organization has completed an intensive period of training and is anxious to enter into active operations. We know full well that the present 24th General Hospital will live up to the excellent record made by the 24th Base Hospital during World War I."

Most of the enlisted men from all walks of life and all parts of the United States join together under a common bond to make the 24th General Hospital one of the finest medical units of its kind.

Laboratory technicians, pharmacy students, opticians and even ministers make up the nucleus of the men who are serving with this non-combat unit.

Opera Singer Here As Officer Candidate Candidate Robert J. Gay, Jr., who sang for four years with the Philadelphia Opera Company is now an officer candidate at the Infantry Officer School here at Fort Benning.

The big blond baritone, better known to Philadelphia for his roles of Valentine in Faust, Figaro in the Marriage of Figaro and Sharpless in Madama Butterfly, is now playing tunes on the Army's Grand and machine guns. He just recently qualified as a sharpshooter with the rifle and was in the Infantry with the machine gun. During his four years in Philadelphia, Gay was soloist at the Second Presbyterian Church.

Capt. Lionel C. Ball of Buffalo, N. Y., has recently been promoted to the rank of Major at the Infantry School here at Fort Benning.

Major Ball was called to active duty Oct. 16, 1940. He was assigned to the Third Student Regiment as commander of the Fifth Company April 4, 1942 and now is with the Service Battalion of the Third Regiment.

terian church. His wife, Frances Greer is a soprano with the Metropolitan Opera Company of New York.

STYLED FOR FREEDOM Eyebrows - Eyeglasses - SHANDS Beauty Shoppe 1032 17th St. Dial 5-2525

AN ARMY WIFE Shops In Columbus by EVE

Now that the stores of Columbus have officially opened the Christmas season maybe you'll believe me when I say it's really time to do something about the holiday shopping. I've already noticed shortages caused by canny shoppers who made up their minds to shop while the counters and shelves are full. Limitations of production will be the yard stick of our purchases. When the stock now on hand is sold, there will be no more. Just a friendly tip from the gal who looks over the town for you.

Mothers who are unable to purchase underthings and various necessary garments for the army wife will find the information I secured at the KIDKID SHOPPE at 1144 Broadway. There is a definite shortage of children's clothing. In spite of the fact there are many adorable and practical items stocked for Christmas gifts, the Kid Kid Shoppe doesn't expect to have much choice left by December 1st. A word to the wise. A tiny miss would adore the soft-as-a-muffin and mittens of white or beige fur. Bright embroidered puffs are important parts of the wardrobe when one is small and eager to ape mother's style. Pink rayon pajamas with blue frogs are adorably elegant. For the young lad, a tiny replica of Daddy's field jacket with slacks to match. Mother like these too, because they're water repellent. Mighty grand gifts to find under the tree on Christmas.

Old files of annuals and information of Fort Benning days show that MILLER-TAYLOR SHOE STORE supported our activities then as they do today. While the same shoe store was carried then, the shop has grown with the post. Right now alligator shoes continue to rank highest in the shoe wardrobe. The I. Miller alligator shoe for dressy street wear is distinctive with a turn over tongue and high leather Cuban heel. There are alligator baby lizard oxfords of soft brown small grained leather. The open toe oxford for those who remain faithful to that perennial favorite. If the genuine alligator is too high for your purse, you might look at the beautiful calf alligator. Alligator purses to match your shoes are almost as popular as the shoes. Look at the matching bags when you're buying shoes. There's a new stock of Loafers for dainty knock-about wear.

KAYSER LILIENTHAL INC. has always had a shopping service a bit more personal than one would expect. This year they are trying harder than ever to help those who find shopping difficult. They suggest that men who are worried about gifts for the feminine members of their family make a list of names, colors, gift preference, approximate size and price range and turn it over to their experienced sales staff. The gift will not only be beautifully wrapped for mailing but Kayser-Lilienthal will mail them free of charge. No small item for busy men these days. A visit to the store will convince the most shopping-shy man he'll find beautiful, practical and luxury gifts for his favorite woman in his life. This personal Christmas service is not limited to the men. Women will be helped with equal friendly and courteous service. The Postmaster General urges early mailing. And that doesn't mean the 15th of December either.

Someone has a use for things you no longer want. In this day of shortages and extraordinary demands, unneeded accumulations are not only selfish, but unpatriotic. THWEATT AND SON'S, 1242 Broadway, are anxious to contact any army family that has household furnishings they no longer have any use for. You'll find prices for second-hand furniture is mighty generous for the one who is selling. In case you don't know, this furniture shop specializes in repairing and refinishing furniture. Repairs and refinishing of our precious household bits is a necessary and persistent need. Antique seekers can pick up some beautiful bits in this store. They've just received some lovely hobnail cranberry glass.

Have you got a husband that must be pushed into buying sorely needed uniforms? Nothing unusual about that, for many men detest any form of shopping other than meandering through the dime stores. They are universally the same in their tactlessness when they see tricky gadgets for a few cents. It often becomes your duty to see to the purchase of uniforms. If you must take these responsibilities on your shoulders you'd best get acquainted with SAKS FIFTH AVENUE MILITARY SHOP on Cusseta road. They have those hard-to-get logical blouses and shirts, the form fitting cut of the shirt will be especially satisfying to him. If you brought home one of the beautiful tailored blouses with a matching belt he'd have to take it in for a fitting and you would wait for him to come home with the old Sam Brown belt.

It's A Pleasure

to extend our congratulations to the entire personnel of Ft. Benning. We are proud of our many friends at Ft. Benning and invite you to our store where a cordial welcome always awaits you.

Fastidious Fashions for Discriminating Women

ALLIGATORS, EIGHT-BALLS AND HORSEPLAY ENHANCE MORALE OF 24TH INFANTRY'S SOLDIERS

Campus Comes To Camp As 'Gators Go 'Screw-Ball'

When somebody in the 'Gator outfit "roofs off" (arms for 'four' and 'four'), his unit gets behind the "eight-ball." Out come the wags, towels, and the little globe is officially delivered with pomp and ceremony.

The 'Gators may be a little confused, but they have a general idea where they want to go: Berlin, Tokyo, or Kome.

The famous 'Gator wishing-well' is to the 124th Infantry what the statue of Tecumseh is to Annapolis. Throw in a penny, close your eyes, and wish for all you're worth. Reddy Lamar is on the list as the 'Gators hitch their wagon to a star.

Here is Adam Lazonga II, the usurper to the throne of Lazonga I who went AWOL for a while. One alligator hide meets pig-skin as the mascot goes to a grid game.

Floridians Show What Makes Good Morale Better

BY SGT. H. E. WHITTEMORE

Ask a sun-tanned Florida infantryman from Fort Benning's 124th Infantry Regiment how his morale is if you want to get a good laugh.

He'll probably give you a big grin, point to the regiment's 225-pound alligator mascot with one hand and the military record of his regiment with the other.

Then he'll ask you how your morale is and probably suggest that maybe you'd like to "join up" with the 124th.

It's that kind of a regiment. For plain, downright good soldiering, the 124th has a record comparable with the best organization in the Army today. And on a par with any in the Army today. And for plain, downright "screwiness," the 124th boys are charter members of the "Screwball Club of America."

And morale officers, wise in the ways of soldiers, will point to the close association between good soldiers and good times and tell you that half the battle is already won.

It's not a case of combining business with pleasure though. On Army time, the regiment's all-business, the regiment's all-business, the regiment's all-business. And don't kid yourself that it's all a lot of nonsense either. It serves as an emotional "safety-valve" for men far from home and engaged in work that at its best is often monotonous and 124th officers are convinced the good-natured horseplay has plenty to do with the outstanding military record of the regiment.

As an example. Everyone has heard of the statue of Tecumseh at Annapolis and how the Naval cadets throw pennies and a left-handed salute at the old statue. Well, the 124th has a stone "Wishing Well" and G. I. built at that, in which a soldier has only to toss a penny to have a wish granted—or at least that's what the 124th says.

PENNIES AND SLUGS
There must be something to it though, because so far they've taken 800 pennies, 35 slugs and a wedding ring from the bottom of the well. Worshipping infantrymen, wanting everything from a fifteen-day furlough to a lighthouse blonde, kneel solemnly in front of the well, toss in a penny and wish fervently. As a payoff, 800 pennies have been used to buy goldfish for the well.

"Behind the eight-ball" is a favorite American expression for being in the "doghouse." So the 124th has invented an "Eight-Ball Ceremony" wherein the individual, company or squad that has committed a "could have been prevented with careful planning" error gets presented a large, black eight-ball. And they just aren't given the eight-ball quietly and "on the side." Oh, No! They call out the regimental band, they have a parade down the company streets complete with all the "trimmings" including the "wailing squad" outfitted with towels to "dry" their eyes.

And if you think the boys don't take it seriously, you should hear the groans and gnashing of teeth from the "doghouse" when somebody pulls a boner and his outfit is presented the eight-ball. And they work like Trojans to clear their record and find some other, unlucky recipient for the dubious "honor."

Fort Benning is the home of the parachute troops so a few weeks ago some of the Floridians decided it was about time they were represented in the paratroopers. Any regiment could have sent a man or two to the parachute infantry, but not the 124th. They looked around carefully, selected a likely looking prospect and trained him for parachuting right in their own area. "Him" was an unsuspicious little, black dog named, appropriately, "Blackout," who caught on to parachuting quickly—in fact so quickly he soon began to bark when he wanted to jump. The 124th's Medical Detachment fashioned a parachute from an old table-cloth, tossed "Blackout" of the roof into the waiting arms of his master a couple of times and announced the "pup" as a qualified jumper.

"BLACKOUT" BALKS
It worked swell until they dramatized "Blackout" and his achievements over the air and at the crucial moment, the pup got temperamental and decided that it wasn't his night to jump.

The 124th goes in for unique road signs too. One outlandish "road-directions" sign stands in the middle of the regimental area and gives the approximate distance to nearly two score places including Berlin, Rome and—of all places—Hell. During one of their daily infantry demonstrations they decided to bring their demonstration area up to the times. Now the road they take to the area has been dubbed "Burma Road No. 2; Rangoon Approach" and a neat sign attests to this fact.

BURMA ROAD NO. 2
An interesting manifestation of the American soldier's power of initiative is embodied in the 124th Infantry's mile and a half "Burma Road No. 2"—an overland trail constructed by personnel of the Headquarters Company, 1st Battalion, 124th Infantry. The commander of the 1st Battalion, Lt. Col. Henry W. McMillan, Jr., goes the credit for both the unusual name of the highway, and its conception.

From its "Rangoon" entrance at the south the eight-foot road winds northward over hills, through swamps and ravines until

The "screw-ball" 'Gators even have their Burma Road II, name sake for the famous Oriental trail. The 14th went to a lot of trouble to construct it. Who knows, maybe it'll pay rich dividends some day.

It finally emerges at the "Chungking" bridge spanning "Salween Creek." At the northern end of the bridge is the Chungking Approach which faces Hammond Field.

The route of the miniature Burma Road, like its famous contemporary extends through an ever-changing terrain of wild, natural beauty. Portions of the trail cut alongside the red clay hilly sections afford a hardpacked surface to the traveler. For quite a distance the road outlines the contours of rolling lands as it pursues its way among the thickly wooded areas of Georgia Pine.

At the halfway point, however, the character of Burma Road No. 2 changes abruptly, dropping swiftly to the marshes and quagmires of "Mekong Creek." There the sturdy logs and thick planks of the causeway scarce give stable footing to the heavily laden troops marching over it, although at times the ubiquitous "Jeep" has not found passage difficult.

After the marsh is passed the highway rises again to the hills and journeys through a leafy cinder, pitted by rifle trenches and forgotten field fortifications. Finally Burma Road comes to what is the most scenic section of the thoroughfare—the bridge over Salween Creek.

This bridge, substantially constructed of pine logs from eight

THE DINE-A-MITE

extends its heartiest congratulations to Fort Benning and our Armed Forces.

Cusseta Road Columbus, Ga.

was discussed over a national radio network, officials wired to Fort Dix, N. J. on a rumor an alligator was found there—but no Adam. To sooth their aching heart, one of the alligator farms in Florida sent the ponderous "Adam, the II" to the regiment, but only three weeks after the big boy's arrival, little Adam poked his mud-stained snout over the edge of a ditch one frosty morning and headed for his old hangout.

There, however, he was given the cold shoulder, slipped into "confinement" under guard and made to take second place to his complacent substitute, "Adam, the I." Both I and II went to the 124th's football games last week and this week and Adam II even wore a football helmet and jersey—much to his disgust.

So one day the boys decided they needed a guest house for visiting relatives and friends of the soldiers. There was no wood, no labor available because of priorities and the war effort. That

OFFICERS' UNIFORMS

Military leadership demands that an officer present a smart and soldierly appearance at all times. That this can be combined with perfect ease and comfort is a tribute to the methods used in tailoring the Saks Fifth Avenue uniforms.

- Pink trousers 16.50 to 22.00
- OD Trousers 16.50 to 22.00
- Army blouses 45.00
- Officers' trench coats 21.50 to 35.00
- Officers' overcoats 65.00

Uniform insignia, extra

Also a complete collection of caps, shirts, ties, shoes and accessories.

CONGRATULATIONS, FORT BENNING, ON YOUR 24th ANNIVERSARY

Communications Section, T.S., Sets Example for Other Schools

Courses for Officers, Enlisted Men Here Adopted by Army

The specialized Communication Section of the Infantry School at Fort Benning offers two courses, the Enlisted Radio Operators Course and the Officers' Communication Course. The former has for its mission the development of qualified operators for all types of radio sets used within the infantry, the standardization of operational procedure, and the training of radio instructors. The officers' course is designed to produce qualified communications officers for infantry units, and qualified instructors in signal communications.

The physical set up for the Communications Section is very elaborate, and their equipment is the most modern obtainable. Housed in a large group of new wooden buildings on the main post, classes are conducted in well-lighted lecture and work rooms. The new code room, a model of good planning, is a source of amazement and admiration to all visitors. The methods of instruction developed by the Communications Section have been considered so good that they have been adopted by the War Department as standard for all communications schools throughout our ground forces. Even the Signal Corps, the branch which specializes in communications, has adopted the Communications School's method of teaching code. The technique used is rather complicated and until proved feasible here, it was deemed impossible by the other branches of the service. It consists largely of teaching from phonograph recordings made in this code room. The man cutting the record sends a letter or number with a code key, and then gives the phonetic name for the character and an oral explanation. Thus the students hearing the records played get the code sound of the character and a spoken explanation at the same time. Instructors from the section have been called to Washington to cut such records for the Library of Congress.

INDIVIDUAL WORKROOMS

The code room is set up with rows of tables at which the students sit. By means of small partitions the tables are divided into individual booths, each equipped with a set of ear phones. Through these phones the students receive code sent from the phonograph records, from code tapes, or tapped out on a key by one of the instructors. By means of an intricate control panel containing hundreds of electric switches, it is possible to send different code messages and different speeds to each set of ear phones. When the student hears a message, he must master the one he was doing.

Both the communications courses taught here are twelve weeks in length. The officers' course is widely in requirement, scope, and content. The Enlisted Radio Operators' Course places greatest stress on code first, and then on the minimum requirement for graduation. Many of the operators reach many more words before they complete the course. The students in the Enlisted Radio Operator's course are enlisted men selected in the various infantry regiments because of a high code aptitude. They are sent to Fort Benning on detached service from their permanent units, and they return to those units after completing the course. The Officers' Communications course is made up of commissioned officers who have been selected by the War Department, according to Washington authorities.

An increase in the present allowance from \$150 to \$250 has been asked by the War Department. It is understood that the Bureau of the Budget has not yet approved such a request, so that Congressional action on the phase of the proposed bill is in doubt. The Budget Bureau, however, has approved a revision of the present complicated law, which would extend the uniform allowance to warrant officers and to National Guard Officers.

Two bills probably will be sent to the Congress: one to extend the clothing money allowances to National Guard officers below the rank of major, and the second a War Department proposal to rewrite the present uniform allowance law.

CERTAIN RESTRICTIONS

The present law applies primarily to officers below grade of major, ordered to and accepted for active duty in excess of three months. Except for certain classes of Reserve officers, the bill covers only those officers commissioned on and after Sept. 26, 1941, and it is believed that the new draft will remove the limiting date and will permit any officer below the rank of major, regardless of when commissioned, to draw the allowance when he reports for duty.

Warrant officers also will benefit from the proposed bill and will receive the allowance when called to duty. However, the warrant officers in the fourth pay period will be prohibited from receiving the allowance, just as majors are.

RADIO PROCEDURE

During the next three weeks, classes in radio procedure are added to the radio sets study and the code practice each day. Then in the eighth week four subjects are taught.

Each day are presented, with wire communication being added to the other three. Radio sets and radio procedure are dropped from the schedule in the ninth week, and tactical information is added to make a three subject a day program of radio wire and code practice. The last three weeks of the course are spent on code practice and the operation of radios in actual field nets.

The students in the Officers' Communication Course are given code practice every day for approximately eight weeks, during which time they also receive instruction in wire communications, map reading, cryptography, message center procedure, radio sets, radio procedure, and field nets. During the first five weeks much time is spent on wire communications. Under this heading, the officer students handle telephones, operate switchboards, climb poles, lay wire, and splice breaks. They do everything that the enlisted men under them will be called upon to do when they get out in field units as communications officers.

Greatest stress in the officers' course is placed on tactical communication. The students are placed in a communications platoon in regimental attack or defense situations, the selection of command posts, and the laying of wire lines to supporting and subordinate units, and the assignment of communication posts. Several hours of the course are devoted to map reading and aerial photograph reading, and is included in all tactical exercises. The School encourages these officer students to use their own initiative in solving all problems and will accept any plausible solution as correct.

OTHER INSTRUCTION

Eight hours of the course are spent in automotive instruction. This covers all types of infantry motor vehicles and the proper method of loading them. It includes the selection and use of drivers. Lectures are given on field expedients with motor vehicles, and the maintenance and inspection of those vehicles. During the actual field net training, the students actually operate radios over an extended area. Ground to air communication is maintained with some of the students riding in an airplane and communicating with other students on the ground. A few hours are spent on visual and sound signalling, including panels, pyrotechnic signals, and search lamps.

The provided message as a means of communication is discussed. Such devices as whistles, sirens, horns, and rattles are employed. All students in both courses under the Communications Section get the best possible training in communications. When they graduate from this school, they return to their units as expert enlisted operator or radio officers as first class communications officers.

Bill Requests \$100 More For Uniforms

Warrant Officers National Guard Are Included

A bill to increase the allowance for uniforms for Army officers is expected to be asked of Congress soon by the War Department, according to Washington authorities.

An increase in the present allowance from \$150 to \$250 has been asked by the War Department. It is understood that the Bureau of the Budget has not yet approved such a request, so that Congressional action on the phase of the proposed bill is in doubt. The Budget Bureau, however, has approved a revision of the present complicated law, which would extend the uniform allowance to warrant officers and to National Guard Officers.

Two bills probably will be sent to the Congress: one to extend the clothing money allowances to National Guard officers below the rank of major, and the second a War Department proposal to rewrite the present uniform allowance law.

CERTAIN RESTRICTIONS

The present law applies primarily to officers below grade of major, ordered to and accepted for active duty in excess of three months. Except for certain classes of Reserve officers, the bill covers only those officers commissioned on and after Sept. 26, 1941, and it is believed that the new draft will remove the limiting date and will permit any officer below the rank of major, regardless of when commissioned, to draw the allowance when he reports for duty.

Warrant officers also will benefit from the proposed bill and will receive the allowance when called to duty. However, the warrant officers in the fourth pay period will be prohibited from receiving the allowance, just as majors are.

Fathers, Sons (Two Pair) Are Inducted Here

Four Colored Men Now Are Privates At Ft. Benning

It was father and son day with a double emphasis when two sets of colored fathers and sons were sworn in at the induction center this week at Fort Benning, and now both sets are beginning their army training together.

One of the father and son groups comes from Birmingham, Ala. They are Lee T. Watts, Sr., and Lee T. Watts, Jr., both of 1945 Twenty-first avenue, Birmingham, Ala.

The elder Watts, who was born Nov. 22, 1899, has been a coal miner for 22 years, of which 20 have been spent with the Republic Steel Corp. in Birmingham. The younger Watts, born September 25, 1921, is a school principal at Junior High School, Livingston, Ala.

The other set is George Palmer, Sayertown, Ala., another coal miner, who was born March 21, 1900, and his son, Tommy, born June 25, 1921, who has been working for the Woodward Iron Co., Woodward, Ala.

The four men were sworn in by Lt. William F. Ryles, induction station officer.

Garrison Library

By FRANCES CHANDLER

This Armistice Day makes us remember that the last war did not make the world safe for democracy, but through books we can keep alive the ideals which made democracy live again.

Elmer Davis recently wrote the following: "One of the first acts of the Japanese in the Philippines was to destroy the American library. The policy of the Nazis and the Fascists toward libraries, librarians, writers of books, and readers of books has long been a family matter."

The following books which are available in the Garrison Library should be on your must list for worthwhile reading: Brown, Cecil. Suez to Singapore. Random House, 1942. Carr, E. H. Conditions of the Peace, 1919. The Japanese Enemy: His Power and His Vulnerability. Knopf, 1942. Carr, E. H. Conditions of the Peace, 1919. Churchill, Winston. Blood, Sweat, and Tears. Putnam, 1941. Kernan, W. F. Defense Will Not Win the War. Little, 1942. Kirtley, Alexander. Victory in the Pacific: How We Must Defeat Japan. Day, 1942. Michie, A. A. Retreat to Victory. Alliant, 1942. Shirer, W. L. Berlin Diary: The Journal of a Foreign Correspondent. Knopf, 1941. Smith, E. K. Last Train from Berlin. Knopf, 1942. White, W. L. They Were Executable. Harcourt, 1942. Wills, W. E. The Coming Battle of Germany. Duell, 1942.

SMART SERGEANT

Barracks debate at Camp Berkeley, Texas, flares high over the justice of it all, but it makes a funny story. To tell it: take three privates, six dollars, no name, and one smart sergeant. Like this: The first private was assigned to Kitchen Police and wanted instead to go to Abilene for the week-end. So he offered the second private six dollars to do the job for him. The second private agreed, pocketed the half dozen and found a third private. The last private was persuaded to take over the KP detail for three dollars, leaving a nice profit for the middleman. But the last private, worried about getting up on time, dropped into the company office and asked to be awakened early for KP duty. The sergeant noticed his name was not on the list and started an inquiry. Result: The first private didn't go to Abilene, the second private didn't keep his profit, the last private didn't get to sleep. They ALL did KP, and the sergeant who put two and two together, finds it makes six dollars.

SGT. SAIN COMMISSIONED

Master Sgt. Robert L. Sain, who is in charge of the officers' personnel section at Post Headquarters, was appointed a second lieutenant in the Army of the United States yesterday, Lt. Col. J. D. Rosenberger, Jr., post adjutant, announced today. Sain, who has been a member of Headquarters Detachment DEML, Fourth Service Command, was transferred today to duty at Camp Wheeler, Ga.

Eight teams have been formed in the new bowling league of the First Student Training Regiment. Fourteen matches are to be held in a series of potesties.

Station Hospital Staff

The staff of Station Hospital, Fort Benning, shown above, includes, left to right, Major T. A. Wood, assistant executive officer; Col. E. A. Noyes, commanding officer; Lt. Col. W. L. Starnes, executive officer; and Major Donahue, hospital adjutant and assistant executive officer.

Jascha Heifetz Here Nov. 22

Famed Violinist Plans Post Concert

It was wartime, the night of October 27, 1917, when a 16-year old Russian violinist stepped on the stage of Carnegie Hall and played for the first time in the country which was to become his own.

It was again wartime when Jascha Heifetz started out in October, 1942, on a coast-to-coast tour in the course of which he will play here on Sunday, November 22 at Fort Benning's post in the Harmony Church area.

Always a believer in fine music for everyone and convinced that music now is more vital than ever before, Heifetz is not only filling a more extended concert tour this season than last, but is playing as many as ten concerts a week in service men in camps as his engagements permit.

Ever since the war broke out, the violinist has devoted much of his time to civilian war work at his home on the coast of Southern California and presenting at army camps. The army concert service has proved to Heifetz that American soldiers are not only hungry for music, but for the best in music.

On any subject relating to his work, Heifetz is eager and willing to talk. But about his personal life he is almost invariably shy. He has always felt that music-making was his story. Once, when Deems Taylor was writing an article about him, he asked for detailed biographical information. Heifetz said: "I wish you'd keep it short. Just make it: 'Born in Russia, first lessons at three, debut in Russia at seven, debut in America in 1917.' That's all there is to say, really. About two lines."

This outline, when filled in, reveals that Jascha Heifetz was born in Vilna on Feb. 2, 1901. He took his first lessons from his father, Rudin, himself a professional violinist. As a small child Jascha studied at the Royal school of native city, then in St. Petersburg under the best teacher of the time, Professor Leopold Auer.

Once famous in Russia as the child prodigy, Heifetz made his Berlin debut at ten with the Philharmonic under Nikisch, followed by appearances with the orchestra in Leipzig and Vienna. When the first World War broke out, the youth was touring the Scandinavian countries. Later he remained in Leipzig and Vienna, where he remained, playing all through the difficult winter of 1916-17. Food rations were down to a quarter of a pound a person, machine guns were filling the Petrograd streets with lead, and Kerensky was at the head of the new government when the Heifetz family assembled their belongings and left Russia.

They were five—mother, father, two sisters and Heifetz. They travelled eastward, across Siberia, in a final, public, and dangerous journey, publishing in Japan and Honolulu, their ultimate goal was reached—New York.

Since that time Heifetz has toured the world four times, has played in almost every country on the face of the globe and has, in the course of concert-giving,

'Medicos' Will Be Suspended For Duration

Urging readers to join in support of "The Bayonet," official post publication of Ft. Benning, the staff of "Medicos" announced in the current issue that publication of the monthly paper would be suspended.

The "Medicos" has been published for the past 17 months by the Medical Department Detachment of the Station Hospital and has gained in popularity with each issue. It has sent all over the country with its news, views, sports and humor.

With deepest regret, the Staff of the Medicoes announces that this issue of our publication will be the last edition for the duration of the war.

In cooperation with the conservation of essential war materials we feel that a continued reduction in the use of paper will aid in the defense effort; and also that we might lend a helping hand to the post-war publication "The Bayonet," published by the Public Relations Office of Fort Benning.

Lieut. W. C. Sommermeyer is officer advisor for the publication. Associate advisor is Mr. Sgt. C. A. Auger and editor-in-chief is Sgt. John P. Hamill while Master Sgt. William R. Sample is associate editor.

ALWAYS WORKING

The MP was tired. He had been on duty in San Antonio, Texas, headed for Kelly Field and bed. Yet all the soldiers who entered the bus went over to him and exhibited their passes. At last the MP rebelled. He said, "Look, you guys, I'm just riding the bus like the rest of you. Don't I ever get off duty?"

"It's the same way in civil life, soldier. Look at the doctor who is always prescribing free for his host's cold, or the piano player who is always asked to bring the music to the party."

"Travelled a distance equivalent to two round trips to the moon and is well along on the first leg of a third."

Best Wishes FT. BENNING on your 24th ANNIVERSARY

We have appreciated your business in the past and will strive to please you in the future.

Miss Reynolds Finds Checks For a Million Just Routine

Were Among First Yanks To Go To War Zone

Checks for a million dollars are just "pieces of paper" for one feminine employee at Fort Benning who includes the drawing of million-dollar checks in her routine duties for the day.

She is Miss Mary Reynolds, principal clerk of the commercial accounts section at the Finance Office and one of the older employees in point of service at Fort Benning.

Miss Reynolds, perhaps, more than any other woman employed at Fort Benning, has a good idea of just how big the "big business" at Fort Benning is.

As principal clerk of her section now, Miss Reynolds supervises the paying of all commercial accounts, all subsistence accounts, troops of the post, all construction bills and bills for maintenance work—in fact, everything used by the government on the post is paid for by this office.

And in the office, Miss Reynolds is the chief "check-writer." Last month for example the department paid bills of more than a million dollars, exclusive of construction accounts. For such high-powered payment of bills, Miss Reynolds has to draw checks of more than a million dollars at one time.

As a typical example, one check with one figure followed by six zeroes was paid to a construction company one day recently for work at the post.

Other "minor" items that keep this feminine "high-finance" busy all day at the Finance Office are the payment of all Quarter-master market center accounts for the Columbus office; payment of all meat tickets for soldiers traveling to and from Fort Benning and payment of all subsistence accounts for air field located near Columbus.

Miss Reynolds, who has been working in the post Finance Office since April, 1926, was graduated from the State Normal College at Milledgeville, Georgia. With the exception of one year when she taught, her entire business career has been spent in the Fort Benning Finance Office.

Fort Benning's Station Hospital Medical Detachment now has a 15-piece orchestra which plays frequently at social events at the Post.

OKAY BUDDY... I MEAN, SIR

Private Johnny Graves, postal clerk at Camp Edwards, Mass., will never get chatty again. The exception is one year when she spelled out his name in asking for mail, "Okay, bud." And that's that uniform, Canadian British? The man replied, "British." And Johnny said, "Not bad, not bad, what's the junk on the shoulder for?" And the man said, "For majors, bud." And Johnny said, "Yessss, SIR!"

Skilled Auto Mechanics Trained At Infantry School For Tactical Units

Automotive Section Offers Variety of Courses Here

The Automotive Section of The Infantry School, under the direction of Colonel Cornelius E. Ryan, has attracted wide attention for its methods of training expert motor mechanics and motor maintenance officers. Representatives from automotive schools of various branches of the Army have come here to observe the techniques employed at The Infantry School.

The Automotive Section presents two familiar 12-week courses, one for officers and one for enlisted men. Known respectively as the Officers' Motor and Maintenance Course and the Enlisted Motor Mechanics Course, their avowed mission is to produce qualified transport and maintenance officers, and also skilled mechanics capable of performing and supervising second echelon maintenance and the operation of all vehicles and the operation of the infantry regiment.

The permanent personnel of the section includes more than 400 officers and non-commissioned officers, and a large number of instructors. A new class of students is admitted each week. An officer's class enters in the fourth week; the other three are enlisted motor mechanics. The students for both courses come, for the most part, from tactical units in the field. Contrary to the procedure for Officer Candidates, these men are not transferred to The Infantry School. Service commands, but come here to receive instruction from their permanent units. Upon completion of the course, they return to those units.

The section is divided into headquarters which handles administration, and four instructional groups, known respectively as the engine, chassis, electrical, and general groups. The students get four weeks of work with each of the engine, chassis, and operations groups. The general group presents eight hours of automotive instruction to all officer and officer candidate classes.

The first four weeks of the automotive courses are spent on engine. After a general orientation to the course, the first few days are devoted to the operation, construction, nomenclature, and function of the four cycle internal combustion engine, including the principles of carburetion, I, L, and V type engines are studied in detail.

Carburetors used on all infantry vehicles form the next subject of instruction. Considerable time is spent on carburetor and valve adjustment. The method of instruction here, as throughout the entire course, follows the conference, demonstration, and practical work sequence found in all branches of The Infantry School. Here the greatest emphasis is on practical work. The students in the automotive courses learn by doing. For instance, the officer instructor tells the class how to make carburetor and valve adjustments, and the assistant instructor demonstrates the procedure. Then every student must make all the adjustments himself, repeating them until there is no doubt that he understands them thoroughly.

STUDY ELECTRICITY
Much time during the second week of the course is devoted to automotive electricity. Under this heading the classes study batteries, generators, starters, and battery charging systems, including functioning of distributors. Detailed studies of automotive failures have revealed that almost all of them are caused by faulty carburetion or defective electrical systems, with 85 per cent of all failures traceable to the latter. Accordingly, the study is placed on these systems with an eye to preventing breakdowns and to repairing with minimum delay those that do occur in the field.

Beginning with the third week, the classes move into the live engine building. All but four hours of the third week's instruction is spent on live engines. Here the study of the ignition systems is completed. Wiring and timing of the electrical systems, and the tests of the electrical systems follow in order. Next the students learn engine tune up. They spend many hours studying causes for failure and diagnosing troubles. The instructors set up troubles on the engine deliberately before the class begins. Then the students are required to diagnose the trouble and to make all necessary adjustments. The final sessions with the engine group are devoted to a study of field ranges and air command found in infantry units. This period concludes with a comparison of infantry engines with other engines used in the mechanized cavalry, the armored forces, the artillery, civilian vehicles, and others.

WORK ON CHASSIS
The fifth through the eighth week of the course is spent with the chassis group. Here as with the engine group, the students learn by doing. The practical work consists of the disassembly, adjustments at least once. After a general orientation into the chassis group, the first class is on mechanical principles. A conference on bearings is followed by a study of frames and their function as the foundation of the vehicle. All types of clutches used in infantry vehicles are examined in detail. After a lecture by the officer in charge and a demonstration by his enlisted assistants, all students take apart and adjust the various clutches being studied.

Transmissions, transfer cases, and winches are discussed and studied. Each student must learn to diagnose and repair the causes for failure in these parts. In addition to the mechanics of the transmission, a conference is given on the advantages of that instrument in the field, and also the normal abuses which should be avoided. Springs, shock absorbers, propeller shafts, universal joints, front and rear and their work of the sixth week. This is followed by a study of wheels, tires, and tires, with much time spent on simple rules of rubber

Preparation vehicles for movement by rail are discussed. Classes are held on the servicing and breaking-in of new vehicles and on the operation of all vehicles under such adverse weather conditions as desert heat or sub-zero cold. Discussion periods are held throughout the month on expeditions and short cuts in vehicle operation and maintenance. Students returning for school from units in the fields of operations contribute many suggestions learned under battle conditions. These discussions periods help the automotive section keep up to date in their instruction.

LEARN FIELD WORK
The final week of the course covers field expedients and day and night motor marches. The students are taught how to load and lash vehicles properly and how to operate a motor park. An exercise is held on a bivouac problem at night. One half of the students are in charge on the way out to the bivouac, and the other half takes over on the return trip. The convoy proceeds under blackout conditions and battle procedure is faithfully simulated. An airplane follows the convoy to determine whether their movements are visible from the air. When they reach the bivouac area, the observer in the plane drops a message by parachute which is used in a critique of the problem.

Probably no section of The Infantry School makes better use of visual aids than does the automotive section. The section has its own drafting room and its own carpenter shop where five draftsmen and three carpenters are kept busy full time making visual aids to instruction. An enlargement facsimile of virtually every part of every vehicle studied is made. Some of these enlarged models are as much as fifteen times the size of the actual part. They are constructed to scale and are painted in bright colors to distinguish one part from the other. And what is most important, these models actually work.

The automotive section of The Infantry School is the center of motor information for the entire infantry branch of the army. It provides pamphlets and instructional materials to army units all over the world.

Expansion of 21st QM Regiment Is Enormous

Is Proving Ground For Colored Officers

The 21st Quartermaster Regiment (Truck), of Fort Benning, is rapidly becoming the proving ground for newly commissioned colored officers. Commanded by Colonel Ellis F. Altman, this regiment has 41 colored officers, the largest complement of colored officers, on active duty, of any unit on the post.

The first to arrive at Fort Benning in July, 1942, were eight graduates of the Quartermaster Officer Candidate School at Camp Lee, Warren, Wyoming. Of that number, four were given first hand experience with troops and then sent to another post as cadre for a new organization. Word has since come back that one of these officers is now a battalion adjutant and that another is a company commander.

Of the four who remained with the 21st Quartermaster Regiment, Lt. Winfred T. Gilmore is Assistant Traffic Officer for the regiment; Lt. Andrew E. White is one of the company officers; Lt. Everett Bell is assistant to the Regimental Supply Officer, and Lt. Henry A. Talbert is the Regimental Public Relations Officer. Since joining the regiment the latter two officers have been promoted to the rank of first lieutenant. Arriving at approximately the same time as the above mentioned officers, 1st Lt. Levi L. Stannore reported from Washington, D. C. and assumed the duties of regimental chaplain.

During the last week in September, a large group of graduates of the Quartermaster Officer Candidate School at Camp Lee, Va. reported for duty with the regiment and of this number four were colored. They were Lt. Clyde Rhinehart, of New Orleans, Louisiana, who is assistant adjutant of the regiment; Lt. Tyler Hill, Jr., of Charleston, W. Va., who has recently been serving as adjutant of the Third Battalion, and Lieut. John W. Hoggatt and Jackson Seacrest, of Nashville, Tenn., and Oklahoma City, Okla., respectively, who are company officers in an attached unit.

NEW ARRIVALS
With the coming of November, other groups of colored officers began arriving from the Officer's Pool, Camp Lee, Va. Fifteen in number, they are Second Lieutenants Charles Campbell, of Washington, D. C.; Joseph Dimond, of Hampton, Va.; Robert H. Ewing, of South Bend, Ind.; Edward L. Goodlett, of Atlanta, Ga.; Robert W. Harris, of Anniston, Ala.; Melvin A. Hendry, of San Diego, Calif.; William Gray, of Chicago, Ill.; Fambro Kendrick, of Savannah, Ga.; Herman McKinney, of Wilmington, Del.; Lynnwood Park, of Omaha, Neb.; Oliver R. Pope, Jr., of Philadelphia, Pa.; Clarence W. Purvis, of New York City, N. Y.; William Sanderson, of Kansas City, Mo.; and Moses Spencer, of Saint Louis, Mo.

Kan.; Charles H. Fields, Jr., of Absecon, N. J.; Richard A. Edwards, of Proctorville, Ohio; Channing C. Colston, of Montclair, N. J.; Manuel E. Coaste, of New Bedford, Mass.; William H. Webb, Jr., of Indianapolis, Ind.; and Leon E. Terry, of San Francisco, Calif.

In checking the Qualification Cards and personal history of these officers, it is interesting to note that a goodly portion of them are college graduates—with one holding a Master of Science degree. Fourteen of these men were in business, there were some football coaches, professional men, Post Graduate students, and several travelers. The present chaplain was the pastor of a very prominent church in Washington, D. C. A look at the Pay Data Cards disclosed the information that the bachelors slightly outnumber the married men.

Having the privilege of being assigned to one of the army's greatest truck units, and receiving whole hearted cooperation from veteran, experienced officers in the 21st Quartermaster Regiment, it may be truthfully said that the colored officers assigned to this regiment have a wonderful chance for advancement.

Actual Midway Battle Scenes To Be Shown

Motion pictures taken during the actual Battle of Midway will be shown at Fort Benning theaters Nov. 12-15, post headquarters was informed Friday by the U. S. Army Motion Picture Service.

The 1,800 feet of film made by the Navy Department during the great Pacific battle is being furnished to all of the theaters in the United States on a "no-charge" basis.

The picture has been recommended for all Army personnel because of its universal interest. Lt. Col. Charles C. Finnegan, special service officer, announced the following dates on which the film will be shown at Fort Benning:

Theaters 1 and 8: Nov. 12-13; Theaters 2 and 3: Nov. 15-16; Theaters 4 and 5: Nov. 17-18; Theaters 6 and 7: Nov. 19-20; Theater 10: Nov. 22-23, and Theater 9: Nov. 24-25.

HABIT DIDN'T HELP
The Staff Sergeant at Camp Crowder, Missouri, who had just been assigned as Mess Sergeant reported pretty sleepy on his first day. At any rate the lieutenant who inspected the dining room before breakfast swears that when he advised the sergeant the dishes were not stacked in a military manner, the dialogue went like this: Lieutenant: "Sergeant, Those dishes are out of line." Sergeant: "Ten shun, Dress right. DRESS!" (Yawn) "Oh, yes, yes, yes." The sergeant didn't bother the XPs. The sergeant lined the dishes up himself.

Data is being compiled at Fort Benning for a new Army manual on how best to apportion meats to units in the field.

Fort Benning's 24TH Birthday! Metcalf's 22ND Birthday!

TWO REAL REASONS to CELEBRATE!

And the best way I know to celebrate is with a grand and glorious VALUE-GIVING SALE! This great sale would not have been possible, but for planning months ago for this great event. Thinking not only of the working man, but of the fighting man and his family too, we went to work and selected hundreds of items in Fall and Winter merchandise just at a time when you would need them most and are offering them at really outstanding prices. Check this ad, select the things you need and come down to Metcalf's. Remember, you save on every purchase at Metcalf's.

DON'T MISS THESE!

BIG SAVINGS FOR MEN!

OUTSTANDING VALUES in Columbus' Largest Boys' Department LONG PANTS SUITS

Boys, bring mother down to Metcalf's. Buy there's just the suit you've been wanting. Really fine wearing sporty styles. Suits that would sell up to \$15.00. 7 through 12. Pants already have cuffs on them. ALTERATIONS FREE.

\$6⁹⁸ up

BOYS' KNICKER SUITS

Single and double-breasted knicker suits with plain front knickers with belts to match and later cuffs. Solid colors and fancy patterns. On today's market these suits would have to sell for \$10.00 to \$15.00. Ages 6 to 12.

\$5⁹⁸

SHORT PANTS SUITS

Single and double-breasted shorts suits with plain front shorts with belts to match pants. These are really \$10 suits. Sizes 4 through 12. Large assortment of colors and patterns.

\$4⁹⁸

"CALIFORNIA" CAPE SKIN LEATHER JACKETS

Over 200 fine leather jackets in this lot—size 2 through 20s. Beautifully tailored, fine linings and perfect fitting garments. You will save \$2.00 on this jacket.

PARATROOPS—Well-Trained and Heavily Armed—Practice Their Art at Fort Benning

These striking pictures of Paratroopers in training at Fort Benning realistically portray the tough and alert soldiers as they engage in their daily routines. The Paratrooper's life is not an easy one and it is not solely made up of thrilling jumps from soaring transport planes: Out of bed at the break of dawn, hours of rugged physical cross country running, practice jumps from training towers.

Paratroopers at Benning are selected men; all are volunteers for the tough, exacting and exciting assignment. Hundreds of qualified jumpers are graduated every month in a thorough and streamlined course to prepare thousands of

these shock troops for assault and battle against the enemy.

Picture at top right illustrates the manner in which the troops file onto Lawson Field to board a transport plane from which they will jump. The troops are clad in warm suits, with protective headgear and high boots, typical of the excellent equipment designed solely for the Paratroopers.

Picture top center, shows a group of troops in a transport plane as they prepare to jump off into space. Only thoroughly trained and hardened soldiers—typical of American Paratroopers—are qualified to engage in their hazardous business every day of the year.

Picture top left catches the tense atmosphere, reveals the rigid discipline necessary in transports carrying Paratroopers. The jump master is shown as he yells out "Jump" to the next trooper to leave the plane.

Picture middle right shows one of the four 250-foot training towers at Fort Benning, in which Paratroopers take their first "jump." The trooper dropping down from the tower is in the early stages of jumping, although he is physically fit, developed and excel in high and low-altitude jumping, techniques

Picture middle center shows Paratrooper as he floats down from the Georgia skies. Troops trained at Benning have de-

veloped and excel in high and low-altitude jumping, techniques which will be used to surprise the enemy when they make their attack.

Picture lower left is a striking photograph, showing several chutes opened in the skies overhead, the Paratroopers floating down to earth again.

Picture lower right shows the Paratroopers in action once they have landed. Heavily armed and trained in the use of many varieties of weapons, these soldiers are deadly and will prove their mettle when they drop behind the enemy's lines.

Expert Rigger Made In Parachute School

Students Are Taught To Sew 44 Different Seams In Course

Yes, the sergeant is really learning to sew, but don't get him wrong! Sewing is one of the prerequisites of becoming an expert rigger at the Parachute Rigger School, Fort Benning.

Here the prospective packers are taught not only the technique of folding chutes, but also maintenance, minor repair work, inspection routine, operation and use of all types of these silk umbrellas, and even the manufacture of containers in which these and others must be dropped.

Students are chosen from men who show special aptitude for this type work during their training as jumpers. After qualifying as paratroopers the men are sent to Captain E. Verne Stewart, a veteran

parachutist, and rigger, with 22 years' experience in this particular branch for one month of special training. As a matter of fact he was, and the captain really knows his work, training jumpers and riggers at his own school in Chicago, prior to coming into the army.

During the course students are given 70 hours of work and are taught 44 different seams on specially constructed sewing machines, which cost from \$200 to \$1,000. On these machines they learn to repair small holes in parachutes, patch harness straps, repair leather clothing, and the actual construction of containers for equipment which must be dropped. This often involves the development of personal initiative and ingenuity, for nearly always the rigger will work alone and unassisted.

LICENSE ISSUED
On completion of this month's training, the student receives a license permitting him to pack civilian as well as army parachutes, and is recognized as a qualified rigger by the Civil Aeronautic Authority.

Besides the training on the sewing machine the student's eight hour day includes lessons in knot tying and hand sewing. He is taught more knots than a sailor and 14 different hand stitches. After receiving his certificate, the new rigger is assigned to a parachute service company, where he is charged with all the maintenance and repair for a regiment. In combat the riggers do not ordinarily jump, even though they are qualified to do so. They will pack all chutes, serve as jumpmasters, and drop supplies to troops on the ground. In this latter capacity they will be called on to pack material weighing from 25 to 1,000 pounds, so that it will reach the ground in useable condition.

The school is a comparatively new innovation, being started on July 20, 1942, under the supervision of Captain Stewart. Formerly this work was handled by the Air Force.

Parachute Officers

Officers who have served with the 507th Parachute Infantry since activation, July 20, 1942, are shown above. It is one of Uncle Sam's newest regiments of fighting paratroopers, and is commanded by Col. George V. Millett, Jr. (seated center). The other officers in the picture are: seated, left to right, Captain Henry J. Muller, Major James Coutts, Colonel Millett, Captain Edwin J. Ostberg, Captain Arthur D. Raber; standing, Captain Gordon K. Smith, and Second Lt. Jack S. Martin.

'Sewing' Seeds of Destruction

"Now, sergeant, this is the way to do it," Captain E. Verne Stewart, officer in charge of the riggers' course, tells the new rigger, as Wells learns about the mysteries of the sewing machine.

Hardy Paratroopers Train At Post By Hundreds Preparing For Battle

Parachute troops today are a dominant factor in the armed forces of the United States and the story of their development in two short years is a Fort Benning saga of inspired leadership, painstaking planning and cold courage on the part of the thousands of rugged, young Americans who are the rank and file of our parachute legions of 1942.

On this, the 24th anniversary of the founding of Fort Benning, the Parachute Training School commanded by a pioneer paratrooper, Brig. Gen. George P. Howell, is a recognized and vital part of the post.

Not ten, a dozen or fifty parachute troops are trained in a month at this new school, but hundreds and hundreds of qualified paratroopers proudly graduate every four weeks, ready for assignment to the rapidly-growing parachute infantry destined some day to make American military history.

The sprawling buildings of the new schools, the four impressive jump towers, the hundreds of trained-and training-paratroopers that compose the Howell-commanded First Parachute Infantry Brigade at Fort Benning are monuments to American enterprise and ingenuity that created the Parachute School from a nucleus of 50 intrepid officers and men who in July, 1940, set about to make a War Department paper-plan a reality at Fort Benning.

The 29th Infantry Regiment, long a tradition at Fort Benning, furnished the cadre for the first American parachute troops who were placed under the command

of an energetic, far-seeing West Point lieutenant, William T. Ryder, for this important assignment. The test platoon of two officers and 48 enlisted men were sent to Chanute Field, Ill., for orientation and early training. From there the group went to Highstown, N. J., for jump training on the 125-foot towers and a few weeks returned to Fort Benning, where their jumps from transport planes over Lawson Field marked the birth of American paratroopers.

So successful were the experiments with parachute troops that on Oct. 3, 1940, the 501st Parachute Battalion, the first of a long list of parachute infantry units was activated and the Army was under way in earnest on its development of parachute troops. The Army had been studying the importance of airborne infantry such as paratroopers for years and the establishment of this first parachute battalion was carried out by the famous Infantry Board at Fort Benning, the group of "military scientists" charged with the development of infantry tactics for American armies.

Under the immediate direction and supervision of the Director of the Board, members supervised and initiated tests leading to the development of tables of organization and special equipment for the parachute infantry, methods of training, weapons to be used and even the type of footgear to be worn.

Enlistment in the paratroopers was always and still is—purely voluntary and shortly after the 501st was formed, volunteers were pouring in so fast that waiting lists had to be established. Guiding the early training of the first battalion was the now-Captain Ryder and his little test platoon, who were the "guinea

pigs" of the Infantry Board. There were other capable, aggressive infantry officers assigned to the first battalion such as its commanding officer, Maj. William E. Miles—now Brig. Gen. Miles and an important figure today in the development of air-borne troops; General Howell, who as Major Howell served as executive officer of the battalion and later as commanding officer of the 502nd Battalion, when it was activated in July, 1941, and Lt. Col. William C. Lee—now General Lee and another important man in the development of this new branch of the service—who later commanded the Provisional Parachute Group.

PROGRAM EXPANDS
The formation of the Provisional Parachute Group in the late fall of 1940 was the answer to the rapidly-growing parachute legions. Formed early in 1941 to facilitate the training of new jumpers and the growth of the 501st, the Group—still operating under the Infantry School—eventually included the 501st, the 502nd, the 503rd and the 504th Battalions, which were all organized at Fort Benning in the 12 months following the activation of the 501st.

In May, 1941 two 250-foot jump towers were completed, marking a milestone in the training program of the "chutists." Like popcorn from a paper bag, Pearl Harbor drew a cloak of military secrecy around U. S. training programs such as the development of parachute troops, but despite the urgency of the situation and the greatly stepped-up program the same thorough and complete training and conditioning that marked the early stages of paratrooper training at Fort Benning. Months of practice had evolved a compact, gruelling four weeks training course that taught the jumpers the fundamentals of jumping from speeding planes at low altitudes—more hangers were built, more barracks and training equipment added and early in 1942, two more 250-foot shafts of steel towered above Fort Benning. The spring of 1942 marked another important step in the development of parachute training because in May, 1942, the Parachute School was formally established and General Howell, then Colonel Howell, was brought to Fort Benning to be its first commandant. About the same time, part of the training program and part of the parachute troops were

We Are Proud of Fort Benning and offer sincere GOOD WISHES
in carrying out your great work.

Paratrooper Frowns On 'Glamor Boy' Title

Are Red-Blooded He-Men Doing He-Men's Work

"We ride to work," the motto of the U. S. Parachute Troops, expresses in its own flippancy the casual and modest courage of these men.

They dislike the title, "Glamor Boy of the Army." They are red-blooded American soldiers doing a red-blooded he-man job. The esprit de corps is high. Officers and men face the same risks side by side, and learn a mutual respect for one another.

No man is forced into this branch of the service. On the contrary, all are volunteers, chosen from the best physical specimens of American manhood.

Only officers and enlisted men who have completed at least four months of basic training, and who meet rigid physical and mental qualifications, can hope to some day wear the wings and jump

boots of a full-fledged paratrooper.

Candidates are subjected to three weeks of rigorous going over before even entering an airplane. During the first two weeks the student is generally limbered up with special exercises, including tumbling, calisthenics, long distance running, rope climbing, jumps from mock-up towers, and the rudiments of wrestling and judo. All during this period he is also learning how to carefully fold and pack his own parachute.

250 FOOT JUMPS

The third week consists of jumps from a 250 foot control-tower, and rides in the shock harness. In the control-tower the student has no control over the movement of the chute. However, he learns the feel of parachuting and something about the technique of landing.

Jumping from the free tower, which is the next step, tests all the student has learned to date. Here he is hauled to the top of a

First Parachute Officer In Army Is Lt.-Colonel

Word has been received at the Parachute School of the promotion of Major William T. Ryder, former assistant commandant of the school, to Lieutenant Colonel.

Lt. Col. Ryder has the distinction of being the first parachute officer in the American Army. It was he who commanded the first test platoon of parachutists, which was made up of volunteers from his regiment, the 29th Infantry.

This platoon of two officers and 48 enlisted men later went to Highstown, N. J., for parachute training on the 125 foot towers at that place. After a month of intensive training and experimentation, Captain Ryder returned to Fort Benning to direct jump training instruction with the 501st Parachute Battalion.

Recently Lt. Col. Ryder was elected by the War Department to act as technical adviser for the RKO production, "Parachute Battalion." Upon his return from Hollywood, the colonel was named assistant commandant of the provisional parachute school, in charge of parachute training in all of its phases.

At present Lt. Colonel Ryder is on detached duty, assisting in training of airborne units, in the Texas maneuver area.

250 foot tower and with chute already opened, is turned loose. Everything is exactly like a jump from a plane, except the actual leap from the door and the opening jerk of the silk.

This latter feeling is experienced when the prospective paratrooper is taken up in the shock harness. Here is a gadget designed for no other purpose than to simulate a real opening, and at the same time test a man's nerve. The student is hooked into a harness, and hauled upward in a horizontal position, face down.

At a height of about 75 feet, the individual is halted and told to grasp the rip-cord. Several lengths of risers are folded behind his harness, which will be released upon pulling the rip-cord. The total length of fall will be that of the folded risers, or about 15 feet. However, the jerk and nervous shock will test the courage of any man.

STIFF TESTS

The men who survive through this third week (and we say that because some will have, by this time, found the tests too grueling for the work too hard) are now ready for that last and all important one, the week of actual jumping.

Bright and early Monday morning the candidates are marched down to the jump field. They are sweating, and they sweat last night. Is that chute properly packed? Will it open? Can I even get out of the door?

The men are loaded into the big transport, nearby. Heads are high, jaws are set, and there is a certain grim expression on every face. Silently the men all file in and are seated in rows facing one another. The pilot gives the ship the gun and they are away. About this time the jump master turns around and shouts, "Is everybody happy?" and the boys sound off, "Hell yes." The ice is broken. Someone off in the corner starts singing, "We Did It Before" and soon all of them join in. Some of the men smoke, others bring along a magazine and read a little, others laugh a bit too loud at jokes that aren't funny.

NERVOUS TENSION BREAKS

Suddenly the jump-master makes a move, all is silent again. "Stand-up and hook-up," he shouts. Quickly all arise and hook on to the static line. "Check equipment." Each man checks the equipment of the man in front. "Count off." The nervous tension breaks momentarily as each soldier sounds off.

Then the jump-master signals to the pilot, and the plane commences to slow down. The long-awaited moment has arrived. "Stand in the door," Damn; it's a hell of a long way down there. Time goes by at a snail's pace. And then like a clap of thunder comes the command, "Go!"

The first man leaps, followed closely by his buddies. One thousand, two thousand, three thousand, and then the sudden jerk of silk above. About to burst with pride and relief the men start shouting to one another, and singing as they swing earthward.

That night the coming-paratroopers pack their chutes and wait for another day. Again they jump. This goes on for three more days. Then it is time for recognition, graduation day.

Chests swell, and boots fairly burst with polish as each jumper goes forward for his wings. Then with that silver parachute over his heart, the paratrooper knows he's as good as any man.

LT. CLINTON MAKES PARADISE OF A MESS

No Wonder 24th General's Mess Is 'Soldier's Delight'

Lt. Clinton Is At It Again But The Setting Is Different

Men of the 24th General Hospital are sporting a well-fed and contented look these days. With a brand new and neatly arranged mess hall, and with 2nd Lt. Clifford Clinton as mess officer, who wouldn't be contented?

Lt. Clinton, in civilian life originated and operated the famous "Golden Rule" restaurants on the west coast. There were no fixed prices. Patrons paid what they thought the meal was worth, and Clinton didn't go broke. He made money.

So one day last week, when the bugler sounded "soldier's delight," chow, Clinton found himself again managing a cafeteria, one which he organized to feed 600 mouths in 18 minutes.

Trays of hot food flowed so fast from four serving lines that the hungry G. I.'s seemed to melt away. Immediately after receiving their portion of hot chow, the soldiers stopped by one of the buffet tables and helped themselves to coffee, bread, jam, and butter, before being seated.

GOLDEN RULE ENCORE?

The hall beams with cleanliness and good cheer. Several coats of white paint have brightened the walls, which are adorned with portraits and paintings, and canaries provide the music. It could be another "Golden Rule."

However, there was lots of hard work behind the scenes. Every one worked extra hours, before the job was done. Lt. Clinton, modestly says it isn't complete, even yet. All soldiers and officers are invited to express freely any suggestions, criticisms, or comments pertaining to the improvement of the mess facilities.

Assistants striving with Lt. Clinton for added efficiency include Staff Sergeant Elbert Bell, Sergeant William Seaman, Willie Alexander, Charles Meuschke, Roscoe Carter, and twenty-four cooks, two bakers, two butchers, and two store room clerks.

Red Cross Aids Servicemen File Dependents Forms

American Red Cross field directors at Army posts and local Chapters will assist soldiers and their dependents to prepare the official application form under the Servicemen's Dependents Allowance Act signed by the President on June 23, 1942, it was announced today.

Chapter Home Service workers and field directors have been supplying the tremendous training program. Only two short years ago, the first American parachute trooper stood at the door of a plane over that same Lawson Field—a trailblazer in the sky, a symbol of American pioneering.

plied by the War Department with the official forms and a booklet explaining provisions of the law. Application for a family allowance should be made by the soldier in every case where practicable. In certain instances, however, the application may be made by relatives or dependents.

Soldiers on duty overseas may obtain application forms from their commanding officers. Relatives or dependents may obtain application forms from the nearest Army installation or their local Red Cross Chapter.

If the application is made by a person other than the service man, documentary evidence must accompany the application. On the other hand, if the soldier himself makes the application he is allowed six months in which to furnish documentary proof to the War Department. Field directors will assist soldiers, and Chapters will

aid dependents in furnishing this evidence.

Benning's Civilian Business Women Play Vital Role In War Effort

Women of America—women of the world—are playing a vital and all-important role today in the world at war. Typical of the feminine scene is Fort Benning, the Army's most complete post and the home of the great Infantry School.

Here at Fort Benning are the major generals, the brigadier generals, the other commissioned officers, right on down the line to the sergeant and privates—all working long hours, many of them seven days a week, at the business of training fighting men. And right by their sides, working the same long hours, handling a thousand and one details, seeing to it that things go smoothly and generally making themselves useful are 2,500 "soldiers in skirts"—Fort Benning's contribution to the 1942 Army of women.

THEY ARE CIVILIANS
They are the civilian business women and employees of the post. The grandmothers, the mothers, the married women and the younger girls who accomplish the various tasks that fall to the lot of trained women working on a post of the size of Fort Benning.

Most of them have homes in every Columbus, many of them are the wives of Fort Benning soldiers who came to Georgia to be with their husbands. All are as determined as the soldiers to do as much as they possibly can to win the war completely.

The variety of tasks performed by Fort Benning women is amazing, but their over-all efficiency is the subject of never-ending praise from officials who consider their feminine secretaries stenographers and clerks their "right-hand men."

Most of the tremendous "paperwork" associated with the administration of a military city like Benning goes through the efficient hands of the female workers. The positions held by women at the post run from the great majority are stenographers and clerks of office and secretaries to commanding generals through highly specialized work as physical therapy aides, dietitians and dental hygienists to the maids and attendants in quarters, mess halls and at the hospital.

The great majority are stenographers, clerks and typists. There are specialists such as teletype and telegraph operators, key punch operators, telephone operators, code experts. Many of the women in the high salary brackets handle extremely important papers and work in confidential positions requiring great trustworthiness.

SCATTERED OVER POST
They are scattered all over the post. The Infantry School, Quartermaster offices, post headquarters, the station hospital and other administrative offices have the greatest number employed. Others work at the Parachute School, Ordnance and Signal Offices, telephone exchange, machine records unit, the Reception Center in charge of about 2,500 soldiers. There are offices on the huge reservation.

Naturally the supervisory and administrative problems associated with the employment of 2,500 women present an important task which is ably handled at Fort Benning by Civil Service authorities assisted by military officials. All feminine employees of Fort Benning come under Civil Service

and must abide by the consequent rules and regulations. C. Arthur Ryden Jr., field representative of the United States Civil Service Commission, supervises the operations of the local Civil Service set-up, which was designated the central personnel agency by the War Department long before war broke out.

The Civil Service Board at Fort Benning maintains complete records of placements, positions open and even rates examinations in order to expedite the hiring of girls. Vacancies are filled as far as possible from local lists, but if no names are available, eligible girls are recruited from Atlanta or Washington.

HAS PERSONNEL DIVISION
Fort Benning post headquarters has created a personnel division headed by Lt. Col. J. D. Rosenberger Jr., post adjutant, who reports directly to Brig. Gen. Walter S. Fulton, commanding general. Heading the personnel division, however, in an administrative capacity is Lt. Raymond A. Parkins, who supervises all of the women employees of Service of Supply activities at the post. Not under this division are the Infantry School, Area Engineer Offices and Lawson Field, all of which have their own personnel setups.

The function of Lieutenant Parkins' office is the processing of all personnel, change of status, re-allocation and promotion, also separations from Civil Service positions, of all employees in the SOS installations. Other duties include maintaining complete records on all employees, supervising the civilian payroll section and supervising the Civil Service Board which handles recruiting and interviews of persons not on the eligible list but qualified for Civil Service work.

At post headquarters, Lt. John A. Lyons is liaison officer between civilian personnel and military authorities. Civilian employees at the Infantry School are under the supervision of Maj. Phillip A. Dickey.

GENERAL'S SECRETARIES
Women in high positions of trust and confidence at Fort Benning are Mrs. Nelle Freeman, Mrs. Emma R. Price and Mrs. Sue Woodall, who work as private secretaries to three of the posts top-ranking generals.

Because of the very nature of their work, they are entrusted with many confidences and are valued as private secretaries because of their efficiency, their tactfulness and their trustworthiness.

Mrs. Freeman is the confidential secretary of the post commanding general, Brig. Gen. Walter Scott Fulton; Mrs. Emma Price is the secretary of Brig. Gen. George H. Weems, assistant commandant of the Infantry School; and Mrs. Woodall is Brig. Gen. George P. Howell's secretary. General Howell is commandant of the Parachute School.

Mrs. Freeman, a graduate of Central High School and Mountain City Business College in Chattanooga, Tenn., has been working at Fort Benning's post headquarters since Aug. 21, 1941. She has worked for General Fulton since Dec. 8, 1941, the day after Pearl Harbor. Mrs. Freeman is the wife of Ray C. Freeman, Columbus insurance agent, and has a daughter, Jane, eight years old.

Mrs. Price has watched Fort

Benning grow from a few tents and wooden barracks to its present position in the national military spotlight. Mrs. Price came to Fort Benning in May, 1919, when the post was only a few months old. She worked first for Maj. J. Paul Jones, constructing quartermaster, and C. G. Frost, field auditor. A day she will long remember was July 4, 1919, when word came from Washington that Fort Benning was to be abandoned. She worked all day and night getting records in shape only to have word come through that the order had been rescinded.

Mrs. Price is another graduate of the old Industrial High school. She has the distinction of having worked for a line of generals who have made a name for themselves in the military world. They include General Gordon, General Malone; General Collins, General King, General Asa Singleton, General Short and now General Weems, the assistant commandant of the school.

Youngest of the general's secretaries is Mrs. Woodall, secretary to parachuting General Howell. A native of Columbus, Mrs. Woodall also graduated from Industrial High school in that city.

Mrs. Woodall came to work at Fort Benning on June 10, 1942, under Lt. Col. Richard McKee. Previous to her work at Fort Benning, she was employed by the First Presbyterian church in Co-Board in the city.

THEY'RE "TIME-SAVERS"
Operating a real "time-saver" are two of the newer feminine employees at Fort Benning, Mrs. Kenneth C. Fory and Mrs. Edward C. Sykes.

Mrs. Fory and Mrs. Sykes operate the new test-scoring machines at the Infantry School, which is always in the market for new methods of saving time.

The electrically-operated machines score written tests for all of the officer candidates and student officers at the school. The apparatus looks very similar to a sound board in a broadcasting studio and, of course, the operators will tell you "it's very simple."

To save time in explanation though, we'll simply say that through using a sample test sheet with all the answers filled in correctly, that 1,000 tests can be scored in an hour and that after passing through the machine, the marked papers are automatically tacked in the bottom of the machine.

Civil Service Boards are always on the lookout for punch board operators who can take over the work of operating these test-marking machines, but the board points out that any experienced office clerk can quickly learn to operate the machine.

P. S.—And the machines aren't made to handle short tests either. Answer sheets can be made for as many as 300 questions.

THEY REMEMBER WEEN...

Two of the respected and well-known civilian employees at Fort Benning are sisters who recalled this week, with many a chuckle, of the days when they rode a train from Columbus to Fort Benning every morning... a train that chugged along so slowly and

2,500 Soldiers In Skirts Share Troops' Long Hours

stopped so frequently that they used to have a fast game of bridge every morning on the way to work.

The sisters are Mrs. Mamie K. Johnson, senior clerk in the fiscal section of the Infantry School, who came to work at the post in July, 1920, and Mrs. Roberta K. Hickman, senior clerk stenographer in the office of the assistant commandant at the Infantry School.

Mrs. Hickman recalls with pride the days when she worked for the present Chief of Staff, Gen. George C. Marshall, who was at one time assistant commandant of the school.

The sisters are graduates of the old Industrial High School in Columbus, and are both long-time residents of the city.

Mrs. Johnson recalled this week that when she first came to work at Fort Benning, the Infantry School headquarters were located in barracks. Civilians and officers rode to the post each morning on a train of 13 or 14 coaches.

"We often played bridge on the way out as the train had to stop so often and was delayed so much that we always had ample time for a good game," Mrs. Johnson remembered. "Often we would stop and pick berries while the train waited on some siding for another train or was delayed for other reasons."

Mrs. Hickman, a veteran of 15 years at Fort Benning, also rode the "commuters" train but her work was in a different area, in what is known now as Lawson Field. She would be met at the train with a car or more than likely a truck and taken to the 24th Infantry Officers mess for

breakfast and then continued to the field.

At that time there were two types of aircraft at the field, lighter-than-air, the balloon type of dirigible, and the airplanes, Mrs. Hickman recalled.

"MASTER-PLANNERS"
Dealing more directly with John Soldier than any other business women at Fort Benning are those "master-planners" the hostesses and Red Cross recreation workers at the Station Hospital.

The hostesses have to be mothers, sisters, friends and confidants of soldiers all at one time and at the same time administer the complicated affairs of service clubs they operate. There are three at Fort Benning, each noted for her ability to organize programs and act as an honest friend to soldiers.

Nationally-known because her "boys" in the armed forces have spread her accomplishments to Army posts in far corners of the land is Mrs. Winifred Baker, senior hostess at Service Club No. 2. Typical of the tributes paid to Mrs. Baker was one recently from Capt. J. H. Keller, special service officer at Ft. Riley, Kansas, written after he conferred with the Chief of Staff of the 9th Armored Division, Col. A. G. Kelly.

"During our conversation," wrote the captain, "Colonel Kelly mentioned the fact that all the

service clubs which he and Maj. Gen. Geoffrey Keyes, commander of the 9th, had seen, your club at Fort Benning was the finest as far as management and efficiency was concerned."

Mrs. Baker is unusually well-qualified for the work because of her long association with the Army and Army men. Her programs at No. 2 are built to satisfy the enlisted men and the attractively-appointed club with its home-like atmosphere is jammed every night with soldiers and their guests. A tip-off on one reason Mrs. Baker is so well-liked is the fact she didn't take all of her annual 15-days vacation this year because she felt "she just couldn't get away."

Miss Mary Farmer is a comparative new-comer at Lawson Field but has already made an excellent impression on the men of the Air Corps. Miss Farmer came to Fort Benning with a background of recreational and educational work. A graduate of the University of Alabama, she taught in the Jefferson County school system in Alabama as musical director; worked in radio production for the Birmingham Age-Herald, where she participated in the first Pan-American program, broadcast from Cincinnati, Ohio, to New Orleans. Before coming to work at Fort Benning, Miss Farmer worked in a Columbus music store and at Camp Wheeler, Ga.

Miss Ivy Randall is the impressive supervisor of the recreational work at Service Club No. 1. She was employed in the administrative department of the Quartermaster Office on the post from 1925 until April, 1941. Promoted to junior administrative assistant in April, 1941, she was charged with accounting for all funds expended by the Quartermaster and now holds one of the most responsible positions at Fort Benning.

SOUTHERN YANKEE
A Yankee in the South is Pettie V. Light, veteran employee of the Quartermaster property office at Fort Benning.

Miss Light, a native of Columbus, Ohio; was graduated from Columbus High school in her home town. She entered government service at Fort Benning on Aug. 16, 1927, working first in the Quartermaster office under Colonel Warfield. She was transferred to the memorandum collection of the property office in November of the same year and has worked there since that time.

FEMININE SOLDIERS
Two hard-working "feminine soldiers" of Fort Benning are Mrs. Mattie H. Bray, only woman employee of the reproduction plant and Mrs. Dorothy B. Morris, junior administrative assistant in the motor transport division of the Ordnance Department.

Mrs. Bray was educated in the Quitman County, Georgia, schools and took a business administration course in Columbus. In 1922, she came to work at the Academic Department of the Infantry School and ten years later transferred to the reproduction plant where she

only the distinction of being the only woman employee.

Mrs. Morris is a comparative new-comer but, like most of the other successful women at Fort Benning, is a graduate of Industrial High in Columbus. She transferred to Fort Benning from Camp McClellan. As junior administrative assistant in the motor transport division of the Ordnance Department, her duties are purely administrative, requiring considerable tact in handling personnel. She handles payrolls, supervises employees and co-ordinates the distribution of correspondence in addition to other clerical duties.

CHIEF CLERK
A graduate of Lanier High School in Macon, Georgia, Jennie M. Robinson, chief clerk for the new civilian personnel branch at Fort Benning, resided in Macon until November, 1929, when she began working at Fort Benning.

Her work at Fort Benning for the first five years was with the constructing quartermaster and during that five years much of the permanent construction on the post was accomplished under the supervision of the quartermaster.

Among the projects completed were the Infantry School building, the post chapel and many sets of quarters for officers and non-commissioned officers. Betjeman Bridge and various barracks were also built by the constructing quartermaster during this period.

Transferring later from the constructing quartermaster's office, Miss Robinson was engaged exclusively in personnel work until Sept. 1 when she was assigned as chief clerk of the new civilian personnel branch.

RESPONSIBLE POSITION
Miss Mary Harris, native Georgian, had two years of study at the University of Georgia before coming to work for the government at Fort Benning.

She was employed in the administrative department of the Quartermaster Office on the post from 1925 until April, 1941. Promoted to junior administrative assistant in April, 1941, she was charged with accounting for all funds expended by the Quartermaster and now holds one of the most responsible positions at Fort Benning.

FEMININE SOLDIERS
Two hard-working "feminine soldiers" of Fort Benning are Mrs. Mattie H. Bray, only woman employee of the reproduction plant and Mrs. Dorothy B. Morris, junior administrative assistant in the motor transport division of the Ordnance Department.

Mrs. Bray was educated in the Quitman County, Georgia, schools and took a business administration course in Columbus. In 1922, she came to work at the Academic Department of the Infantry School and ten years later transferred to the reproduction plant where she

only the distinction of being the only woman employee.

Mrs. Morris is a comparative new-comer but, like most of the other successful women at Fort Benning, is a graduate of Industrial High in Columbus. She transferred to Fort Benning from Camp McClellan. As junior administrative assistant in the motor transport division of the Ordnance Department, her duties are purely administrative, requiring considerable tact in handling personnel. She handles payrolls, supervises employees and co-ordinates the distribution of correspondence in addition to other clerical duties.

WITH BENNING 16 YEARS
At present purchasing and contracting clerk for the District Motor Transport offices is Mrs. Clara M. Zehrbach, who has been a Fort Benning employee for 16 years.

Besides being one of the busiest women at the post, Mrs. Zehrbach has a distinction of which she is even more proud—she is a grandmother, having three sons and two grandchildren.

She started work at Fort Benning in the Quartermaster Office under Capt. Lipell, now retired, but who at that time had about a dozen different jobs to perform with the assistance of Mrs. Zehrbach.

Colonel Stephen B. Massey, now post quartermaster, was utilized as "Captain Massey" at the time. Mrs. Zehrbach stayed for nine years in transportation and billing offices there to perform transferred to the district motor transport offices.

"PIONEERS"
Two feminine "pioneers" are Miss Estelle Patrick, secretary in the judge advocate's office at post headquarters, and Mrs. Frances Alford, assistant to the personnel sergeant major in headquarters.

In November, 1940, post headquarters was separated from the Infantry School and established as an independent organization. Lt. James E. Freeman, present executive officer of the post, was then a master sergeant, was named to organize a civilian and military staff for the headquarters and under his guidance the present staff of nearly 50 civilians and as many officers and enlisted men was built.

Miss Patrick and Mrs. Alford were the first civilian employees under the new set-up. At that time, the present commanding general of Fort Benning, Brig. Gen. Walter Scott Fulton, was post inspector and later executive officer before assuming command of the post.

Miss Patrick, a native of Columbus, was educated in Columbus schools and in the John Muir High School in Los Angeles. She is a graduate of the Jordan Industrial School. Before coming to post headquarters, Miss Patrick worked at the Infantry School and the Tank School and since she has been at headquarters, she has worked in the personnel section for the judge advocate's department.

Mrs. Alford, formerly Miss Frances West, is a graduate of Columbus schools. When she first came to Fort Benning, she worked in the post quartermaster office, coming to headquarters in November, 1940, to be secretary to the post adjutant, and working as civilian personnel secretary before assuming her present job as assistant to the personnel sergeant major.

Talking It Over

reassures an anxious mother concerning her son.

Chaplain Minister To Us Needs at Fort

A \$70,000 chaplain of each faith or two of any faith which would be the ministrations of a chaplain.

In religious worship, the chaplains of the different faiths minister to the needs of the men of his faith. However, in welfare cases there is no such division. Whoever is on duty or in the office at the time takes care of a particular soldier's needs, regardless of his church affiliations.

LT. Col. Frank, chief of chaplains, coordinates the various cen-

son said that the chaplains of the various faiths are several in the various sections of the church. Jewish services are held four times weekly. These services are not formal as the soldiers participate in them. Following the reading of the Scriptures, the chaplain broaches an important Jewish topic of current nature of vital importance. The soldiers enter into free and frank discussion of this subject, and at the conclusion of it the rabbi gives a summary of the points brought out, together with his own reactions. These have proven to be very interesting at Benning. There is moreover a specific objective underlying these discussions. The plan is to prepare the Jewish soldier for intelligent American leadership in the Jewish communities throughout the country during the post-war period.

For the chaplain's work in a regiment like ours is an understanding service, based on a hierarchy of values," writes a Fort Benning chaplain. "Automatically, in the life of a chaplain God comes first. The externals of military etiquette do not blind the chaplains to the fact that civilians and privates are important because they have souls to save."

206 MEN

Army 'Doc' Tells How To Fight Common Colds

Oil, Nose Drops,
Cathartics Taboo;
Urges Rest, Isolation

Fighting the common cold in the Army is a big winter job for medical men, and some of the things learned in the Army medical practice may well be applied to civilian life, according to Major Sam P. Wainwright, Army Medical Corps, stationed at Fort Benning.

Maj. Wainwright told of latest developments in battling the common cold, which annually takes toll of hundreds of thousands of man-hours from work in this country and frequently leads to complications, in a talk before the P-T-A of the Fort Benning Children's School.

"While no experiments are being made here at Fort Benning just now, some have been conducted on the Post recently, and a good deal has been learned about fighting the cold," he said. "One of these blasted ancient ideas that a cathartic was 'always needed' in combating the common cold."

"One group of 500 men were treated for colds with use of cathartics while another group of 500 was treated without their use. A large percentage of the second group was returned to duty in shorter time than those from the first group."

"Use of irritating drops in the nose, use of sprays, and other home treatment of colds is gener-

ally of little use and may even lead to serious results. One result from use of oil drops is lipid pneumonia, caused by the material getting into the lungs.

"Not everybody who sneezes has a cold while many others are prone to have colds that start with a slight sore throat, so they do not realize it is actually a cold. Home treatment frequently, therefore, is a bad idea."

"The best thing is to isolate ourselves as soon as we feel a cold coming on. Take a good deal of liquids. Get as much rest as possible. Unfortunately this cannot always be put into practice, especially in the army where sometimes a cold may sweep through a whole platoon or company. The practice in the army, however, is to put the soldier into the hospital whenever there is a fever. In civilian life it is often

much easier for the individual to go to bed—a couple of days off to fight the start of a cold may save a great deal of loss of time later when the cold has developed.

"Use of mild antiseptic solutions for colds starting in the throat may frequently help in heading off the development also. In any event it is a very good idea to go to bed since the cold attacks the tired and run down soldier or civilian much easier than the one with a reserve of energy."

11TH ARMORED PROMOTES

The following enlisted men have received promotions in the 11th Armored Regiment of the 10th Armored "Tiger" Division:

T-5 Luis Barber, Headquarters Company, to sergeant; Pfc. Walter Pietryka, Company G, to corporal; and Pfc. Joseph Metesh and Raymond Seeley, both of Company G, to T-5s.

SCOTT FIELD, Ill.—Two soldiers stationed here hopped a ride to town with a friendly motorist, but one of them lost his teeth in the car. The motorist found a set of uppers and wrote the Field in an effort to locate the soldier who had lost them.

Moral: Keep your mouth shut when riding with strangers.

'Keep Em' Happy' Is Theme Of USO Clubs In City

Five Clubs and Service Bureau Aid Troops From Fort Benning

Covering the fields of service and entertainment—from arranging weddings to providing a sharpener for one's pencil—is the purpose and the theme behind the United Service Organizations in Columbus. The six organizations which make up the USO maintain five clubs and one service bureau for the men of Fort Benning.

The largest and newest USO club in Columbus is the one on Ninth street and First avenue. This club is run jointly under the auspices of the Jewish Welfare Board, of which Edward Korn is director, and the National Catholic Community Service, which is headed by Eugene Bergman. The main feature of this club is the enormous auditorium which can be adapted to any use. In the past, dances, parties, breakfast meetings, movies, concerts, and sports contests have been held in the auditorium. But this is not the only feature of the club. Numerous clubrooms, a lounge, lunch counter, showers, and various games help keep the boys occupied.

In contrast, the oldest USO in Columbus is the Army-Navy-YMCA located on West Eleventh street. Originally an old factory building, the Army and Navy Y opened because of the demand of a recreational area for the men of the 1st Infantry Division, which was stationed at Fort Benning at the time. Later it was turned over to the USO. H. J. Sims, director of the club is mighty proud of its fine dormitory, new kitchen, open air patio, lounge, pool tables, art room, craft room, and many of the other features. In fact, as he puts it, he is "mighty pleased with the entire club." Open all night, to accommodate soldiers arriving in town during the night, the club features a lunch counter that serves the boys 24 hours a day.

The USO-YWCA located at 1425 Third avenue, helps solve one of the problems confronting the average G. I. The problem: Where to find a place to live for the visiting wife, sweetheart, or relative. The answer—the YWCA. New and comfortable beds provide housing facilities for 23 women on the second floor of this building. A beautiful garden next to the building was arranged by the Junior League and the landscaping and abundant supply of shrubs was made possible by the United Garden Clubs. A fish pool, adequate fireplace and badminton court are found in the garden. With the use of large portable tables and chairs more than 150 persons may be accommodated at an outdoor luncheon or buffet supper in the garden. During the week organized clubs meet in the evening for informal recreation, dancing instruction, bridge instruction, parties and invitation dances. The example:

outstanding part of the program is the Army wives.

KEEPS WIVES ACTIVE.

This club plans programs for wives of the men of Fort Benning. Miss Anne Frasure, formerly Executive Secretary of the community YWCA at Daytona Beach, Fla., is the director. Last but not least of the services afforded the men of Fort Benning is the chance to have a real home-style wedding. The Y makes all the arrangements and the only thing that the groom has to produce is the bride.

The Salvation Army maintains not one but two separate clubs. One in Columbus and the other in Phenix City. The Columbus club is located at 1323 Broadway under the direction of Adjutant and Mrs. Thomas Evans. Housed in an old Methodist church, the club found that the building was under the direction of Adjutant and Mrs. Thomas Evans. Housed in an old Methodist church, the club found that the building was under the direction of Adjutant and Mrs. Thomas Evans.

The other Salvation Army Club is the only USO Club in Phenix City. Headed by Adjutant C. L. Andrews, the club has the same features of the one in Columbus. Newer and one of the nicest looking clubs, the club is always on the go to find better and finer things for the soldiers to do.

After describing the clubs one finds that more needs to be told. The USO does things for the boys that can not be included as part of the club and yet the club pays the expenses for these things. For example:

The NCCS sponsors the Columbus Symphony orchestra and

the Community Chorus, both of which are made up of soldiers and civilians. Then there is the fine service some of the clubs are doing to aid men looking for rooms for their wives and themselves, shoppers service, record making, special cooking clubs for men, and many things that they can't be listed.

But the job isn't done. More and more must be added to the clubs and other facilities of Columbus in order to make this town an example for the rest of the community.

FETE MILITARY MAIDS

Dancing beneath swaying palm trees and colorful decorations depicting beautiful Hawaii, the men of the 10th Armored "Tiger" Division played hosts to the Military Maids of Columbus last Thursday night at Service Club No. 2. Miss Jean Edenfield entertained those present with two songs, "Blue Hawaii" and "I Want to Go Back to My Little Grass Shack" and later, in her Hawaiian costume, did the hula dance. Miss Edenfield lived in the islands for several years and is an accomplished dancer.

Music was furnished by the 11th Armored Regiment dance band.

Fort Benning Utilities Could Provide For City Of 150,000

Post Engineer Can Tackle Repairs Of Almost Any Kind

Put up a name sign on an officer's house.
Fill in a hole in a road.
Repair a damaged power line pole.
Fix a gas main.
Make major repairs to a saw mill.

Throw up a pontoon bridge over a raging stream and then repair a concrete bridge washed out by a "flash flood."

Such orders are all in a day's work for Post Engineer's office at Fort Benning, where an engineering staff, public utilities staff, and laborers sufficient to take care for a city of 150,000 or larger is maintained the year around.

Col. A. J. Bain is Post Engineer for Fort Benning and under him are the 1,900 civilian employees who perform not only the duties of the city engineer's office of a metropolis, but who also perform the same jobs as the electric light company, gas company and the water department of a large city.

Reading the civilian staff is W. A. Ford, administrative assistant, who has had 20 years of experience in the office. When rapid expansion began at Fort Benning a nucleus of other civilians who had from 15 to 20 years experience were called in to train the rapidly expanding staff, so that work of the office has run smoothly.

At each Army Post there is an officer who is a member of the

Post Commander's Staff, charged with the maintenance and repair of buildings, structures, grounds and utilities and all of the permanent installations; operating the utilities, construction of additions, extensions and alterations, or the rehabilitation necessary for the proper discharge of maintenance, repairs and operational work.

ALL IN A DAY'S WORK
That's Colonel Bain's job at Fort Benning. With the rapid expansion of construction put up by the Area Engineer's office, the work of Colonel Bain and his Army and civilian assistants has grown more demanding as each day passes.

Exactly as in a city, one of the principal essentials of an Army post is a supply of water. At Fort Benning there are two large pumping filter plants, with a capacity of 9,000,000 gallons daily, which supplies the personnel in the Georgia part of the Reservation while the Alabama area is supplied from wells.

Again, exactly as in a big city, the Post Engineer maintains a department to analyze the water. Here the chemists not only make daily analyses of water for Fort Benning, but for nine other Army Posts in Georgia, Florida and Alabama. Each day samples of water are sent to the Fort Benning laboratory and if any slight trace of contamination is discovered, the Commanders are immediately notified and proper measures are taken to provide a water supply that is absolutely free from any contamination. The water system is constantly under pumping pressure so as to provide adequate supply for the fire department.

Miles of water mains, ranging from 14-inch pipe down to the small pipe line supplying some of the smaller quarters are maintained. The system of standard fire plugs also is maintained under this department, and maintenance of the entire fire department also is the job of Col. Bain.

Current for electric lighting and for cooking in many mess halls is supplied from the Georgia Power Company. The Engineer's office maintains 326 miles of electric lines on the Post. All of the maintenance, repair, operation and construction of electric generating plants, transmission and distribution systems, together with installation of motors, ranges and other electric appliances are handled here.

COL. A. J. BAIN

Twenty-six miles of gas pipe

Extermination of insects, vermin and rodents is just one of the little things that the office handles. This work alone takes from 75 to 100 men and thousands of gallons of mosquito destroying material is used as spray for water and swamp lands each year, while in some instances whole areas are drained in order to eliminate the mosquito nuisance.

With more than 3,500 buildings now in existence on the Reservation, one of the major problems of the office is the maintenance and repair of them. These include sheds, tanks, warehouses, administrative buildings, schools, barracks and others. In addition, the office must maintain water tanks, bridges, fences, the parachute jumping towers, flag poles and other structures.

Still another major project is the maintenance, repair and construction of roads, walks, parking areas, taxiways, driveways and runways. There are about 75 miles of paved roads and 200 miles of unpaved roads and more than 40 miles of paved walks. Then there are many concrete-steel and wooden bridges, ranging from small crossings to a large highway and railway bridge.

An emergency job that once confronted the office was the washout of a bridge by a flash flood. A pontoon bridge was quickly thrown up and later the concrete bridge was repaired and put back into use. It was all in the day's work.

FORESTRY PROBLEM
Considerable areas of forest require attention the year around, and trees are "harvested" when they should be cut, in order to prevent loss of good timber. Three sawmills saw up the logs into timbers and lumber and also supply firewood. In the way no waste is allowed.

Even the sawdust from the mills is put to use. Recently Colonel Bain conceived idea of utilizing the sawdust piles to fill in around the parachute towers to make a better landing field. Some of the large timbers and the heavy lumber from the sawmills was used to lengthen runways at Lawson

of natural gas. Repair, maintenance, installation, operation and extensions to the gas service, together with repair of gas-burning equipment is handled through the Post Engineer's Office.

An addition to the gas supply, there also is the problem of determining the need, specifications and quantity requirements and putting in the requisitions for coal, coke, fuel oil or other fuel. Then, too, gasoline must be secured for the fire apparatus and all of the other motor vehicles assigned to the office. This includes, heavy road machinery, shovels, graders, bulldozers, tractors, pumps.

Operation of all of the central heating and power plants must go on smoothly. There are three large central heating plants and a number of smaller units, making a total of 3,500 different heating units, to be maintained and operated.

At the same time, the office maintains five ice and refrigeration plants on the Post. Not only are there walk-in boxes with refrigerating coils and services the large kitchen refrigerators on the Post.

Then, after preserving the food, the problem of collection and disposal of garbage after thousands of hungry men finish their "three squares" a day comes up. The office maintains three large incinerators and besides that, maintains and operates the sewage collection system, tramps and plant operation. There are about 78 miles of sanitary sewer lines at Fort Benning and about 28 miles of storm sewer lines.

A modern fire department with a crew of 145 firefighters, maintaining 19 motor vehicles, all modern type pumps, serves the Post. The Post Engineer provisionally maintains, repairs and operates the fire protection equipment, sprinkler systems and the alarm systems and provides and trains the personnel.

HOUSING FOR CIVILIANS
The Post Engineer also is charged with the maintenance, repair and management of the recently announced civilian housing project on the reservation. This includes supplying of food and housekeeping. There now are accommodations ready for occupancy soon by about 300 civilians, Colonel Bain announced.

Extermination of insects, vermin and rodents is just one of the little things that the office handles. This work alone takes from 75 to 100 men and thousands of gallons of mosquito destroying material is used as spray for water and swamp lands each year, while in some instances whole areas are drained in order to eliminate the mosquito nuisance.

With more than 3,500 buildings now in existence on the Reservation, one of the major problems of the office is the maintenance and repair of them. These include sheds, tanks, warehouses, administrative buildings, schools, barracks and others. In addition, the office must maintain water tanks, bridges, fences, the parachute jumping towers, flag poles and other structures.

Still another major project is the maintenance, repair and construction of roads, walks, parking areas, taxiways, driveways and runways. There are about 75 miles of paved roads and 200 miles of unpaved roads and more than 40 miles of paved walks. Then there are many concrete-steel and wooden bridges, ranging from small crossings to a large highway and railway bridge.

An emergency job that once confronted the office was the washout of a bridge by a flash flood. A pontoon bridge was quickly thrown up and later the concrete bridge was repaired and put back into use. It was all in the day's work.

FORESTRY PROBLEM

Even the sawdust from the mills is put to use. Recently Colonel Bain conceived idea of utilizing the sawdust piles to fill in around the parachute towers to make a better landing field. Some of the large timbers and the heavy lumber from the sawmills was used to lengthen runways at Lawson

"THEY SAID HE WAS TOO SISSIFIED FOR O.C.S., SO I'M GOING TO MAKE A ROUGHNECK OF HIM,— IF I HAVE TO FILE HIS D—N HEAD OFF!"

German-Born, Now Fights For America

He enjoys it. Enjoys what? Why the Army, of course. Pvt. Rudy Wills, guidon bearer for the Motor Maintenance class in the 20th Co. 1st Student Training Regiment of the Infantry School, who was born in Hamborn, Germany, today is an American citizen and soldier, proud to fight for his adopted land.

On December 22, 1936, a husky blond youth, who spoke no English, arrived in America, land of promise and freedom. It would be hard to say what thoughts were his that first time he saw the "Land of Light." Today, it is clear that he thinks this the best country on earth. He spoke no English when he arrived but made haste to remedy this and in a short time became American in speech as well as in heart.

In Hamborn he had finished Gymnasium—comparable to our prep-school, here, and had attended a private military academy for two years. His arrival here and subsequent enrollment at a New Brunswick, New Jersey high school brought him a first-hand acquaintance with English.

Here he also played football, ran the mile, boxed, and skated. Friends were easy to make and he kept them.

A lot of hard work, and lessons Field in order to accommodate the latest heavy type of aircraft.

Not only does the office maintain the roads and the walks, but the engineers maintain about 12 miles of standard gauge track and 20 miles of narrow gauge.

Maintenance, repair and upkeep of the target ranges, from small arms range to anti-aircraft, anti-tank and artillery comes under the office, also.

Problems of soil erosion, too, require constant attention, and the engineers' plans vegetation over bare areas, and protect shoulders of the roads against erosive influence of rains.

To meet requirements of all of the different organizations on the post, there is a constant demand being made for installing various articles of equipment. The office replaces, maintains and repairs all power-operated kitchen mess equipment, cooking ranges, heating plants, stoves, electric fans, ventilation and air conditioning equipment on all parts of the post. The Post Engineer maintains a large warehouse and storage yard, together with plumbing, carpentry, electrical, painting, roofing and sheet metal shops in order to maintain and repair all of the equipment on the post.

Area Engineer Charged With New Construction

Equipped to Erect Anything From Shed To Modern Hospital

Vast construction projects, valued at more than \$30,000,000, are being developed at Fort Benning by the Area Engineer who describes his task as "one of the biggest" engineering feats in the country. Major C. W. Hamilton, the Area Engineer, is chief of the organization which is staffed and equipped to handle heavy work on building small things from a building to a small range shed to a modern army hospital.

Millions of dollars worth of new construction has been handled during the past year by Major Hamilton's office. Hundreds of barracks, scores of mess halls, many recreation buildings, chapels, administration buildings, theaters, warehouses, sheds, school rooms, sewage disposal systems, wells for water—these are only a few of the gargantuan tasks which have been undertaken by the Area Engineer during the past year.

The Area Engineer's office is charged with the construction of new buildings at army posts. In most cases the engineer moves in, builds the buildings, turns them over to the Post Engineer's office for maintenance, and then goes on to another post. But here at Fort Benning, the job of building is so vast that Major Hamilton has been here for more than a year and has set up five sub-area offices in order to handle the administration of the enormous amount of building that he must supervise.

He has at his beck and call enough equipment to construct anything from a job shed to a new hospital. Trucks, graders, draglines, tractors, power shovels, caterpillar tractors and other heavy duty equipment is maintained. A large repair shop is set up to take care of major repairs to anything from a light repair truck to a heavy duty caterpillar.

LARGE STAFF HERE
The main offices house an engineer and drafting section, a safety section, and a general office section. There are 200 on the annual pay roll on the average, while at times more than 1,500 civilians are employed on various construction projects.

The five districts, in each of which is an officer with a complete engineering organization for erecting buildings, installing sewerage, drilling wells or putting in new pavements, are at the main post, Lawson Field, Harmony Church, Sand Hill area and the 117th Infantry Area. The construction superintendent of all of the construction and inspection of the work is a field system. Frequently two or three construction jobs are under way on a major scale, not being within 40 miles of the other.

The Area Engineer's office under Major Hamilton built the parachute jumping towers and the target ranges on the post. Frequently a specialized job comes up such as building a moving target range in a hurry. The office is equipped to do such work with a minimum of lost time or delay in securing supplies.

Much of the work is done under contract but much more is done directly under the watchful eye of Major Hamilton or the officers on his staff. The office is responsible directly to the Corps of Engineers headquarters at Mobile, Ala.

CHIEF LIKES JOB
"I believe that I have the most interesting construction job in the whole country today, and probably one of the biggest," Major Hamilton said. "We cannot divulge the amount of construction now going on, but it is tremendous. I wouldn't trade my job for that of any engineer in the world today."

Major Hamilton was called into active service in October, 1940. He is a veteran of the First World War, having served overseas with the 34th Division in the Field Artillery. He has been a reserve officer since 1927.

Major Hamilton has had a wide and varied experience in engineering, covering more than 25 years. He was electrical superintendent for the Manila Electric company, building most of the electrical system that now is being utilized by the Japanese in

the Philippine Islands. Returning to the United States, he was associated with the Associated Gas and Electric in California, and served for six years as construction officer for the Civilian Conservation Corps in California.

His first job at Ft. Benning was construction of Lawson Field in June, 1941. After the Engineers took over all army construction on Jan. 1, 1942, Major Hamilton was assigned to Fort Benning as Area Engineer and has remained here since.

In addition to maintaining the various shops and equipment, the office maintains a saw mill which cuts into timbers or finished lumber all of the trees that the engineers remove when clearing ground for new projects. This is used in construction and supplies much of the needed lumber and lumbering for heavy buildings.

54th Infantry Bayoneteers Are Winners

55th Engineers Are Vanquished By 4-1 Score

On Guard! Kill! To that signal the 54th Infantry Doughboys charged into the "Mighty 55th" Engineers Friday night at Division Bowl and came out winners in the bayonet fighting bouts. Both teams representing the 54th Infantry won by the scores of 4 to 1.

In the first bout, Sergeant Floyd Taylor, captain of the 54th team, defeated Sergeant Harry Otto, captain of the 55th team. Private Sherman Gytton followed suit and defeated Staff Sgt. Albert Gustitis. Not to be outdone Sgt. Doyle Rambo upheld the banner of the 54th and smeared 1st Sgt. Paul Lerman. In the fourth match Sgt. Bernard Friedman hoisted the 54th banner higher to whip Tech. Sgt. Mangus Mindrebo and in the final match of the first team James Harlan of the 54th scored the only win for his team by defeating Sgt. Chester Derr. Score: Company B of the 54th Engineers, 4 to 1.

The Doughboys came out fighting for that second team win as the second bout opened with Company H of the 54th meeting Company D of the 55th. In the first match Sgt. Paul Thorpe, captain of Company H, started the ball rolling for his team by tromping Staff Sgt. James O'Neill, captain of Company D. Another star was added to the flag of the Doughboys as Sgt. Carl Mullinax put away T-4 Michael Paulish. Lieutenant Thomas Patterson of the 55th team

scored the only win for the Engineers as he disposed of Sgt. Dan Roper. In the fourth match Sgt. John Chalken made up for the only defeat of his team by mopping up on Staff Sgt. Sherman McMillan and the bouts ended when Sgt. Charles Carlson added the fourth win for his team in defeating Sgt. Earl Hughes. Score: Company H of the 54th Infantry four to one for Company D of the Engineers.

Both organizations were on hand to cheer and root for their team and banners waved and the spirit of competition was as keen on the side lines as it was in the ring. Gaiety was added to the occasion by the music of the 11th Armored Regiment band.

Officials for the evening were: Announcer, Major Frank H. Britton of G-3, Scorer, Lieut. Marston Busch of the 80 Reconnaissance Battalion, Referee, Lieut. Jesse Bolton of the 80 Reconnaissance and Judges, Lieuts. L. S. Beasley and Ray Green of the 90th Reconnaissance.

Among the interested spectators were Major General and Mrs. Paul W. Newgardner, Brigadier General Robert W. Grow, Colonel and Mrs. Julian E. Raymond, Lt. Colonel David Spengler and Captain and Mrs. Roger Rawley.

LUKE FIELD, Ariz.—Two soldiers who were listed as "painters" when they entered service have completed a mural at this Post after a stretch at painting numbers on planes.

PFC Francis Dominni of Rhode Island and PFC James W. Newbold of Ohio were painting numbers on aircraft when they received an assignment to give a day room another coat. Instead of slapping on the paint the soldiers produced a large mural. At present they are working on a mural in the Army Exchange at the Post. The job is like pulling guard as they can work only between 10 p. m. and the time the Exchange opens in the morning.

Five New Majors Named At Lawson Field Last Week

Announcement was made today at Fort Benning of the promotion of five captains of Lawson Field to the rank of major. They are: Captains A. D. Adair Jr., Cyril O. Shuler, George W. Gorman, George E. Key and Julian D. Freedman.

Major Key, who is the plans and training officer at Lawson Field, has been at the post since March, 1941. Major Shuler, a graduate of Clemson college and formerly with the U. S. Postal service, is base supply officer at the Field. Major Freedman's duties include those of managing the officers' mess and the Officers' Club.

Major Adair, the Lawson Field adjutant, is a native of Atlanta. He was graduated from Princeton university and did graduate work at Emory. Major Gorman, the base administrative inspector, is widely known as an athlete and last spring was the playing manager of the Fort Benning baseball team. He is a former Notre Dame athlete.

When he received 48 letters and cards, all at one mail call. Some of them were sent airmail and all of them were from his wife.

Women Workers Cheer Soldiers Through Post Red Cross Chapter

Seven Sections Spend Long Hours on Variety Of Helpful Duties

Making life a bit brighter and really aiding those who need it are the hundreds of women of the Fort Benning Chapter of the American Red Cross. Breaking the work up into seven departments, this chapter covers every form of Red Cross work that can be done.

Under the direction of Chairman Mrs. Walter Scott Fulton, wife of Brig. Gen. Fulton, Post Commander, the Auxiliary and Volunteer Special Service unit has really grown to enormous proportions. Working night and day, many of the women don't start working for the Red Cross until they are through with their regular day's work. A resume of the different sections of the unit follows:

FIRST AID
This section trains others in the art of first aid. Covering both the elementary and advanced courses, the lessons take place in the evening. Many of the colored maids working on the post have volunteered for the course, which is given Mondays and Tuesdays at Service Club No. 4. This is the first class of its type in the history of Fort Benning. Mrs. Wilfred Jackson is chairman of the section.

Headed by Mrs. Richard Coursey, the Gray Ladies visit patients in the Post hospital, run errands for them, play games with them, and just try to make the lives of the shut-ins more pleasant. The name of the Gray Ladies is derived from their uniforms, which are all gray with a gray veil. In order to do this type of work, the women must pass a strict interview and then take an intensive course of study.

MOTOR CORPS
Dressed in their smart tailored blue-gray uniforms and jerseys, caps tilted at a chic angle, the Motor Corps serves the staff of the Station Hospital. They used their own cars before gas and tire rationing went into effect and now must be always on the alert. Monday through Friday, from 9 to 12 in the mornings and Friday afternoon, the women of this section take over the Red Cross work room. The workers must wear a wash dress and a cotton covering for their hair, making sure that there isn't any lint on them. This is a tedious job and must be done to the nth degree of perfection. Who knows but that the bandage that some woman folds may someday be used by her son or husband? Ninety per cent of all bandages finding their way into the war are done by volunteers. The call for more women and still more women to help do this work has been issued by Mrs. William Denton, chairman of the group.

SEWING AND KNITTING
Under the direction of Mrs. Paul W. Newgarden, wife of Maj. Gen. Newgarden, commanding general of the 10th Armored Division, the sewing and knitting sessions are held twice a week in the Red Cross work room. The women knit all types of military articles, such as socks, sweaters, caps and masks. In the sewing section, children's clothes and women's dresses are made. These are sent overseas to England.

STAFF ASSISTANCE
The job of this section is to assist the regular workers of the Red Cross. Dressed in their yellow uniforms and veil, they are found behind information desks, wrapping packages, and doing clerical work. Mrs. Leven C. Allen, wife of Maj. Gen. Allen, commandant of the Infantry School, is the chairman. Anyone can have their packages wrapped by this organization. In order to insure safe passage through the mail, the parcel must be wrapped properly. The staff has been instructed in the proper handling.

SURGICAL DRESSING
Looking every smart in white uniforms and caps with navy blue cuffs and veil, the instructors of the Surgical Dressing

Miss Bagley Is First Woman With Paratroops

Miss Mattie Kate Bagley, prominent in state and national club circles, is the first Civil Service employee and the first woman to work for the Parachute group. She is a native Georgian, member of a pioneer family. She is a past president of the Georgia department of the American Legion Auxiliary, has served as president and has held just about every office in the local Legion Auxiliary; served as the Georgia member of the national executive board of the American Legion Auxiliary; was FIDAC speaker at the first state Defense Conference in Georgia. She was legal secretary in the Housing Authority in Washington; was legal secretary in the chief attorney's office in the Veterans Administration in Atlanta; was selected by the Georgia Department of the American Legion to take part in the national celebration of Armistice Day in 1938 by placing a wreath on the tomb of the Unknown Soldier at Arlington Cemetery.

MRS. WALTER SCOTT FULTON

rationing went into effect and now must be always on the alert. Monday through Friday, from 9 to 12 in the mornings and Friday afternoon, the women of this section take over the Red Cross work room. The workers must wear a wash dress and a cotton covering for their hair, making sure that there isn't any lint on them. This is a tedious job and must be done to the nth degree of perfection. Who knows but that the bandage that some woman folds may someday be used by her son or husband? Ninety per cent of all bandages finding their way into the war are done by volunteers. The call for more women and still more women to help do this work has been issued by Mrs. William Denton, chairman of the group.

JUNIOR RED CROSS
Unique is the purpose of this section. Under the direction of Mrs. J. D. Rosenberger, the school children of Fort Benning, wrap and mail, to all corners of the world, for needy civilians and our Allies, Christmas packages. All the articles that go into the packages are donated by the children themselves and consist of soap, bobby pins, candy, toys and any type of article that someone somewhere may find of use. Last year, the children enclosed a card in each box telling from whom the package was. In short order, answers were received, thanking them for their fine work.

The secretaries of the Auxiliary and Volunteer Special Service are Mrs. G. P. Hoyell, wife of Brig. Gen. Howell, commandant of the Parachute School, and Mrs. John B. Townsend.

All in all, much fine work is done by the Fort Benning Red Cross and the chapter will continue to do fine work, but they must have the assistance of every woman on and off the reservation. They must have volunteers to carry on the work. And that doesn't exclude the men. They can do something to help too.

afternoon. They have supervised play periods, lunches with proper diets, all under trained workers. There is a craft room for the use of all tenants and for the Boy Scouts for regular meetings. The rental and business offices are also housed in the building. Another feature of the Village are the supervised playgrounds for the many small children living with their families in the apartments. There is a library for tenants in the maintenance building.

Feature of the Village will soon be the new Baker Village School which will include all of the elementary grades and the four high school grades. The school will be one of the most modern in the state and will be equipped with

Baker Village and Benning Park Ease Housing Shortage Here

Housing, one of the most vital problems at all of the nation's Army posts, has been partially solved at busy Fort Benning by the Baker Village and Benning Park Homes, developments of the Columbus Housing Authority.

Hundreds of junior commissioned officers and non-commissioned officers with their families are living in the apartments provided in the two communities but despite the many apartments in Baker Village and Benning Park there is still a shortage of rooms, apartments and homes in the Columbus-Fort Benning area.

At Baker Village and in Benning Park, every effort has been made to offer as complete a program as possible for the men and their families—most of whom are far from homes and friends.

In addition to providing heat, clean apartments equipped with electric refrigerator, stoves, hot water heaters and space heaters and rented for a minimum price, the Columbus Housing Authority is endeavoring to present a well-rounded program of social, educational, recreational and religious activities.

Work was first started on Baker Village in September, 1939, and the first tenant moved in on January 30, 1940. The project, consisting of 612 apartments with from two to three bedrooms, a bathroom, kitchen and living room, cost approximately two million dollars. Living there are civilians who work at Fort Benning and non-commissioned officers of the first three grades. Present rent for apartments is \$22.50 and \$25.00, depending on the size of the apartment. Water and lights are also furnished.

DIVERSE ACTIVITIES
Most social activity and business administration centers around the Administration building. The auditorium is used for parties, dances, teas and other social affairs and entertainments, handled by a recreation committee. A nursery school for pre-school children is maintained in the building where children from the ages of three to six years are cared for from 10:15 a. m. until 4:15 in the

The saying "once an Army man, always an Army man" was borne out this week at Fort Benning when this old photograph was unearthed. The snapshot, taken many years ago at Fort Adams, Rhode Island, when that camp was a Coast Artillery post, shows a group of Army children gathered on the steps of one of the post's buildings after a party.

The interesting coincidence about the old photograph was the fact that several of the boys and girls in the snapshot are now high-ranking officers in the Army or are the wives of high-ranking officers, some of them still at Fort Benning.

Local residents picked out the following men and women well-known at Fort Benning and in Army circles at the present time.

Top row, second from left, Maj. Gen. Paul Newgardner, commanding general of the 10th Armored Division; second row, left, Col. George J. Newgardner, brother of General Newgardner.

Second row, second from left, Polly Lundeen Tupper, wife of Col. Sevier R. Tupper, commanding officer of the Infantry School Service Command; third row, fourth from left, Lella Harrison Keyes, wife of Maj. Gen. Geoffrey Keyes, former of the 2nd Armored Division; fourth row, fourth from left, Col. Clarence R. Townsend, brother of Mrs. Helen Townsend Allen, wife of Maj. Gen. Leven C. Allen, commander of the Infantry School, and Mrs. Allen.

The snapshot was given to Mrs. Keyes by her brother.

Post School Grads Give Cheers For Miss Grimes

Little Schoolmarm Taught Many U. S. Officers

Several high ranking officers today—and the sons and daughters of some of the highest general officers in the Army of the United States as well—can boast that they actually went to school in Fort Benning's version of "the little red school house."

Because the fine, modern Children's School on the Post is the direct descendant of a little schoolhouse that was established in 1922 in an abandoned barracks of the present site of the swimming pool.

But it isn't the pretentiousness—or lack of it—of the building or the equipment that makes a school in free America—it's the quality of the teachers and their love of teaching the children in the American way of life that most of them remember even today.

And they prove it almost every day. Miss Grimes recalls that Lou Grimes, the teacher who has been the guiding light of that little school which grew into the modern school. "Hardly a week goes by but a lieutenant or captain or major or the son or daughter of some figure in the news of the world today, drops in to visit with her."

There is Major Wood Joerg, for instance, and Major Joseph Sullivan, Jr., to name only two who have visited her not so long ago.

SON OF GENERAL

Major Sullivan is the son of the famous general who now is in China. The Sullivan's used to say that their life was "China and Fort Benning and China and Fort Benning." The family rotated in about that manner, they used to say. The Major himself spoke Chinese like a native and once was called in as an interpreter and guide to a group of visiting Chinese generals on the Post. Benjamin, another son of General Sullivan, well, now about 15, could speak Chinese much better than English when he first came to school, Miss Grimes recalls. The family now is in California while the General and the Major are on fighting fronts.

"Many of the boys who came to school here now are majors," observed Miss Grimes, "and I'm looking for them to advance rapidly these days. I want to see some of them generals next time they come back to see me. Some of them went to school in the original building when we had desks that were made for adults and the little boys and girls had to get on their feet to rest on them. But they must have learned their lessons all right, for many of them are advancing rapidly, not only in the Army but in various walks of civilian life."

The original school, established in 1922, was close to one of the barns on the old Bussey Plantation. The barn was used for a reproduction plant, theater in those days. Also nearby were the print shop and the "Infantry School News" published in a tiny building, as well as the sales store. The playground was behind one of the buildings, with an old silo at one end. There were three teachers and 60 students. A stove in each of the four rooms heated the building. Partition didn't go all the way up to the ceilings.

GIFT FOR SCHOOL

The school stood there for ten years. The first part of the present building was put up in 1931 and Major and Mrs. Benjamin Ferris who had left the post but who remembered the schooling that their two boys, Sumner and Benjamin, had received there.

AND THE SECRET WEAPON *** Basil Rathbone and Nigel Bruce.

Armored Force Private Yearns for Parachute

Most of the men who prepare for the Armored Force at Fort Knox, Ky., get a kick out of the rumbling tanks and blasting guns, but Pvt. Tom F. Wilson has a yen for parachuting and nothing but the Paratroops will do for him.

Pvt. Wilson's parachuting career began in the summer on the order of his commanding officer, 1st Lt. Jasper, Ala., when he and his wife went over to the county fair and heard some traveling showman offer \$100 to anyone in the audience who would make a jump from his free balloon.

He only had time to make the offer once before Pvt. Wilson was up there saying, "I will." That was the end of the offer. Wilson had ever made up to that time. During that same summer, he made two more jumps for the same man at the county fair, but in different parts of the country.

He happened to be visiting some friends in Vernon, Fla., and he ran into the same man there. He made the jump and pocketed another \$100. About a month later, he made a week-end trip to Gainesville, Fla., and there was the same fair, so he made another \$100.

While the U. S. Army can't quite make the \$100 a jump, Pvt. Wilson still wants to become a paratrooper.

At Camp Pickett, Virginia, Sgt. Jess Kent is putting over an idea that has his girl frantic and is beginning to worry the girls of other soldiers. Sgt. Kent is keeping his shoe-shine bright for inspection by covering it with clear nail polish. And where do you suppose he gets the polish?

Peeks at Pics

Cpl. Solomon Kleindorf With the name, Casablanca on the front pages of all the newspapers in the country and possibly, the world, gives Warner Bros. more publicity than any hundred publicity men could. Warner Bros. has just completed a picture entitled "Casablanca" telling the story about the town since the fall of France. Starring Humphrey Bogart, Paul Henreid, Ingrid Bergman, Claude Rains, Conrad Veidt, Peter Lorre, Sidney Greenstreet, S. Z. Sakall, and many others, the story deals with a famous French patriot (Paul Henreid) who tries to escape to America through Casablanca in French North Africa. Because it is an unusual story, it is not touched by the Nazis (legally he can be stabbed in the back up some dark alley. . . . A picture owner (Bogart) has pattern in his possession that can get Henreid out of the country safely, but because Henreid's wife (Ingrid Bergman) is in love with him, she refuses. . . . Conrad Veidt plays the Nazi hunter and Claude Rains does a masterful bit as the French Commissioner. . . . What a splendid happens to the patriot and his beautiful wife makes the picture a delightful evening's entertainment.

Now we come to the movie of the week, "Springtime in the Rockies." Starring Betty Grable, John Payne and Carmen Miranda, with a fine supporting cast, Cesar Romero, Harry James and His Music Makers, Edward Everett Horton and Charlotte Greenwood, the story is light and not too fast. Betty may not be able to act, but when it comes to dancing she can wiggle any part of her anatomy that is necessary. . . . So George Raft gave her one with a chain and identification tag. . . . She took a spill during a dance number, so the dance director, Hermes Pan, had the slippery floor covered with finely powdered carborundum to prevent further skidding. Watch for one quickie scene in which Carmen Miranda wears a dress trimmed with three hundred real orchids. . . .

Listen . . . It's Fort Benning

Well, here we go again into another week of radio at Fort Benning. The first station on the order of business is the "Fort Benning on the Air" program coming to you every evening, Monday through Friday over Columbus' own station WRBL at 6 p. m.

Plenty of new talent for this week, more than we have ever seen before in one week's time. Tonight—Pfc. William Jones, a baritone of Co. A, Service Bn., 1st Student Training Regiment. . . . This is the first time for him on this program. . . . He was discovered for us by Brig. Gen. Walter S. Fulton, commanding general of Fort Benning. . . . In a recent program held in honor of the general, he made such a hit that the general told the directors of the program about him and they in turn asked Jones to sing on the air.

Friday will see the "Bond-a-Deers" interviewed on the program in reference to the Fort Benning War Bond Breakfast. Monday there will be a Red Cross interview. . . . E. C. Bussy, field director of the F. B. Red Cross, Miss Hattaway and Col. Noyes of the Station Hospital.

Tuesday and Wednesday will be devoted to new talent. Sgt. Harrie Buzz, Co. C, Academic Regiment, ISSC. . . . will present some of his own arrangements of popular numbers, on Tuesday. . . . The sergeant is from Tampa, Fla., and has played in Miami night clubs before entering the Army. He will play a new arrangement he has just composed on Zex Confrey's "You Tell 'em, Ivorys," as well as "Skylark" and "My Devotion."

Another pianist will be on tap for Wednesday when O. C. John Johansson, 10th Company 1st Student Training Regiment, will play the well-known Hollywood will play and sing some of his own works, including lyrics he has written for Gershwin's famous "Rhapsody in Blue." . . . Johansson has been active in the small theater movement in Boston, New York, and Hollywood, and has appeared with the well-known theatre production on the coast.

He has helped actively in the direction of such movies as "Ten Gentlemen From West Point," "Eagle Squadron," "Thunder Bird" and "The Man Who Came to Dinner."

Presidents of three nations—the United States, Mexico and the Philippines—collaborate over three national networks Sunday, Nov. 15, to help observe Philippine Commonwealth Day. . . . CBS, MBS, NBC-Blue, 5 to 5:30 p. m. The program opens in the new ballroom of the Shoreham Hotel in Washington, D. C., when the Philippine soprano, Enya Gonzalez, sings "Planting Rice" with piano accompaniment by Rudolfo Cornejo. Then, also from the Shoreham, President Manuel L. Quezon of the Philippine Commonwealth speaks, and the United States Marine Band plays the Philippine National Anthem. . . . Next, President Manuel Avila Camacho of Mexico speaks in Spanish from Mexico City. A running translation of his talk is to be given in English. On conclusion of his talk, the Marine Band in Washington will play the Mexican National Anthem. . . . Finally, President Roosevelt has the networks and the program concludes with the playing of the "Star Spangled Banner" by the Marine Band. . . . This program should be of interest to every G. I. on the post.

AIRAVES. . . . Congrats to . . . Sgt. James C. Murphy, Co. M, 26th Infantry for his fine work on the Fort Benning on the Air program last Tuesday. . . . He has a fine baritone voice and can sing those Irish ballads. T-5 Owen J. Remington, for the fine job of lining up this new talent. If I ever produce motion pictures, he will be the first man I hire as a talent scout. . . . Sgt. Delos Andrews and his brand new bride, the former Miss Ruth Pettus, of Dothan, Ala., for being the first couple to be married over the air on a Fort Benning program and also for being the first to be married in a service club. The sergeant is in the "Two-Nine" and is from Elmira, N. Y.

Congratulations FORT BENNING

and "HATS OFF" to American Housewives

We commend the housewife of today for the splendid spirit with which she takes rationing, shortages, salvage of fats and tin, and the many inconveniences in procuring foodstuffs during wartime. We are grateful to her for the cooperation shown in the emergency.

Lawson Field Sub Depot Facilitates

The Lawson Field Sub Depot is a recently organized division, signed to facilitate operations at the busy air base engineering and supply sections. Under the supervision of Major W. M. Chappin, a staff of civilian Civil Service employees carry out the many and varied details of an organization of this type.

It operates under the control depot to which it is assigned, and these control depots are under the supervision of the Maintenance Wing Commander who, in turn, is under the Commanding General, Army Air Forces Maintenance Command.

The Sub Supply Depot conducts all supply operations heretofore assigned to the station supply department. It maintains the accounts records of the station, receives all incoming shipments and delivers supplies to all unit supply officers. At Lawson Field this includes the purchase of parts for all planes at the field as well as the fuel. It also has under its control the four warehouses and the Personnel Sub Depot, located in Air Corps Supply, keeps all records of civilian personnel including time records, pay roll and medical reports and charts. This office is under the supervision of the station and the direction of Miss Mildred Price.

NOT PART OF TRAINING.

At Camp Wolters, Texas, the other day a group of soldiers under full pack was going through an obstacle course. The leading man grabbed a rope, swung out over a mudhole and landed kerplunk in the slush. One by one the others followed, each landing with a dull thud in the mud. Then and only then did the soldiers learn that they weren't supposed to fall in the mud at all—the lead man slipped.

Laughs Aplenty Afforded By Special Service Shows

Col. Finnegan Aids Soldier Morale By Sponsoring Shows

A half million Fort Benning soldiers have enjoyed a good laugh in a good song in the last 12 months through the untiring efforts of the special service officer at post headquarters.

This estimate was disclosed this week when the entertainment and recreation program carried on at Fort Benning during the last year was reviewed. At the same time, Lt. Col. Charles C. Finnegan, special service officer, announced plans for an even more ambitious winter program for the coming months with a number of units scheduled to play at Fort Benning and a number of soldier-shows planned for the various regimental areas.

When the action was thrown into the last December, the efforts of morale workers to bring first class entertainment to the soldiers in training in the service camps throughout the country were redoubled.

Forerunner for most of the professional talent which has been parading through Fort Benning and other posts in the last 12 months was the Citizens Committee for the Army and Navy, Inc., which brought four mobile entertainment units to Fort Benning during the early summer months.

Late in 1941, the USO-Camp Shows, Inc. was organized to take over the entertainment of the station's soldiers and a regular procession of good road shows was the result early in 1942.

A total of 13 "major" or large units playing in War Department theaters and in outdoor arenas have visited Fort Benning to date and six "minor" or smaller units have played in the various recreation halls and hutments.

The Fort Benning special service officer provided outdoor arenas in order to make more room for soldier crowds and many of the large units here this summer played in Doughboy Stadium, the Hollywood Bowl in the Harmony Church area and Division Boulevard Armored Division, Sand Hill Area.

"JUNIOR MISS" STARS

Outstanding in the series of USO-Camp Shows was the three-act comedy "Junior Miss" and two colored musicals. Top-ranking action appearing during the season were Al Johnson, Mischa Auer and Harpo Marx.

In addition Fort Benning served as the "experimental station" for "sing-song units," groups of four or five entertainers who were so well received at Fort Benning they were later sent overseas to entertain the troops.

All of this professional talent was greatly supplemented by soldier produced and soldier-acted productions such as the summer water show, "Aqua-Poppin'," directed by Sgt. James Wicker, assistant to the special service officer, that played before 10,000 spectators at Russ Pool and was so successful that army officials asked for details on its production. In addition to the many Columbus Defense Council directed by Johnny Clarke, former promoter of soldier entertainment at Fort Benning, presented several well-attended variety shows.

OTHER ATTRACTIONS

There were other attractions that proved popular with Benning personnel. The LaGrange, Ga., All-Girl Band made three appearances; Camel Caravan, four units that were always well-received; General Electric's popular "House of Magic" drew thousands of soldiers to its demonstrations on its production. In addition to the Toppervaults, famous shooting duet, made an appearance; Mary Ann Mervin, singing star of NBC came down for a bonus rally attended by several thousand soldiers and the Gem Razor Blade Company sent a man to make phonograph records of soldiers' voices to be sent home to relatives and friends. There were many other special attractions such as art and photography exhibits placed around in the various service clubs during the last year.

Assisting Colonel Finnegan in the special service office at Fort Benning is Sergeant Wicker, Fort Benning Broadway stage manager. The office cooperates with the various special officers of the Fort Benning officials in arranging entertainment programs.

PRINCE TOTOA AUUELOA, 18-year-old son of the High Chief of Satale Village in Pago Samoa, was questioned in San Francisco last week on charges of being a stow-away. Claiming that he had merely fallen asleep while boarding a gang of stevedores loading the ship at a port near his home, Totoa solved the whole problem by enlisting in the army.

THE GENE AUTRY HOUR, beamed over 115 CBS stations and by shortwave to foreign countries, was the first international radio broadcast from the AAF Flexible Gunnery School at Tyndall Field, Fla. The occasion was the graduation exercises of the aerial gunnery students. Sgt. Autry, now a member of the AAF, participated in the broadcast, which originated in the NCCS-operated USO club in Panama City.

I DON'T SEE WHY THEY CALL YOU "THE MESS SERGEANT," THE PLACE LOOKS PERFECTLY ALL RIGHT TO ME.

8,100 Vehicles A Day Pass Benning's 'Times Square'

MP's Vigilant As Traffic Approximates That of a "Big City"

The next time you drive through Fort Benning's "Times Square"—or in other words Out Post No. 1—notice the dazed, tired look on the military policeman on duty there. Just realize that every 24 hours more than 8,100 vehicles go whirling by that fork in the roads.

With those 8,100 cars going by the Out Post on an average of one car, truck or bus every ten and a half seconds, a serious traffic jam could be caused and the post's war effort seriously impeded if Fort Benning's military police had not perfected a system to "keep things moving."

Lt. Col. Clarence A. Will, provost marshal, this week released a report of a 24-hour tabulation on vehicles moving past the Out Post which disclosed that during that day and night, 4,141 cars, trucks and buses came in and 4,052 went out.

The importance of maintaining clear traffic lanes to and from the post is easily apparent when it is recalled that these 8,193 vehicles carry tens of thousands of soldiers and civilians to and from their duties.

And the problems of keeping this traffic moving along the approaches to Fort Benning at the maximum legal rate of speed are intensified by the fact that the great bulk of this traffic moves through the Out Post between 6:30 and 8:15 a. m. and 4:30 and 6 p. m., according to the poll by military police.

During one "peak" period lately, military police estimated that 1,440 vehicles, or one every seven seconds, were checked in or out of the reservation.

The two-lane Benning Boulevard, the direct route from Columbus through Baker Village, carried the bulk of the traffic, with 2,682 cars coming in by that route, 1,176 by the old Benning Road and 283 by way of Custer Road—the thoroughfare running from the Sand Hill area.

VIGILANT PATROLS

The five or six miles of road in the reservation are well patrolled during the rush hours and usually throughout the day by the motorcycle police who have instructions to keep "things moving" at the legal rate of speed and prevent hundreds of cars and trucks from "bunching up" and slowing the traffic line down.

Adding to the M. P.'s troubles only recently was the task of identifying every person entering the reservation and of checking the legal rate of speed and of preventing hundreds of cars and trucks from "bunching up" and slowing the traffic line down.

Until the present system was perfected there was considerable confusion and a two-hour delay one morning in getting past the Out Post, but now the cars speed along after being checked by three men at the edge of the reservation so that if any civilians are refused permission to enter they won't be well inside the reservation when they are turned back.

"Civilians employees and residents of the post have cooperated splendidly in speeding things up by wearing their identification buttons where we can see them at a glance," provost marshal assistants told the BAYONET.

"Pooling" of rides, requested by Fort Benning officials some time ago to conserve gasoline, is being done to a great extent but there are still many cars passing the Out Post with only one or two persons in them, recent checks disclosed.

Some indication of the value of "pooling" cars can be shown by the fact that these 8,100 cars consume more than 8,100 gallons of

gasoline each day in driving to and from the post to work.

The task of seeing that military personnel at Fort Benning receive enough gas for their important needs is the work of an unique enlisted men's unit of the provost marshal's office—the Gasoline Rationing Board, now under the supervision of Pfc. Louis Lipp, who succeeded Corp. Kalman Rubin as chief of the section.

"NO" IS THE ANSWER

If there is an office where tact, common sense, discretion and the power to say "no" nicely is vitally important, it's the Gasoline Rationing Board.

Although they operate under the supervision of Colonel Will and the assistant provost marshals, the three enlisted men in the section are the authority on whether a soldier should or shouldn't have—because they have worked there so long they have become masters of a difficult problem—gas rationing when they say no to ration gas, not to say no to as many army men as possible," declared Lipp this week.

"Our duty is to get as much gas to a soldier as he is entitled to legally," Lipp and his two assistants, Pvt. Lawrence Feuerstein and Pvt. Ewald Braumann, say "yes" and "no" to ranking generals, colonels, captains, sergeants and privates.

"And each is given the same impartial consideration."

"Our Army men, or the great majority of them, are entirely honest about gas rationing when they come to us and we find the only just way is to treat each case individually because the fact they are Army men means they will have special problems of transportation and change of home that the civilian won't have," Lipp said.

Even as he explained the problems of the Board, which inter-

Beware Soldier; That Steak May Be Booby Trap

The average soldier eats his way into enough high explosives each month to supply the TNT in 10 28 mm. shells—and in addition, enough soap to keep himself and a large part of his laundry clean for several months.

Sounds a bit confusing, doesn't it? But that's the way that Lt. Herman E. Klein, salvager officer at Ft. Benning, has it figured out from tables prepared recently.

Salvage of food from the mess tables in the Army now provides, among other things, much needed greases, used to make both high explosives and soaps. According to the tables prepared by Lt. Klein, the grease salvage per soldier per month will be sufficient to make half a pound of high explosive and three pounds of soap.

Besides this, glue is also made from meats and bones salvaged from the mess halls and still further, the residue from boiling this refuse into glue is used to make animal and chicken food.

Soap and glycerine, the basis for nitro-glycerine, is made from cooked grease and trap grease, taken from traps under sinks, the latter being rendered out to form practically pure grease of high value.

"Jeeps" or Trailer Vans All in Day's Work for 21st QM (Truck) Regiment

Among the many groups and organizations functioning as a part of the world-famous Infantry School at Fort Benning, the 21st Quartermaster Regiment (Truck) occupied a place of importance.

Composed of colored soldiers who hail from all parts of the United States and who represent a variety of backgrounds, this regiment is commanded by Colonel Ellis F. Altman, a veteran of many years in the service.

This is a comparatively new regiment—having been activated in April, 1942—but in the short time of its existence it has made an enviable record. It is designed by the War Department as a truck outfit which means that its daily work hinges around the transportation of personnel and supplies. For this purpose many types of vehicles are assigned to the regiment.

Men with ability to drive, maintain, and service the vehicles are sent to the regiment where they receive the finest of motor training in conjunction with the necessary basic military training. Under the expert supervision of commissioned and non-commissioned personnel, they soon learn to assume complete responsibility for the handling of these various types of vehicles and are able to drive any motor from the smallest "jeep" to the giant trailer van.

FORM CADIES HERE

From time to time calls come from other posts requesting skilled mechanics, motor operators, and even instructors. A goodly number of these requests reach Headquarters of the 21st Quartermaster Regiment, and, within a remarkably short time, replacements are on the way to fill these needs. With the speeding up of the war effort, these requests are coming in increasingly greater

views roughly 400 applicants every day, an officer came in and asked for enough gas to take a short honeymoon. Regrettably he was turned down but when the situation was explained to him, the officer declared he'd take a train and solve the whole problem.

The Fort Benning rationing board is believed the only one in the nation operated entirely by enlisted men, and the trio working there now are working to maintain a record of never having a formal complaint placed against them.

Lipp declared, though, that an even tougher "nut to crack" was coming up in December when the board takes over the task of regulating forms for the periodic tire examinations ordered by the government.

True to past form though the "board" was in conference with a tire rationing expert late last week getting first hand "dope" as Lipp explained so, they'll know the answers when the questions start pouring in.

Did anybody say the M. P.'s didn't put in a day's work?

numbers but the work and training in the regiment is so well organized that qualified men are always ready to leave without lessening the efficiency of the work on the home post.

In addition to the transportation activities carried on by the regiment, the routine duties common to any army unit must be attended to and, for this purpose, men with previous clerical training and experience work in the various headquarters and orderly rooms. Officers work to provide wholesome recreation for the men while others publicize the promotions of these same men in order that the folk back home may be proud of "their boys" progress.

During off hours, soldiers may be seen engaged in spirited athletic contests, while others are attending religious services planned by the Chaplain, and still other men are rehearsing as musical groups to represent the regiment on public occasions.

Working under Colonel Altman is a group of officers, including 39 recently commissioned colored officers. Colonel Altman's staff includes Lt. Col. James E. Darcy, executive officer; 1st Lt. Wilbert D. Meeks, adjutant; Capt. Kenneth J. Atwell, regimental supply officer; Lt. George Schwartz, intelligence and special service officer; and Regimental chaplain, Levi L. Stanmore.

A further breakdown of the

command functions of the regiment finds Lt. Col. Ewell C. McCallum in command of the First Battalion, Lt. Col. William E. Stubbs commanding the Second Battalion, and Lt. Col. Walter Garth commanding the Third Battalion. The Fourth Battalion, a casual detachment, is under the command of Maj. Norman W. Oppenheim, Company "M," 26th Quartermaster Regiment (Truck), commanded by Capt. Addison T. Whitt, and Company "E," 27th Quartermaster Regiment (Truck), commanded by the Lt. Everett Pettijohn, are attached to the regiment.

To sum it all up, the 21st Quartermaster Regiment as a truck unit is contributing in a great way to the work of The Infantry School, and is likewise teaching hundreds of men to live, work, and play together in a patriotic and profitable manner.

QM's Job Is To Keep Doughboy Best Dressed, Best Fed Sodier In World And Benning Is Doing It

Col. Massey's Office Is Bee-Hive of Important Activities

No other branch of Uncle Sam's Army carries the tremendous burden of responsibility in the daily operations of a military post like Fort Benning that is borne by the Quartermaster Corps. The problems involved in feeding three times a day the thousands of men who live in the post, but in addition the Q. M. C. also provides all clothing and equipment with the exception of actual guns and ammunition. The corps operates laundries, maintains the cemetery, runs the fuel stations and ice house, furnishes administrative transportation, and does the bulk of the purchasing and contracting for the entire post.

In the past few months this vast network of activity has been administered daily with clock-like precision under the aggressive supervision of Colonel Stephen B. Massey, recently named director of all supply at the fort. As post Quartermaster, Colonel Massey quickly geared the Quartermaster Corps at Benning to war-time operation and ever since early this year, the Q. M. C. has been on the alert 24 hours a day.

The Quartermaster, during the past few months, has been the "odd-job" man of Benning. At one time and the same time, he has been marketer and grocery-store salesman, haberdasher, miller, truck dispatcher, junk repair man, leaman and shoe repair man.

RESPONSIBILITIES SHIFTED
Until recently, the Q. M. C. also had other duties, but recent reorganizations have shifted some of these to other branches of the service in order that all emphasis might be placed on the paramount problems of supplying food and clothing. All motor transport is now an Ordnance function, and a separate corps has been created to coordinate all transportation problems formerly handled by the Quartermaster Corps.

The Quartermaster office at Benning is ever a hive of activity. It now houses the administrative offices, the purchasing and contracting section, and the supply division in addition to the civilian personnel branch for the entire post. A Quartermaster officer, 1st Lieut. Raymond A. Perry, heads the latter division while 1st Lieut. Charles McKee, another member of the Q.

M. C. is in charge of the transportation activities.

From this headquarters, the activities of the Quartermaster Corps fan out all over the reservation with buildings located in many sections. Huge warehouses are strewn out over a length of almost a mile. The two modern laundries are located in different areas, various repair shops are scattered in different buildings, but everything clears through the main office and the daily functions are performed with amazing efficiency.

Supply, naturally, is the main problem and food is the foremost item. Under the direction of 1st Lieut. Marcus E. Cooper, the substantive officer, all food not only for daily issue, but also for the commissary is procured and distributed. Carloads of foodstuffs arrive daily, and while large stocks are carried on hand, all perishables like fresh fruits, vegetables and dairy products come into Benning every day from nearby sectors. A huge refrigeration plant stores these items until unit trucks arrive to take them to the mess-halls.

Although food is foremost in interest, clothing and equipment are of equal importance. Almost every conceivable item of Army issue is stocked in the Q. M. warehouses. The variety runs from tents to insignia, and the hourly flow of material in and out of the warehouses is gigantic in proportions.

YANK BEST DRESSED

There are many problems incident to the supply of clothing, particularly in order that the American soldier may remain the best-dressed in the world. Correct fitting is difficult but is easily handled by the use of scientific devices, many of them specially created by Q. M. C. technicians. One item not easily fitted is the service shoe, and if a man cannot be taken care of with one of 144 stock sizes, special lasts are prepared for him.

The Benning supply corps provides coal and wood for fuel in vast quantities for both heating and cooking purposes. Oil houses and filling stations are located at strategic points on the reservation and thousands of gallons of gasoline and oil are distributed daily for use by all mechanized equipment. As a sideline, a forage shed is also maintained to provide for the animals in the Infantry School Stables.

Also supplied by the Quartermaster is stationery, printed forms, typewriter office machinery, office supplies and a thousand-and-one other items. Stock reply at Benning is "if you can't get it elsewhere try the Quartermaster Corps."

MOTOR POOL
All motor transportation for administrative purposes is provided by the post motor pool, operated under the supervision of Capt. Walter H. Cook, a veteran Q. M. officer. The administrative transportation involves many different types of vehicles such as passenger cars, station wagons, cargo trucks, and many others.

The Quartermaster laundries, operated under the direction of Major Leslie E. Parker, a laundry operator in civilian life, care for all the soldier washing at the post, and are modern, up-to-date cleaning plants which turn out tremendous volumes of work every week.

On top of all these functions, the Q. M. C. has constantly been

Experts Have Streamlined Army 'Stix'

72-Hour Limit In Getting Records To Capital Hill

"In order to keep tab on new triangular divisions and fast-moving mechanized corps, army statistical methods have been amazingly streamlined," according to Lt. B. E. Moore, officer in charge of the Machine Record Unit at Fort Benning.

"Previously it took three months time for simple personnel changes to reach Washington. Today the machine record units give this information to the Adjutant General on Capital Hill in just 72 hours," Lt. Moore said.

He went on to point out that it would be a physical impossibility to keep track of Private Joe Doakes with the old pen and pencil. For each enlisted man a total of seventeen pertinent facts, including full name, serial number, grade, arm or service, type of organization, company or battery, main civilian occupation, race, station, duty, type of change of status, date of change, and military occupational specialties are listed. In an officer's record there are 11 more facts given.

MOBILE UNITS

Here at Benning Lt. Moore, assisted by S. Miles, Warrant Officer E. D. Lewis, and 64 enlisted men, is charged with keeping the records for Fort Benning and several other camps in this area. Their unit is a fixed one but mobile ones of a similar nature have been perfected for use in the different theaters of operations. These mobile units usually keep books for an army corps, even so, streamlined methods enable them to close down at one location move to another and be ready for work in four hours.

As for the machines themselves, they are the work of perfection in speed and accuracy. A machine record unit can compile a listing of military specialists, such as cooks, bakers, clerks, and mechanics for an entire service command in less than three hours. Over 1,000 officer data cards can be handled, pertinent information gathered and printed ready for use in as little as 40 minutes. This includes arranging these alphabetically and by arm or service, listing serial number, station, organization and grade of the officer. As for accuracy, once the information is correctly punched, into the card, the percent of error is negligible, not even half of one percent.

Besides answering questions of supply and demand of manpower, the machine record unit serves as a means of keeping individual histories, which may later be the soldier's chief means of proving eligibility for pensions, hospitalization, veterans preference and assures equal treatment to all.

But while we are at war the unit continues to serve principally as any general's most valuable asset, telling him where his soldiers are, what they are doing, and how well it is being done.

11th Armored Quiz Team Beats 54th
Grabbing the lead on the opening questions, the 11th Armored Personnel quiz team representing the 54th Infantry Personnel by the score of 305 to 230 recently at the Service Club. It was the second win for the 11th Armored as many weeks and gave them the right to compete again next week on Wednesday.

Members of the winning team were Corporals Joe Sullivan, Fred Boylan, Morse Johnson and Sergeant Walter Cost. The 54th team was composed of Corporals Bernard Eli, Edward Schleske, Albert Zimmerman and Sergeant Horace Swain.

Master of Ceremonies for the evening was Corporal James E. Frye of the division public relations office. Sergeant Jerry Tonkin served as timer and Warrant Officer Ralph Ellis acted as scorer.

The program is a weekly feature on Wednesday at Service Club No. 2.

a leader not only in the post's salvage campaign, but also in conservation. Substitutes have been adopted for many critical items, and in many cases the substitutes are better than the originals. Every conceivable item at the post is salvaged by the Quartermaster or repaired and returned to use. A large shoe repair shop does nothing but re-sole Army brogans.

"Keep 'Em Supplied" is but one of many slogans adopted by the Quartermaster Corps, and at Fort Benning it is more than just a slogan. It is a promise, and it is being fulfilled daily by a staff of officers, enlisted men and civilian employees who have been banded together into a working war time organization.

NOW MIND YOU SOLDIER, NOT A WORD ABOUT THIS LOAN!

2nd S.T.R. Celebrating Its First Year At This Post

Infantry School Unit Pioneer Training Of Officers Here

The Second Student Training Regiment, one of the three huge training regiments of the Infantry School, is also observing a birthday this week—its first.

And while ordinarily a first birthday signifies extreme youth, an outfit one year old in these fast-moving times in the Army of the United States may belie its age. For in one year the Second Regiment has grown into quite a baby, as its commanding officer, Col. Maurice G. Stubbs, can testify.

The Second Regiment was activated Nov. 13, 1941 by General Order No. 19 of the Infantry School, and two officers were immediately assigned to the new unit, Col. Stubbs and Major (now Lt. Col.) Paul E. Jacobs.

The original purpose was to make of the Second an outfit to handle companies of student officers taking the Rifle and Heavy Weapons course at the School. As such on Nov. 13 there were activated Headquarters and Headquarters Company, and three battalions of four lettered companies each.

But the Second was to learn very soon that this is an outfit of constant change in the American Army, and starting in January all the original plans were reshuffled, a process which was to be repeated many times up to the present day.

ACTIVATE NEW UNITS
On Jan. 25 the whole organization was changed to accommodate Officer Candidate students. Lettered companies were redesignated by number and a fourth battalion was activated with provision made for six companies in each battalion. The Fifth Battalion was activated this spring, June 17 to be exact, with six companies, and a seventh company, the 31st, was added to that battalion Aug. 4. The Service Company became a Service Battalion with five companies of its own on Sept. 1 to bring the Regiment up to its present organization.

At first companies of students arrived in the Regiment in rather leisurely fashion, compared to today's mass-production schedule. The Officer Candidates started arriving in February. At the same time several O. C. companies were moved to the Harmony Church outfit from the main post.

A number of other officers have been with the Second continuously almost from the beginning. These include Col. Edward B. Jackson, present executive officer; Major Robert H. Garrison, Service Battalion commander; Major John J. Hazel, original Headquarters company commander and now commanding officer of the 20th Company; Capt. Ro-

bert B. Barrette, regimental supply; and Major Gerald B. Shine, regimental adjutant. All of these officers were assigned before classes started arriving.

OFFICERS ASSIGNED
The first group of company officers were assigned Dec. 20, including such veterans as Captains Edward T. Johnson, William C. Kahle, James W. Sorenson, Lieut. Lester D. Trautman, Major Francis A. Sergeant and Major Lester E. Winslow. The largest group of officers

assigned at any one time joined up Feb. 7, when 54 graduates of a Basic Class came to the Second as company officers. A total of 28 of these are still with the Second.

The Second Regiment, being the pioneer unit in the School in the handling of Officer Candidate affairs, originated a good part of the present Standard Operating Procedure for administering Candidates. It was fortunate in having with it from the start a nucleus of officers who had been with the first O. C. companies in the First Regiment and on the basis of their experience and innovations suggested by newer blood in the Second were the efficient methods now used worked out.

Just in the last few months the Second has been able to settle down from constant reshuffling made necessary by the rapid expansion of the Officer Candidate training program and begin to lead the life of an adult Regiment. Projects under way at the present time reveal this trend. The Regiment publishes its own newspaper, THE PINE-BUR, it has paper had been stuffed far into the furnished its companies with plentiful day-room furnishings clear the way for reveille.

NOTES OF THE BUGLER
FT. DEVENS, Mass.—The bugler blew and blew until he was blue in the face; there was not a sound and not a man arose from his slumber. Cpl. James E. Meyer checked his bugle for mechanical defects. He found a wad of paper had been stuffed far into the tubing. It took 15 minutes to clear the way for reveille.

Fort Loop Leaders Clash Sunday In Conference Feature

Sportscasting

BY SGT. CARL NEU

No need to feel too badly about the result of Sunday's Army-Navy fracas when Benning absorbed a 35-7 licking at the hands of Pensacola. The result was not at all a surprise to this corner, and even in defeat there were plenty of good things about the game. As a matter of fact, it just served to vindicate some of the opinions we have had all along about the grid sport.

In losing to Pensacola, our boys went down before the onslaught of a really great eleven. After the game, one of the Navy coaches remarked that the Goshings had never played better this season. And with that array of talent, they were simply out of our class.

With but two exceptions, the Pensacolas were all former college stars, while only a sprinkling of the Benning 60-man squad had ever played college ball, and most of those had no more than one year of the big time experience. And few grid fans can question the fact that college football adds that certain amount of "seasoning" that goes to make really great players.

At Benning this year, however, we have been interested in football for sports sake, rather than a super team. At this post, every man is a different unit who wanted to play football had his chance. Even if he had never played before, he was invited to come out, and many of the current varsity men are playing their first year of organized football.

Pensacola, like other Navy stations, assembled a collection of super stars and banded them into one great team. This isn't by way of criticizing the Navy's viewpoint, but simply to point out that we think ours is better from an all-around point of view.

The intra-mural conference at the post this year has been tremendously successful—far more so than even its founders dreamed it might be. The mere story of its success is actually the story of Sunday's defeat. The reason? Well, the regimental coaches got so absorbed in the conference title-chase that they frowned on breaking up their teams in mid-season and sending their stars off to play on an all-star team. To them, winning the loop flag is more important, even though no one outside the bounds of the reservation might ever hear about it. That's football for sports sake!

Result of all this was that when the time came to select an all-star team, too many difficulties had to be overcome, and rather than risk any serious impediments to the title contenders, officials hit upon the unorthodox idea of using four teams in the game as units. Whether or not the original plan might have worked better is beside the point. Benning put on a good show, the game was interesting all the way, more than 15,000 soldiers had a fine afternoon of recreation, and the conference picture was not upset in any way.

To this pillar's way of thinking, that made the game a rousing success. Never before was such a tremendous crowd assembled for a sports event at the post. That mob was truly inspirational, and a great tribute to Army-Navy regulations, particularly at Benning. There was no disgrace in losing to that great Pensacola eleven, and there's plenty of consolation in knowing that the success of our own intra-mural program was proven even in defeat. Further proof that the intra-mural league idea is the coming thing was given by Dick Hawkins of the Associated Press last week when he wrote in his popular column, "Southern Fantalk," that the Benning plan this year might well be adopted by many colleges next fall when transportation problems eliminate inter-college games. He hailed the Benning formula, and praised it for being an excellent solution of the problem as to where football belongs in a nation at war.

SIDELINE SNAPSHOTS—Patsy Clark was unable to make the trip with the Goshings, having been called away on official business Saturday. In his absence, Lieut. Weems Baskin, former line coach at Ole Miss, handled the reins in workmanlike fashion. . . . Another headliner who failed to show was Blacky Blumenstock, the ex-Fordham star, who had just received his wings and been transferred earlier in the week. . . . Pensacola lost one more star back right after the game when Sal Lococo was ordered to report to the Athens Pre-Flight School. He was one of the few non-college players on the Goshing roster, and as matter of fact had never played anything but six-man football before entering the Navy. . . . George Sauer, the former Nebraska All-American, played a spirited game despite his 32 years. . . . Biggest cheers of the game went to Ole Dunderhead, the Army mule, who pranced around the field as mascot. He was ridden and "chased" by members of the 29th Infantry. . . . The pre-game music by members of the 124th and 3rd Armored, playing on the field, was reminiscent of real college ball. . . . For most of the Benning boys, the crowd was the largest they had ever played before in their grid careers. . . . Four generals, Fulton, Allen, Weems and Howell, were in the commandant's section, and enjoyed the game immensely. . . . All in all, it was a GREAT SHOW!

Benning Stars Bow to Strong Pensacola Foe

Overflow Crowd Of 15,000 Sees Navy Win by 35-7

An overflow crowd of more than 15,000 wildly cheering spectators watched Pensacola Naval Air Station's star-studded gridiron machine roll over a game but out-clasped Fort Benning eleven by a 35-7 count in Doughboy Stadium on Sunday.

Every nook and cranny of the huge concrete structure was filled for the most spectacular sports show in the fort's 24-year history. Three bands filled the air with football tunes, and even an Army mule was present to inspire the doughboys. But the limelight belonged to the Navy with its great array of gridiron talent.

Piling up 24 points in a first-half onslaught that had the crowd dumbfounded, the Pensacolas swept to a fairly easy victory after having lost their last four tilts to a quartet of the nation's strongest elevens. In the second semester, however, Benning rose to new heights and held the visiting Goshings even by pushing over a Soldier score in the third period.

It was a pair of spirited Gators from Capt. Red Millon's powerful 124th Infantry squad who accounted for the Benning score with a miraculous aerial effort. Roy Castary, probably the Army's outstanding back yesterday, got off a pass after he was almost tackled and it connected with Vernon Smith, who made a one-handed catch, and raced 30 yards to the score. Nick Carlos, also of the Gators, converted the extra point.

Statistics showed the game to be much more evenly contested than the final score indicated. Benning piled up 12 first downs against 11 for the visitors and also outgained them through the air by a slight margin despite the Navy's vaunted aerial circus. Pensacola completed 15 passes in 28 attempts for a net gain of 229 yards, while the Soldiers clicked on 17 out of 32 for 232 yards.

It was along the ground, however, that the Navy held the upper hand. With such great backs as Al Brumbaugh of Texas Christian, Bill Leachman of the Brooklyn Dodgers, George Sauer of Nebraska and Cotton Milner of L. S. U. running hard all afternoon, the Goshings were seldom stopped. Johnny Birch, colossal 225-pound end from Indiana, was an outstanding pass-catcher who also caught the eyes of the fans.

The Pensacolas played minus the direction of their famed head coach, Lieut. Comdr. George (Pot) Clark, who was sent home from his station on official business the day before. In his absence, Lieut. Weems Baskin, former coach at Ole Miss, ran the team and used his superb material to great advantage.

Both teams filled the air with passes during the final canto, and Benning got inside the Navy 23 several times but lacked the punch to put over another score.

Panthers Meet Tuskegee Team

Fort Benning's Panthers, only colored eleven in the post, invade juncletown in Alabama on Saturday for a grid battle with the far-famed Golden Tigers of Tuskegee. The Panthers, who secured their first win, the soldier gridders have been primed for this game all season. In Tuskegee, the charges of lieutenant Maurice Kirk and Norman Hogenson will meet their hardest opponent.

The Tigers rate as the top-notch colored college team of the South if not the entire nation. They tripped Morehouse College in Columbus several weeks ago, and the Morehouse team gained a later win over Benning.

Naturally, the Panthers will be a pronounced under-dog, but the soldier club is counting on some of its stars like Clarence Reid, Bill Young and Frankie Phillipson to make quite a ball game out of Saturday's battle on the Alabama gridiron.

Ready For Dragons

Here are three star operatives for the 29th Infantry who are all set for a comeback Saturday night at the expense of the 3rd Armored Dragons. In the upper picture is shown 435 pounds of tackle in Mike Hutchins, 210-pound captain of the Blue Devils, and that year, Members of the "Crack" team were: Pfc. Parvin Bennett, Watson, Wright; Pfc. Jones, Seales, Towns, and Hall; all of Regimental Headquarters Co.; and Pfc. Moore of Headquarters Co., 2nd Battalion.

Polo Team: The "Blue Devil" Polo Team was turning in sensational performances as far back as 1924, with teams from the 1st and 2nd Battalions, Special Units, 29th Infantry, 1st S. C. 83rd Field Artillery, 15th Tank Battalion, battling for the Garrison Post Basketball Title in 1925, de- Championship

Sergeants Kgelstrom and Bertelman, stellar athletes on the Infantry Eleven, were awarded positions on the mythical "All Washington" '24 Eleven. Each year selections were made by a committee of prominent sports writers from the Capital. Kgelstrom and Bertelman were selected along with other players from such teams as Loyola,

Gators Meet Unbeaten 117th Eleven at 2:30; Devils Battle Dragons

Two all-important grid battles in the Fort Benning Conference this week-end will develop a clear title picture for the first time since the free-for-all flag race got underway six weeks ago.

The feature tilt on Sunday afternoon in Doughboy Stadium at 2:30 will bring together the undefeated 117th Infantry Breakers and the powerful 124th Infantry Gators with first place at stake. Both have won two and lost none in the conference standings and are currently deadlocked for the lead.

Saturday night at 8:00, the 29th Infantry and the 3rd Armored will come to grips in a desperate battle to remain in the flag race. The winner of the nocturnal tilt will move into a second-place tie with the Sunday loser, while the unsuccessful team will practically be eliminated.

The two remaining conference elevens, both of which have been practically counted out of the title picture, will journey into South Carolina for outside tilts with college opposition. The 11th Armored will invade Newberry College, while the 55th Engineers visit Wolford College.

EXPECT BIG CROWD
A near capacity crowd of 10,000 will probably be on hand to watch the Gator-Breaker fracas. The two elevens have consistently played the best foot-

to a wide-open affray since both elevens boast spectacular attacks, built around fast backs. In Roy Castary, one of Notre Dame, the Gators have probably the best all-around performer at the post, but the Breakers can counter with Ken Smith, of Indiana fame, who is also a potent ball-carrier and passer.

GATOR AERIAL ATTACK
The Gators have developed a powerful aerial attack built around Castary's adept passing. If the great Gator tailback is in form, the 124th aerials will be hard to stop, and the outcome of the game may depend on whether the Breakers can shackle the Gator passes.

Castary is also a hard-charging ball-carrier and a long distance punter, but he gets plenty of help from such other crack backs as Blocker Nick Calos, Wingback Vernon Smith, and Fullback Stan Engler. Hackney and Hamlin are other potent backs.

CLASSY BACKS
Lieut. Johnny Cudmore, Breaker coach, can match this array, however with a classy set of 117th backs. Besides Smith, there is big Mike Panscor, one of the loop's best punters as well as Charley Pierce, Vince Daddino and Bo

SALUTES
FORT BENNING
On Your
24th
BIRTHDAY

We are proud of the men of our organization who are now serving in the armed forces.

We are proud to congratulate Fort Benning for the wonderful work they have done and are doing in preparing leaders of our great Infantry division as well as the Armored division and Parachute divisions that are receiving their training at America's No. 1 Army Post.

We urge every citizen to show their appreciation to these boys by buying United States War Bonds and Stamps.

6 Million Pounds Of 'Dough' Ain't Hay To Cooks In This Man's Army

Bakers and Cooks School Knead (Roll) Their Own Here

By Cpl. Owen Remington

Fifteen thousand graduates of the Fort Benning Bakers and Cooks School and those in the 4th Service Command, during the past year may not be exactly rolling in dough these days but they certainly are hard at work rolling out the dough for the dough-boys wherever there are Armies of Uncle Sam.

And they're able and willing to roll out that dough under any circumstances, anywhere from the most modern of big hotel kitchens to army posts, to field kitchens or even to improvised clay ovens—or even no ovens at all. Some of the graduates of the school—including not only the 15,000 graduated during the past year but other thousands from years past—were experienced in baking or cooking or catering before they entered the Army, others were never closer to an oven than watching hungrily near Mother's kitchen range, when they were boys.

Yet today they are officers, mess sergeants, supply sergeants, or active cooks and bakers turning out everything from breads and roasts to crisp salads and fancy pastries. The Bakers and Cooks School at Fort Benning is not only regarded as probably the largest and best equipped school of its kind in the country—and therefore probably the world today—but one of the most progressive. Here new ideas are constantly being thought up and tested. Here the pace is being set for bakers and cooks schools in other Army posts. Here theories are tested thoroughly and scientifically. Here every effort is being made

to work out arrangements to give the American soldier the best prepared foods.

TWO SCHOOLS HERE

There actually are two schools here at Fort Benning. One, for white personnel, is the parent school for nine others in the Fourth Service Command; the second is for colored cooks and bakers.

Col. John M. Rooks now is commander of all Fourth Service Command schools, including the two at Fort Benning. The others are located at St. Petersburg, Miami Beach and Camp Blanding, Fla.; Keesler Field and Camp Shelby, Miss.; Camp Forrest, Tenn.; Ft. Jackson, S. C. and Ft. Bragg, N. C. He directs the work of all of these schools from his headquarters at the Fort Benning school.

Assisting him at Fort Benning is Lt. Col. Grover M. Ford, who recently took over after Lt. Col. William Edwin Barksdale was assigned a few weeks ago to the Quartermaster's department at the Fort. Col. Ford was in charge of the school here from March of 1941 until this October.

Men attending the school work from 7:30 a. m. to 5:30 p. m., attending classes, acting as regular cooks in the mess maintained at the school; hearing lectures; making models of ovens; taking down and putting together ovens; learning how to cook or bake under any conditions that might confront them; learning the theory as well as actual practice of preparing foods; studying in the newly established laboratory the effects of various ingredients on cooked foods; learning dietetics. There is a two months' course

for cooks; a two months' course for bakers; a month's course for mess sergeants. A month's course for officers and another two weeks' course, also for officers.

PREPARE CHARTS

Right now the students themselves are actively engaged in preparing charts for the entire course under a plan instituted by Colonel Barksdale. This covers all phases of the work of the school and some of the charts look as though they were made by professional artists.

The bread for the entire post is baked here at the school, with the student bakers working under direction of experts. An entirely modern factory is in existence here, with bread being produced on regular assembly line basis. Huge mixers churn the dough; it is cut by automatic machines into loaves of exact size; then baked in huge ovens in which continuous chains keep moving the bread up and down, and up and down in order to keep it in absolutely even temperature in the big ovens.

But the training of the bakers doesn't stop there. Outside there is a battery of 16 large field ovens, run by wood. Here the bakers must turn out bread by hand that is every bit as good as that turned out inside the modern bakery. And they do it, too, learning how to use the same equipment that they will later find in many an army camp or less equipped base. They are prepared to stoke their own ovens, and cook or bake in them under any conditions.

But the training doesn't stop there. Out in a big field nearby the bakers must learn how to work under much more primitive conditions. Here each class has to set up a clay oven in order to learn how to prepare for baking with whatever material may be at hand under advanced field conditions. And the bread coming out from there has to be just as good as that from the modern ovens, too. They also learn how to handle disposal of garbage and waste materials in the field through use of various types of incinerators or pits.

HOLE IN GROUND But they don't stop there, either, for out in the field is what looks like a plain ordinary hole in the ground. It's a "trench oven." Here, with not even the clay at hand to build a clay oven, the student must learn how to do his work and again turn out well-nigh perfect results.

During the last 12 months, more than 6,000,000 pounds of flour were turned into bread by the school. The baking department is so organized that it has never been necessary to "send around the corner" for a single loaf of bread, as might happen in even the best regulated of homes when an unexpected company drops in. Here at Fort Benning as much as an unexpected division has passed through or has "dropped in" and their bread needs were always filled.

Besides learning how to run the old wood burning field kitchens—or how to make their own kitchens from materials to be found in the field—the men learn thoroughly the mechanics and theory of the Wynne burner, which uses kerosene, or of another type of field kitchen that uses gasoline. This is in order to be prepared for cooking in desert areas where wood may be unavailable for heating purposes. Students come to the school through the Quartermaster's copy of the Fourth Service Command, which allocates a certain number of students from each post. The students then are selected by that post and the Quartermaster then

So This-Is War!

Time out for shaves! Mirrorless, these two "Tigers" clip 'em off in bivouac near America. They're Privates Arthur Muglia (left) and William Rupert of the maintenance battalion. Note steel helmets being converted into wash basins. (Tenth Armored Photo by Kerbs.)

54th Air Base Men Are Active on Battle Lines

The 54th Base Headquarters and Air Base Squadron was activated early in April 1941 under the command of Major William A. Capers, at the time a captain. The squadron was organized with only 17 men as a nucleus and its first home was one barracks across the street from the field headquarters. In May of the same year several hundred recruits arrived and the 54th moved down the hill to "Tent City." Here are the offices of these first recruits took their basic training and upon completion of this training the squadron again moved up the hill where new barracks had been built to accommodate the increased complement.

The primary purpose of the 54th Base Headquarters and Air Base Squadron is the administrative and mechanical maintenance of Lawson Field. In addition to the landing area which is but a minor, although nonetheless important feature of the field, here are located the hangars, shops, warehouses, gasoline storage facilities, bomb and ammunition depots, permanent quarters for combat and maintenance crews, the messing and recreational facilities and the maintenance and repair facilities. Between hangars No. 1 and No. 2 is an especially constructed administrative building. Here are the offices of the Commanding Officer, Operations Officer and the weather station. Another indispensable unit in this administration building, stop the hangar, is the field control tower. Here trained observers note the air space in the airfield area and traffic on the airfield and the visual signal or radio contact with pilots, greeting them with take-off or landing directions.

EQUIPMENT Back of the flying line are the shops and supply warehouses. The shops are equipped to make engine changes, to repair or change instruments and do all the second line maintenance. Minor repairs, which usually can be completed in a 48-hour period, are done in the flying line by squadron mechanics. Second line maintenance work, repairs of a more complicated nature, is done by the engineering establishments of the air base. In this second or maintenance line are found technical buildings which house, Signal, Ordnance, Engineering and Chemical supplies. Another important item on the maintenance line is the Motor Pool where Air Corps technical vehicles and staff and reconnaissance cars are stored and serviced. These vehicles facilitate the rapid movement of the ground echelon.

The Base Photographic building contains dark rooms, drying rooms and specially ventilated rooms for the storage of valuable cameras. Facilities are also available for the enlarging or reducing of pictures, map-making and the making of mosaics. A trained staff of specialists is engaged in this work and the pictures desired can be taken either, by sending a photographer aloft in a plane to take them or, by attaching the camera to a speedy pursuit ship and letting the pilot double as chauffeur and photographer.

ESPRIT DE CORPS The morale of personnel, flying, administrative and mechanical, generally will be no better than the accommodations for food, shelter, and recreation. Suffice it to say that the morale of the officers and enlisted men of the 54th has always been, and undoubtedly always will be, very high. It has been remarked by veteran soldiers who have served in different branches of the service, that "the spirit of cooperation and camaraderie existing between the officers and non-commissioned officers and men of this squadron is of the highest type and something that is eagerly sought for in other outfits."

At the present time, men from sends them to the most conveniently located of the 10 schools in the area. Some have had experience while many others never have cooked or baked anything in their lives before. But when they finish the course of instructions, here at Fort Benning or at any of the other schools in the Fourth Service Command, they certainly know their way around anybody's kitchen. Even if they have to make one out of a hole in the ground, back of a cook tent, someplace in the wilds.

Sgt. Manlove Of Old 24th 28-Year Man

Served in Mexico, World War I; Widely Travelled

BY PFC. SMITHY NORTON

Twenty years ago the 24th Infantry moved back to Fort Benning from Columbus, Mexico. Fort Benning is the home of this history making organization and the people of Columbus enjoy telling new soldiers of this area about these gentlemen-soldiers. Officers of this post respected the reputation made by these men and a number of men from the two-four (24th Infantry) make up the cadre of the present army organizations at Fort Benning.

Somewhere today the two-four carries on at Fort Benning, for America and for four freedoms. The other day in the Service Club No. 4 the writer met M-Sgt. Hubert Manlove of the 24th Infantry. M-Sgt. Manlove, 212 pounder and stands 5' 6 1/2" in his best pair of GI shoes. He is a native of Clarksville, Tenn., and enlisted in the army October 5, 1914 at Jefferson Barracks, Mo. M-Sgt. Manlove is a cheerful sort of fellow and enjoys chatting about his extensive travels in the Philippines, China, and Japan.

"I enjoy watching a good football game and the boys in the 24th Infantry were very sports," says M-Sgt. Manlove. The men of the Quartermaster Detachment (colored) have great respect for M-Sgt. Manlove and they eagerly assist in keeping the vehicles of Fort Benning ready for rolling. Once a chauffeur and motor mechanic in civilian life M-Sgt. Manlove has served well during his twenty-eight years. He is proud of his Fort Benning home (a modern college town cooking non-coms in a select area on the army reservation) and his charming wife, Mary Manlove. She is an excellent home maker and keeps her GI butter ball, (apologies please) M-Sgt. Manlove in physical trim for his daily army duties.

M-Sgt. Manlove rarely being placed among the Who's Who at Fort Benning. His long years of service in the Punitive Expedition (Mexico), World War I, in the Vistas (Juarez, Mexico) gives him quite an army background. Fort Benning is a great army post and it is the home of a large number of non-coms of the 24th Infantry. The non-coms and soldiers

"morale," come on out to the 24th, meet "Adam the II," toss a penny in the "Wishing Well" and stay around to meet some of the boys. (NOTE TO COMPANY COMMANDERS: Paragraph regarding "Wishing Well" and furloughs is of special interest, don't you think? Certainly would be a shame to have the men lose "faith" in the Well, over such little things, hey what?)

So good in fact that during October, 47 per cent of the demonstrations the regiment participated in for the Infantry School were marked superior and 50 per cent were credited as excellent, none was termed satisfactory and none poor. A similar excellent record was achieved during August. As a matter of fact, the 124th, a Florida National Guard outfit that was called to active duty in November, 1940 was brought to Fort Benning as a demonstration regiment because of its outstanding record in maneuvers. Work of the regiment since its arrival at the Georgia post has been more than satisfactory.

So if you're really worried about that much misused word

diets are trying hard to make good and with the assistance of the fine commissioned officers at Fort Benning more men and soldiers like M-Sgt. Manlove, M-Sgt. Sellers, M-Sgt. Cummings, 1st-Sgt. Baker Wiseman, and others will be developed. These are Fort Benning's own—they are men from the two-four.

HOW TO ANNOY COOKS

At Camp La Jolla (pronounced La Hoy-ab), California, Private George Mudd is popular everywhere except at the canteen. When a friend hails him from across the room, yelling, "Hi, Mudd!" the waitress brings coffee. Explanations are ALWAYS embarrassing.

Above are five of the 10th Armored's high-ranking officers. In the front row (left to right) are Lieut. Col. Benjamin S. Hesick, division ordnance officer; Maj. Merton E. Heimstead, executive officer of the maintenance battalion; and Maj. Michael E. Buscemi, commander of the 80th Medical Battalion. In the second row are Lieut. Col. Cornelius A. Lichiric, (left) commander of the 50th Reconnaissance Battalion, and Lieut. Col. Daniel S. Spangler who leads the 55th Engineer Battalion. (Tenth Armored photo by Kerbs.)

Here are the 10th Armored Division's three regimental commanders: Left to right they are: Col. Bertrand McGrow, 11th Armored Regiment; Col. Thomas M. Brinkley, 3rd Armored Regiment, and Col. William S. Eley, commander of the 54th Infantry Doughboys. (Tenth Armored photo by Kerbs.)

Above are Maj. Gen. Paul W. Newgarden, 10th Armored commander and his staff. In the front row, left to right, are Gen. Newgarden, Brig. Gen. Robert W. Grow, chief of combat command "A" and Col. Julian E. Raymond, chief of staff. Second row: Lieut. Col. Donald A. Poorman (left) G-4 and Lieut. Col. F. J. Mallon, acting G-1. Third row: Maj. Frank H. Britton (left) acting G-3 and Maj. Robert M. Blanchard, G-2. (Tenth Armored photo by Kerbs.)

54th Armored Infantry Forms Integral Part of Tenth Armored

Last summer a distinguished old Infantry Regiment was reborn after twenty years of rest between wars. The 54th Armored Infantry, formerly the 54th U. S. Infantry, became a unit of the 10th Armored Division.

Twenty years ago, in 1922, this Regiment discharged its last soldier and veteran of World War I after distinguished service as a foot infantry regiment with battle streamers won at Meuse-Argonne and Alsace.

Twenty-five years ago, soldiers of the 54th Infantry wore the neck-tight khaki and basin type helmets of their period with a distinction which is bound to be an incentive to the new soldier of the 54th Armored Infantry who wear the green overalls of the Armored Force.

The old and new 54th Infantry will have much in common. The old Regiment, activated in 1917, consisted mainly of citizen soldiers. The same is true today. The cademen of the new 54th Armored Infantry are veterans in a manner of thinking since the average soldier of the Regiment has had nearly two years of service during the present emergency. Many of the officers and non-commissioned officers were private citizens less than two years ago. They have studied hard at various Armored Force posts during the past eighteen or twenty months to qualify for the positions which they now hold in the Regiment. And they are well qualified to train and lead the less-experienced men of the Regiment into action with the 10th Armored Division.

COL. ELEY COMMANDS
The 54th is commanded by Col. William S. Eley who has twenty-five years of continuous military service to his record.

A native of Virginia, Col. Eley sailed for France with the 23rd Infantry in 1917 as a captain. While overseas, he attended the General Staff College from November, 1917, until February, 1918, after which he spent two weeks with the British 39th Division at Perrone. Then he was placed in command of a company of that Division, serving the Allied forces on the Verdun front.

Ordered to Washington, D. C., in June 1918, Col. Eley was assigned to the office of the Chief of Staff of the 31st (Dixie) Division. When the latter was broken up, he remained on the Western Front at Lemos until March, 1919.

Among his many assignments were: battalion commander, 57th Infantry, Fort Dix, N. J., one year as student and one year as G-2 of Post Headquarters, Fort Benning, and Armored Force Recp-

Tiger Outfit Has Six Vets Of World War

Several Participated Against Germans In Decisive Battles

Although Maintenance Battalion's "C" Company is staffed with youngsters, many in their teens, the outfit boasts six men who were "over there" in World War I.

Take Private Manuel Correia who volunteered last month "to get a crack at a couple of those so-and-so Japs." He was with the famous 26th (Yankee) Division in the last war and saw action for 19 months in no less than five battles. He was in the thick of the fighting in the battles of Chateau-Thierry, Belleau Woods, Saint Mihiel, Soissons and Aepmont.

His job was sniping and though he refused to talk about it Private Correia did admit he "got a few." He hopes to get a sharpshooting post in this war for he's had plenty of practice since '18. In civilian life he had his own vaudeville act and put on an exciting show of both sharpshooting and knife throwing. Something tells us this GI will come in mighty handy when the "Tigers" meet up with Hirohito and Co.

Private Correia was wounded twice and received the famous Purple Heart.

Another tough soldier who vows to make things mighty tough for Uncle Sam's foes is 43-year-old Private Carl Foster who served with the 5th Regiment of Marines in the 2nd Division.

He was in the famous battles at both Verdun and Chateau-Thierry and proudly says his outfit "played the biggest part in the battles."

He was a sergeant then, in charge of a machine gun section, and though he's supposedly going through his recruit training with the Maintenance Battalion he's actually giving the drilling, not taking it. He's considered the Battalion's top man at the manual of arms.

Another man who has been through the mill is Private George Hosier.

FOUR BATTLES
He was with the 1st Division and was "over" for 27 months seeing action in four battles: Saint Mihiel, Argonne, Soissons, and Cantigny. He was with the engineers but says they "were in a troop more than anything else."

Private Hosier, who is married and the father of two children, is another volunteer who wants just one more crack at the foe. He was wounded at Soissons and gassed at the Argonne, and he too, received the Purple Heart.

Private Daniel Massey, who volunteered last September, saw action in no less than five battles. He served with the old 76th Field Artillery, 3rd Division, for 19 months and was in the engagements at Aix-La-Mont, Saint Mihiel, Champagne Marne and the Argonne. Like the others, he remained tight-lipped when it came to telling anything of his experiences.

Private Otis Secrest was with the 76th Motor Transport of the famous 42nd "Rainbow" Division. But, he reluctantly added, the 76th was stationed at Brest putting equipment together. Then, now, he worked in the maintenance shops.

Last of these volunteers is Private Cecil Ardary, 41, who is married and has two children.

Private Ardary spent two years in Germany with the army of occupation so that "others could get out." He served with the 50th

Thirteen Former Enlisted Men

Thirteen former enlisted men of the 10th Armored "Tiger" Division were sworn in last week as warrant officers by Lt. Col. F. J. Mallon, adjutant general, to fill vacancies existing in the Division's tables of organization.

Of the number, seven, under an assignment order, remain in their respective organizations fulfilling duties similar to those they did as enlisted men. Those remaining in their old units are:

Messrs. Leonard E. Mullins, Headquarters, adjutant general's office; Edward L. Cohen, Division Quartermaster's office; Paul B. Ford, Inspector General's office; Walter E. Larson, 54th Infantry, administration; Ralph W. Ellis, Jr., 11th Armored Regiment, adjutant general's office; and Stephen R. Johnson, 55th Engineers, construction.

Mr. Johnson who is attending the Armored Force School at Fort Knox, was sworn in there and will return to his Benning post as soon as his course is completed.

The other newly appointed Warrant Officers, their old organizations and assignments are:

Messrs. Roy Case, Combat Command B, to motor transport; Train Headquarters; Edsel B. McCowan, Supply Battalion, to G-4 transportation; Sanford Axelrod, 11th Armored Regiment, to 90th Reconnaissance Battalion, administration; John A. McDonald, 55th Engineers, to 54th Infantry, motor transportation; William B. McKewen, Combat Command B, to G-4 transportation, and Anton W. Makar, Division Service Company.

Infantry and was only sixteen when he took the overseas trip.

Yes, these men are tough and experienced. What they lack in youth they make up doubly in solid determination. Hitler, Hirohito and Co. had better watch out when they meet up with these rugged "Tigers."

pany, to Judge Advocate's Division, clerical.

It was announced at the Adjutant General's office that approximately 50 vacancies still exist in the Division and that each enlisted man will be given an opportunity to apply for them. Formal announcement as to procedure in filing of applications is expected in the near future. They exist in administration, motor transport, motor maintenance, communications, supply and tank maintenance.

ENGINEERS PROMOTED

Promotion of eight enlisted men of the 55th Engineer Battalion, 10th Armored "Tiger" Division, was ordered last week by Lieut. Col. Daniel S. Spangler. The men are:

Sgt. Salvatore A. Leonardo, Company E, to be staff sergeant; T-5 John Drogomir, Headquarters Company, to sergeant; Pfc. Edward Blanco, Frank M. Anderson and Edward J. Ochab, all of Headquarters Company, and Private Albert J. Francescotti, Company A, to be T-5's, and Privates Richard E. Hayes, Company B, and John Moran, Company D, to be corporals.

son and Edward J. Ochab, all of Headquarters Company, and Private Albert J. Francescotti, Company A, to be T-5's, and Privates Richard E. Hayes, Company B, and John Moran, Company D, to be corporals.

Congratulations Neighbor
The Columbus Chamber of Commerce is proud to take this opportunity to congratulate you on your 24th Anniversary. Your growth has exceeded our greatest expectation. Little did we know 24 years ago when we worked diligently to secure Fort Benning for Columbus that it would play such an important part in a war for Freedom and Democracy. . . . You have been a great neighbor and we appreciate the fine cooperation which has always been extended so generously.

Terrify And Destroy' Is Goal Of Benning's 10th Armored 'Tigers'

Division Is Young Fast-Moving Unit Of Uncle Sam's Army

Despite its comparative youth as one of Uncle Sam's potential striking forces, the 10th Armored "Tiger" Division has progressed far in the attainment of its ultimate goal—the ability to "Terrify and Destroy" its enemy.

Out of months of toil, fatigue, detail, routine training, tactics, schools and a thousand other things—the "Tigers" with spirit and determination, have exemplified themselves as being typical troops of the fast-moving, hard-hitting Armored Force.

Despite the rigorous training program, 10th Armored men have found time to organize baseball, football, basketball, volleyball and other sports teams and many other forms of recreation and entertainment, military and civilian, on a voluntary basis and after regular training periods.

Officers and men well-remembered by Major General Paul W. Newgarden, the 10th Armored's commanding officer, delivered an address to recruit soldiers of his command. In it were seven pieces of advice which ring as true today as they did when first delivered an address to recruit soldiers of his command.

They are: "Stand up straight, clean up, muscle up, carry out orders, learn to march, learn to shoot, and learn to maneuver."

The record of the 10th Armored Division speaks for itself in the program of carrying out those bits of advice.

TRAINING MARCHES
First big step in the training

program took place last August when the entire division took part in a series of three training marches to Pine Mountain State Park. The division was divided into three groups each going out for day and a half.

Tactics, march discipline and standard operating procedure were stressed. In the afternoon recreation and sports held sway with hundreds flocking to the Park's swimming pool.

On August 16 at an impressive ceremony at division headquarters, Col. Morrill Ross was sworn in as brigadier general. Gen. Ross is chief of Combat Command "B" of the 10th Armored.

"Tigers" was chosen as the official name for the division. The name was selected by Maj. Geo. Newgarden from over 900 contest entries.

On September 26 Maj. Daniel S. Spangler, commanding officer of the 55th Engineer Battalion, and Maj. Cornelius A. Lichnie, 90th Reconnaissance Battalion, were promoted to lieutenant colonels.

September 29 proved to be a rest day for the division. For it was then the "Tigers" dipped their colors in salute to their chief, Lt. Gen. Jacob L. Devers, chief of the U. S. Armored Forces, who arrived here for a one-day inspection tour of the Tenth.

Highlight of the day was Gen. Devers' talk to the officers and men at Division Headquarters.

PEASE FROM DEVERS
"You men look fine," he told the "Tigers." "You look as though you can do a good job. I like your name, and if you can live up to it I'm sure you will go places."

General Devers covered as much ground as he possibly could,

watching artillery, rifle and pistol demonstrations, reviewing parades, attending both a luncheon and dinner held in his honor.

The following day another distinguished visitor arrived, Brig. Gen. Alexander R. Bolling, G-1 of the Army Ground Forces, was here for a conference with General Newgarden. A brief ceremony was held in his home at division headquarters.

September was the "walking" month. With the ultimate goal of 25 miles in 12 hours, the "Tigers" made many conditioning marches before tackling the 25 mile which was required of all officers and men, last night.

Despite sore legs and blistered feet, the men "took" to the hikes in good determined spirit. As the "44th Infantry Liaison" reported, "each doughboy's by-word was, 'I'll make it if I have to crawl!'"

On October 28 the first edition of the division's newspaper, "The Tiger's Tale" hit the streets. An all-soldier publication written by and for 10th Armored men, the paper is headed by Editors James E. Frye, Robert K. Kerins and Paul R. Jenkins.

The division climaxed its October training program with a four-day tactical motor march and field exercise.

Two of the days were devoted to the tactical phase of the march with the 90th Reconnaissance Battalion serving as the enemy, the rest of the division being split into three groups, Combat "A" and "B" and the reserve.

The final day of the march was devoted to the "battle" between the combat commands with General Newgarden and his staff serving as umpires and observers.

'Twas A Dirty Trick On Cohen, Yes, It Was!

Paging Edward L. Cohen!
Draft Board No. 9999 calling!
Draft Board No. 9999 calling!

Last Monday, Cohen of the Division Quartermaster Office, 10th Armored "Tiger" Division was discharged as an enlisted man and sworn in Tuesday as one of the newly appointed Warrant Officers. During that 24-hour period when he was a "civilian," it was reported, his draft board got wind of his status and had a message on the way for him to report the next day for physical examination.

Just how the board got "wind" has not been determined, but Mr. Cohen, who after repeated reminders, began to believe it himself, suspects fellow-workers in the QM office.

TEN NEW MEDICOS

Ten second lieutenants ET TT Ten second lieutenants, recent graduates of the Medical Reserve Training Center, Camp Barkley, Tex., have been assigned to the 60th Medical Battalion, 10th Armored "Tiger" Division. They are:

Anthony C. Cala, George A. Davis, Harry Elkins, Daniel Flanagan, John H. Hardwick, Jr., Louis G. Howell, Michael L. Lombos, Maurice W. Nichols, John J. Ponuchalek and Royce W. Taber.

for their pleasure and praised the work of Mrs. Baker.

The men look forward to the bi-weekly dances but the formal Cafe de la Paix dance held in September was an affair long to be remembered for its beautiful decorations and sweet music furnished by the 3rd and 11th Armored Regiments' dance bands.

Since then the Club has sponsored a barn dance, a Halloween party and most recently a Hawaiian dance. Extensive plans are under way to make the Thanksgiving and Xmas seasons memorable events in the 10th Armored's program of social activities.

Miss Mary Clark is librarian of the newly furnished library which is located just across the street from the Club. Here the men can find all the latest books, magazines and daily newspapers for their reading pleasure.

11th Cavalry Fought Villa With Pershing in Mexico

Regimental Coat Of Arms Tells Exciting Story

Organized at Fort Meyer, Va., in March, 1901, the 11th Cavalry received its baptism of fire before it had been in existence a year. The 3 squadrons under command of Col. Francis Moore, a distinguished veteran of the Civil, Indian and Spanish American wars, were ordered to the Philippines during the winter of 1901, and stationed at Samar, Batangas, and Northern Luzon. Among their season battles with the natives in suppressing insurrections, their role against General Malvar in 1902, was the most important. It won the 11th its slogan on its regimental standard.

The regiment returned to the U. S. and was assembled at Fort De Moines in 1903. From there the regiment, the 1st Squadron, was ordered to Cuba as part of the Army Occupation. It returned to the States in February, 1908, arriving in time to participate in the funeral of President Taft. At the time Col. James Parker was in command.

In May, 1914, the 11th moved to Colorado to assist in preserving peace. In January, 1915, in Ojibethope in January, 1915, in March 1916, the regiment joined Pershing's Punitive Expedition against Pancho Villa in Mexico.

PUNISHING VILLA
One squadron, under command of Maj. (later Gen.) Robert L. House, made a night march to

Ojoa Azules (May 5, 1916), surprised the enemy force, killed 42, and captured men and horses. It traveled 571 miles over mountainous country in 21 days on a 6-day ration supply, and without communications with its main command.

During the World War the 11th was stationed at Chickamauga Park, Ga., from where the bulk of its command was taken to form the 22nd and 23rd Cavalry's base. In 1918 the regiment was moved to the Presidio of Monterey, and in 1940 (November) to Camp Seeley, Calif. A year later the 11th moved to Camp Lockett, Calif., and not long afterwards the Cavalrymen gave up their horses for tanks and moved to Fort Benning as the 11th Armored Regiment.

COAT OF ARMS
The regiment's coat of arms tells an exciting story. The outfit's Philippine service is indicated by the blue and white colors of the arms. Its Mexican border activities is noted by the green cactus. The regimental colors, black and yellow, are shown by the shield, the wreath and the standard. "Allons" is the French for "Forward."

The 11th is commanded by Col. Bertram Morrow who has been with the regiment since June 30, 1942.

Col. Morrow entered Military Academy in 1913, received his commission as second lieutenant in April of 1917; by August of 1917 he was commissioned a captain. In 1933 Capt. Morrow was promoted to major and in 1940 he became Lt. Colonel. On December 11, 1941, he became a full-fledged colonel.

"Mother" Baker Reigns At "Tigers" Service Club

10th Armored Troops Find Relaxation, Fun At The Service Club

It didn't take the men of the 10th Armored "Tigers" long to find the most popular spot in the Sand Hill Area. That spot has a large sign over the entrance reading "Tenth Armored Division Service Club."

Here at Service Club No. 2 the

men find a host of activities to add to their comforts, relaxations and entertainment needs. All this is brought about by the capable and efficient management of Mrs. Winifred H. Baker, Senior Hostess. Her never-ending efforts have given the Tenth one of the top Service Clubs in the country and she is affectionately known to all the boys as "Mother Baker."

Many a young soldier has gone into the office of "Mother" Baker to talk over his personal problems and there he has found cigarettes handy so that he could relax and feel more at home and tell his troubles to the one who would so willingly help him solve his problems. In the winter time, Mrs. Baker always has candy and apples around for the men to enjoy as they sit in front of the fireplace and partake in the many activities planned. She has given up many of her social activities to devote all her time to seeing that her boys are royally entertained in the evenings.

"I really love my work and couldn't use up all my 15 days of my vacation this year. My day off is Monday but I simply must return at 10:30 to see that all is properly closed in the evening," was Mrs. Baker's answer as to how she enjoyed her work.

Miss Irene Warner is the capable Junior Hostess and works cooperatively in doing her part in carrying out the problem planned by Mrs. Baker.

The Service Club hums with activity and every man who en-

War Prompts Vast Expansion Of Benning's Athletic Program

Both Major And Minor Sports Affected

By SGT. CARL NEU
Bavarian Sports Editor

The 24th year of Fort Benning's existence saw one of the greatest athletic programs in history carried out. The tremendous expansion in the fort's personnel meant a corresponding expansion of the organized sports, particularly those sponsored by the Fort Benning Athletic Association, which for the past eight months has been under the supervision of Lt. Col. Charles C. Finnegan, post athletic officer.

Baseball, boxing, basketball, bowling, volleyball and football were the major sports during the year, but Benning athletes also distinguished themselves in other fields as well, such as golf, tennis, handball, weight-lifting, and basketball.

BASKETBALL

The court championship last winter was finally captured by a scrappy 29th Infantry quintet which won a post-season play-off from the Infantry School Service Command. The Blue Devils won the second half of a split schedule and continued in form to grab the consolation in the final game of a play-off series.

O'Hara, Herman, Keary, Stolarczyk, Vogel and several others were leading hoopers in the post-season. The Blue Devils, who were defeated in the final game of the championship, were the 29th Infantry's first basketball team.

The 29th Infantry's first basketball team was defeated in the final game of the championship, but the team's performance was praised for its spirit and effort.

Officer Candidate Class Shows Democracy At Best

Analysis Reveals All Groups of Nation In Typical Group Here

The men being chosen to be the leaders of our Army represent a complete cross section of our nation is demonstrated conclusively by statistical analysis of the First Student Training Regiment under the command of Colonel Thomas R. Gibson.

The survey shows democracy in action as the numbers of students in each category are in direct proportion to group percentages in the Army as a whole. It shows that under the influence of the Army, no race or creed, any social or economic group, nor any occupational or educational level, is shown to have a chance to become an officer.

The study showed that 83 percent of the students were between the ages of 21 and 29. Selective service law requires that the majority, thirty-three percent of the company interviewed have had less than one year's service and 10 percent have been in the Army less than two years.

An analysis of the educational background of these Officer Candidates reveals the myth that a man has to be a college graduate to qualify. Nineteen percent of the men did not finish high school and 70 percent did not go to college. The other 30 percent entered

college, but less than five percent were graduated. Most of them were forced to drop out of college for financial reasons or because the draft interrupted their educational careers.

FIGURES PROPORTIONATE

The percentage of each religious group closely approximates national census figures. Fifty-four percent are Protestant, 36 percent are Catholics, and ten percent are Jewish.

Other figures compiled by the regiment in this study show a similar correspondence with national figures. Thirty-five percent are former industrial workers, 23 percent had white collar jobs, and 15 percent were employed as salesmen before they were called to service.

Ten percent of the class are colored. Three percent were foreign born. Thirty-four percent are sons of foreign born parents. The complete cross section of the nation is shown here, and it is only the beginning of the problem. These men from diverse social backgrounds—farmers, workers, lawyers, teachers, students, farmers, millhands—in three months must be molded into leaders of men, equipped to handle the responsibility of the lives of the men under them. These men from diverse occupations must learn to be experts at one single occupation. They must become officers of Infantry and leaders of men.

relected by E. E. Farley, who has had 17 years of experience in well-famed work with colored troops at Fort Benning, being the only colored secretary in the employ of the Army and Navy YMCA unit.

From its inception, this club has served efficiently and satisfactorily the needs of colored troops at Fort Benning. Its program is so varied and comprehensive as to include the whole range of interest of the men served. From the fine arts, music and religion, and the red hot jazz and jitterbugging.

To take care of the tremendous volume of service carried on by this organization, a personnel of four professional workers, including a secretary, are required. The club operates 24 hours a day and is used to its capacity.

In the form of the Y, the club operates 24 hours a day and is used to its capacity. The club provides a wide range of services for the troops, including recreational activities, educational programs, and social events.

The club provides a wide range of services for the troops, including recreational activities, educational programs, and social events. It is a vital part of the Fort Benning community, providing a place where troops can relax and socialize.

Record Units Have Streamlined Their Sleuthing Pieces

In order to keep tab on new triangular divisions and fast-moving mechanized corps, army statistical methods have been amazingly streamlined,

according to Lt. B. E. Moore, officer in charge of the Machine Record Unit at Fort Benning.

"Previously it took three months time for simple personnel changes to reach Washington. Today the machine record units give this information to the Adjutant General on Capital Hill in just 72 hours," Lt. Moore said.

He went on to point out that it would be a physical impossibility to keep track of Private Joe Doakes with the old pen and pencil. For each enlisted man a total of seventeen pertinent facts, including full name, serial number, grade, arm or service, type of organization, company or battery, main civilian occupation, race, station, duty, type of change of status, date of change, and military occupational specialties are listed. In an officer's record there are 11 more facts given.

Now multiply these figures by the number of officers and men in the present day army and the distance to the most distant planet.

But the Germans have proved that it can be done. They are the only country besides the United States which have this system in use, and they have been using it for six years. A considerable proportion of their success may be due to this factor. It is one of the most valuable assets a general can have.

MOBILE UNITS

Here at Benning, Lt. Moore, assisted by Lt. E. S. Miles, Warrant Officer E. D. Lewis, and 41 enlisted men, is charged with keeping the records for Fort Benning and several other camps in this area. Their unit is a fixed one but mobile ones of a similar nature have been perfected for use in the different theater of operations. These mobile units usually keep books for an army corps, even so, streamlined methods enable them to close down at one location move to another and be ready for work in four hours.

As for the machines themselves, they are the peak of perfection in speed and accuracy. A machine record unit can compile a listing of military specialists, such as engineers, bakers, clerks, and mechanics for an entire service command in less than three hours. Over 1,000 officer data cards can be handled, pertinent information gathered and printed ready for use in as little as 40 minutes. This includes arranging these cards manually and by arm or service, listing serial number, station, organization and grade of the officer. As for accuracy, one slip of paper is punched, and the card, the percent of error is negligible, not even half of one percent.

In answering questions of supply and demand of manpower, the machine record unit serves as a means of keeping down the stories, which may later be the soldier's chief means of proving eligibility for pensions, hospitalization, and other benefits. It assures equal treatment to all.

But while we are at war the unit continues to serve principally as a general ledger of the army, telling him where his soldiers are, what they are doing, and how well it is being done.

Gators

Continued From Page 38

Roberts, once of Presbyterian College, was the first runner in the Breker line-up is Billy McGill, but he may not last for long. McGill was injured in the second game of the campaign and did not see action again. The Two-Nines is still in the matting as to whether or not he will be ready by Sunday.

The Gators may hold a slight advantage in the line because of their deeper reserve strength, but the 117th has the faster forward wall. Belin, Dyal and Bersani are standouts in the Gator front line of the Twenty-Ninth as to prevent its departure for France.

Among other engagements, the Philippines at that time and again in 1907. During the World War, it was assigned the mission of guarding the Panama Canal. It had apparently been destined for service abroad, but according to a writer of that period, "the nation-wide outbreak of influenza so decimated the ranks of the Twenty-Ninth as to prevent its departure for France."

29th Infantry Was First Demonstration Unit Here

Organized in 1901, Regiment Assigned To Benning in 1919

With ninety-two percent of the men presently subscribing to War Bonds, purchases, the Twenty-Ninth Infantry, first demonstration regiment at Fort Benning, is a unit of the United States Army.

Organized at Fort Sheridan, Ill., in 1901, the regiment saw service in the Philippines at that time and again in 1907. During the World War, it was assigned the mission of guarding the Panama Canal. It had apparently been destined for service abroad, but according to a writer of that period, "the nation-wide outbreak of influenza so decimated the ranks of the Twenty-Ninth as to prevent its departure for France."

Col. J. D. Hill Takes Command of 124th Infantry

The 124th Infantry Regiment, demonstration regiment for the Infantry School at Fort Benning, welcomed a new commanding officer this week.

He is Col. John D. Hill, former resident of Birmingham, Ala., and a veteran of World War I, where he saw considerable action as a battalion commander. Colonel Hill assumed command of the Florida regiment at Fort Benning following completion of the battalion commanders and staff officers class at the Infantry School. Colonel Hill will succeed Lt. Col. Henry W. McMillan, senior battalion commander of the regiment who returned to his post as commander of the first battalion.

Colonel McMillan took over regimental commander duties on the departure of Brig. Gen. Fred A. Safay, former commanding officer, who is now stationed with the 78th Division at Camp Butner, N. C.

Fort Benning's Military Police have man-sized jobs. Their jobs are not only to walk the streets and see that all is in order, but a principal job at Fort Benning is to keep the traffic moving. During one twenty-four hour period, 8,100 vehicles passed in and out of the reservation.

At Camp Missouri, Missouri, they swear it happened when First Sgt. James Colvin lined up the company of recruits the day he caught a cold in his head. The sergeant explained the shores had to be done and that if there weren't volunteers to step out of ranks for various jobs he would have to assign men. "Now about policing up the grounds," began Sgt. Colvin—and started to wreathe.

Post Guard Has Increased Six-fold in Last Two Years

Well-Armed Complement Is Safe-Guarding Reservation

Marking an anniversary this month is the system of post guards at Fort Benning. The post guards are needed to form the Main Post Guard compared to 16 at the same time in 1941.

Col. C. A. Will, permanent field officer of the day who recently took over the duties of Provost Marshal at the Post, is responsible for installation of the system.

When he took over a year ago, 12 men on a watchman basis guarded the various points of the reservation. He enlarged the guard to a complement of 150 men, of whom 100 are needed to form the guard. The remaining 50 are on duty at the various posts to safeguard military supplies and various other points.

Telephone System

Instantly, he installed a telephone system to allow guards to report every hour. The guards must know where they are at all times and they must know the location of fire boxes and fire telephones.

Carrying loaded shotguns or rifles, the guards are on duty 24 hours a day on posts and at night on others. The main guard is divided into two compartments, the regular guard and the second the colored guard detail also supplied by a permanent detail.

The white guard forms daily at 6 a. m. on the parade ground of the barracks, near DEMIL head-quarters where colorful uniforms are changed. The men of the guard are formed and then inspected by the guard commander, who also form and inspect the men. The two guards then march in formation and salute each other.

Divided Into Reliefs

The officer of the new guard presents his men to the Officer of the Day, who then takes

TIS Casual Battalion Operates Reception Center

Receives Incoming Officer Candidates For Processing

Prior to last December, the Infantry School at Fort Benning was busy training officers for the Infantry branch of services. But after that date the effort was stepped up to such a pace that the existing organization was unable to administer the thousands of officers and officer candidates ordered and here for training.

The new system had to be set up. And one of the most important changes was the activation of the Infantry School's Casual Battalion, here we call it the Casual Battalion.

In almost every way it is like the Infantry School's Casual Battalion, the first army home of new recruits.

The Battalion is part of the Infantry School's Reception Center, which has a great deal of processing of new students to handle. The center is located to the rear of the Infantry School, near the Harmon Church Road.

The Battalion is part of the Infantry School's Reception Center, which has a great deal of processing of new students to handle. The center is located to the rear of the Infantry School, near the Harmon Church Road.

The Battalion's Hq. is now in the Infantry School's Reception Center, which has a great deal of processing of new students to handle. The center is located to the rear of the Infantry School, near the Harmon Church Road.

CLOCK-LIKE PRECISION

The First Company, commanded by Capt. Charles H. Higgins, receives, registers, billets, feeds and finally forms the new class of recruits into the Infantry School's Reception Center, which has a great deal of processing of new students to handle. The center is located to the rear of the Infantry School, near the Harmon Church Road.

The Battalion's Hq. is now in the Infantry School's Reception Center, which has a great deal of processing of new students to handle. The center is located to the rear of the Infantry School, near the Harmon Church Road.

Around The Courtyard

BY CPL. DON VAN TASSELL
Special Service Office,
29th Infantry

Down Through The Years With The 29th: The year, 1925 saw most of our selectees in the parade of the 29th Infantry. It was something to see. War movies quite popular at that time, inspired us with awe. Today we are part of the vast organization, no longer inspired with awe at its vastness, but inspired with determination to do our part as members of the organization.

Back in 1925, the 29th Infantry was housed in tents and wooden barracks, when a long-delayed appropriation came from Congress providing for the construction of new modern barracks known as the "Curtain System."

AT THAT TIME, 29th Troops gave a military demonstration at the Chattahoochee Valley and other Expositions. An entire platoon of the 29th Infantry was all sorts of demonstrations, drills, guard mountings, etc., at the Columbus Fair during the summer of 1925. In addition, every year the 29th was represented in the exhibits.

IN THOSE DAYS, the Twenty-ninth Infantry laid claim to having the highest number of medals in the United States. His name was "Cyclone," a troop horse that was sent to the Two-horse, but condemned as a "troop horse" because of his vicious nature. He was saved from being outlawed by Sgt. Ernest Akers, who was a graduate of the Infantry School. With a few weeks training, Cyclone was tamed and proved to be a phenomenal high jumper, in the relief of many titles in horse shows throughout the South.

DURING THE YEAR, 1925, Col. Monroe C. Keith was Commandant of the 29th Infantry. Among some of his war heroes were Capt. Malcolm Rice, Lt. Stephen E. Elkins, and Sgt. Henry C. Clark. The distinguished Service Cross was awarded to the enlisted men of the Regiment produced a minstrel show.

Not never did the production proved to be a huge success under the guidance of Sgt. McGee of the 29th Infantry.

Col. Keith, who had won the try-outs for the Infantry Rifle Team at Camp Logan, Illinois, taking the Knickerbocker Cup. The Adjutant General of the State of Illinois, presented the cup to Cpl. Friend preceding the try-out. The 29th Infantry Troop known as the 29th Infantry Troop in 1925. As a part of the extensive recreation program, the 29th Infantry Troop was converted into a boxing ring in short order.

The 29th Infantry Troop was converted into a boxing ring in short order. The 29th Infantry Troop was converted into a boxing ring in short order. The 29th Infantry Troop was converted into a boxing ring in short order.

CLASS A DAY

The 29th Infantry Troop was converted into a boxing ring in short order. The 29th Infantry Troop was converted into a boxing ring in short order. The 29th Infantry Troop was converted into a boxing ring in short order.

The 29th Infantry Troop was converted into a boxing ring in short order. The 29th Infantry Troop was converted into a boxing ring in short order. The 29th Infantry Troop was converted into a boxing ring in short order.

ASK QUESTIONS

OF Travelers Aid

Today, with soldiers going to and from camps, with relatives and sweethearts journeying to visit them, and with workers flocking to factory centers, this flood of travel in its history.

There is one agency in Columbus set up to take care of the needs of these persons traveling into our city—the USO Travelers Aid. The idea behind Travelers Aid originated in the Gold Rush days of '49. Bryan Mulvaney, mayor of St. Louis, noticed that many of the pioneers going through the city were "broke" or sick or lost; he also saw that the stream of women following their husbands, or going out for protection, Mulvaney provided an endowment to care for these various travelers.

Later, the early YWCA established a Travelers Aid Service for new arrivals from Europe. Still later, some Quakers employed a worker to help strangers arriving in New York and direct them to their destinations. In 1908, the New York City Society was formed, which became the first organized service in this country. The present National Travelers Aid Association was organized in 1917.

Columbus, Ga., has had a Travelers Aid worker in the railroad station for several years. In 1938, the soldier population at Fort Benning began to increase, it was decided that a USO Travelers Aid office was needed and June 15, 1941, an office was opened in Columbus. Since that date, the number of requests for information and the number of cases handled have increased from 72 to 10,000 per month.

Staff of Parachute School

Front row, left to right: Capt. Richard J. Reitz, Asst. operation and training officer; Capt. Morris S. Anderson, intelligence officer; Major Ward S. Ryan, assistant executive officer; Brig. Gen. George M. J. Nylan, supply officer; Capt. Arthur B. Raber, adjutant; back row, left to right: 1st Lt. Walter R. Woelol, assistant adjutant; Capt. Benjamin H. Houston, area operation officer and aide de camp; 2nd Lt. Clarence K. West, assistant supply officer; 2nd Lt. Benjamin F. McLean, range officer; 1st Lt. John W. Leary, custodial officer; Capt. Benjamin H. Vandervort, acting operation and training officer. (U. S. Army Signal Corps Photo.)

Modern Fort Benning Is Near Site of Old Fort Mitchell

Visited by Francis Scott Key and General Lafayette

Where once oxen dragged the heavy guns to fortify a frontier in the early settlement of Georgia and Alabama, and today modern warplanes drone overhead within cannon shot even of the old muzzle loaders, stands the modern installation of Fort Benning.

There's nothing left now of the old fort where the guns commanded the approaches of the Chattahoochee except some earthen mounds and a gravelly road. The old rutted trail down which the cannoneers led their mounts to water at a tiny stream when the buglers blew the "to the fort" call, today sometimes find buttons that dropped from the soldier's uniforms in the old days.

It is the site of Old Fort Mitchell, built in 1811 by Georgia militia, and taken over by Federal troops who remained during the Indian troubles in this territory. From its base, troops went out on numerous battle expeditions against the rebellious Creeks and to frequently returned columns of battered troops who had to bury their dead and drag back their wounded after fierce fighting.

NAME HONORS GOVERNOR

The early fort was named for Governor David Brydell Mitchell. He was Alabama's first delegate to Congress in 1817, serving for four years. His tomb is in the little cemetery at the site of the fort.

The fort was built just a short way from the ancient site of Katocti, the Indians' first village, where a mound still stands. This village visited by Oglethorpe in 1733, was the focal point for the Indians for many miles.

John Crowell, the first Indian Agent, was established at the old site. He was Alabama's first delegate to Congress in 1817, serving for four years. His tomb is in the little cemetery at the site of the fort.

Although the fort was abandoned in 1839, the site was again used as a training place for Confederates during the Civil War. Between the States, and there Col. James Cantey drilled his famous Cantey Rifles. The Confederates were defeated in 1862, and the site was returned to the United States.

Today, with soldiers going to and from camps, with relatives and sweethearts journeying to visit them, and with workers flocking to factory centers, this flood of travel in its history.

There is one agency in Columbus set up to take care of the needs of these persons traveling into our city—the USO Travelers Aid. The idea behind Travelers Aid originated in the Gold Rush days of '49. Bryan Mulvaney, mayor of St. Louis, noticed that many of the pioneers going through the city were "broke" or sick or lost; he also saw that the stream of women following their husbands, or going out for protection, Mulvaney provided an endowment to care for these various travelers.

Later, the early YWCA established a Travelers Aid Service for new arrivals from Europe. Still later, some Quakers employed a worker to help strangers arriving in New York and direct them to their destinations. In 1908, the New York City Society was formed, which became the first organized service in this country. The present National Travelers Aid Association was organized in 1917.

Columbus, Ga., has had a Travelers Aid worker in the railroad station for several years. In 1938, the soldier population at Fort Benning began to increase, it was decided that a USO Travelers Aid office was needed and June 15, 1941, an office was opened in Columbus. Since that date, the number of requests for information and the number of cases handled have increased from 72 to 10,000 per month.

Woman's Club Activities Noteworthy In 19 Years

Scrapbook Reveals Expansion of Club

BY LAURA M. BAILEY

Pouring over a scrapbook invariably immerses one in the deepest nostalgia. No exception is the scrapbook of the Woman's Club of Fort Benning. Names of old friends, books one has enjoyed and favorite music make it almost a personal history of Army days past.

Scrapbooks might be accounts of almost anything, but this one more than recalls old memories. It seems so closely allied with the trend of the particular years. This is no great surprise when one acknowledges that the services of our country are always first to be affected by the historical and economic status of our nation. No woman lives in a vacuum. Her husband's life is her life too. Small wonder that this is reflected in the programs of the club's existence.

Like most women's organizations, the Woman's Club had its early beginnings. It seems strange that so many of the nation's more important women's activities started with a small group of twelve earnest women meeting in their homes. Strange too that out of their sincerity of purpose they should wish to increase their group to include all women of like sincerity of purpose.

Thus in 1923 when a small group of women organized the Woman's Club of Fort Benning, they elected Mrs. Alfred Bjornstad as its first president. It was to become a cultural and domestic factor in the life of Army women during their stay at Fort Benning.

The first two years of the club's organization, its early meetings were held with no social features. Emphasis was stressed on important speakers and musical programs. As the club grew, the social aspect was considered to foster friendship and increased participation in varied activities.

CLUBS ARE STARTED

During the year of 1925 departmental clubs came into being. An Arts and Crafts Group, a Book Club, a Garden Club, and a group of Mrs. Albert Easley. This group became popular with the club members with its diversified list of subjects to suit all artistic inclinations.

The art of homemaking was also recognized as an important part of the club's activities with the home economics group. Cooking, dressmaking and millinery reached a high point at that particular period under the leadership of Mrs. E. E. Easley.

Those of literary turn of mind were led in serious study of important contemporary literature. The combined objectives of the club were to contribute to the children's school and playground equipment.

From year to year the club called on talented members of the garrison to provide entertainment. Many times officers contributed their bit with interesting observations they had made on foreign service and highlights of the year.

On December 17, 1928, the then Colonel G. C. Marshall spoke to the club on the approaching Christmas season. No one at that time in honor of the French general.

Gen. Newgarden Keeps Tab On "Tiger" Division

Personal supervision of all activities of the 10th Armored "Tiger" Division, as far as time permitted, was the duty of General Paul W. Newgarden, commanding general.

Recognized as a "doer"—not a "talker"—General Newgarden does not believe in having his men do anything which he himself would not do. It, therefore, is not surprising that he is conducting a group of officers racing over an obstacle course and conducting a vigorous hour of calisthenics.

On his visit by Lieut. General William Knudsen, director of production, or the arrival of John Dokes and his recruit platoon, General Newgarden is a point to be present and extend personal greetings and prepare for the well-being of the new arrivals.

General's determination and ability to have his organization down to the last man ready for combat when the time comes, is no doubt, resulting in the very complete military experience, as well as to his comparative youth for such a responsible position.

Born on February 24, 1893, he attended a number of military colleges and served continuously in the armed forces of the United States. He was a graduate of the Infantry School in 1913 from the United States Military Academy. He was a graduate in 1922 of the Field Officers Course at the Infantry School.

In 1926 he was a distinguished graduate of the Command and General Staff School at Fort Leavenworth, Kansas. He was graduated from the Army War College.

In addition to his attendance at these schools, the General must have also spent some time in the handling of the saber and pistol, for he was National Junior Sabre Champion in 1919, and a member of the Infantry Field Artillery in 1922 and 1923. The 1923 pistol team on which he fired high score set a new record in the history of the national championship.

Only recently, General Newgarden, with Lieutenant E. J. Stahr, Jr., won the tennis doubles championship of Fort Benning. The handling of armored units is not a novelty to General Newgarden, for, previously to being assigned to command of the 10th Armored Division, he was Brigadier General in charge of Combat Command "A" of the 2nd Armored Division.

Lawson Proving Ground For Air Commando Units

Personnel Made Up Of Specially Trained Men For Transport

"Air power today has decided the fate of nations. Germany with her powerful air armada has vanquished one people after another. On the ground, large armies have been mobilized to resist her but each time it was that additional power in the air that decided the fate of each individual nation."

by Maj. Gen. Henry H. Arnold and Col. Ira C. Eaker the authors tell of the origin of the Paratrooper Troops and the subsequent formation of Air Transport units. Gen. William Mitchell returned from the first World War with the concept of "Paratroops." It was demonstrated at Kelly Field before the procedure became commonplace in Russia and Germany that troops could be dropped by parachute and were landed by paratroopers and their automatic weapons and could have them set up in operation in a brief span of time.

To transport this air infantry, Troop Carrier Groups and Squadrons were formed. These groups have become known as Air Commandos. It is not unlikely that considerable numbers of men will have to be transported over great distances and their equipment carried on wings. That is the mission of the Air Commandos.

At Fort Benning, is a proving ground for the Air Commandos. At present a Troop Carrier Group under the command of Lt. Col. S. V. Payne is working out tactical air problems. A "jump training" program is scheduled and jumps are made daily.

The personnel of the Air Commandos are specially and technically trained to fully qualify for transport flying organizations. They have pride in their outfit, and none other than Col. Landis, Chief of Staff of the Troop Carrier Group, has been featured by top name radio bands.

On the days to come out will be the Troop Carriers "Keep 'Em Flying," but in addition will play a big part in keeping the men in the field.

Early Medical Cases Treated In Columbus

Present Structure Was Completed In May, 1925

Fort Benning was established as a camp on October 7, 1918. It was made a permanent military post by General Orders, January 9, 1922. At the time of the establishment of Fort Benning, no hospital was available and men needing medical care were treated in Columbus City Hospital. A temporary hospital, composed of wards, buildings and barracks, was set up in late 1920, and was known as the Station Hospital in Columbus. A small wooden building, located on the lot in front of where the Post Theatre now stands, was the beginning of the transfer of patients.

There were no facilities for bed patients at first and all such patients were treated in the Columbus City Hospital. A temporary hospital, composed of wards, buildings and barracks, was set up in late 1920, and was known as the Station Hospital in Columbus. A small wooden building, located on the lot in front of where the Post Theatre now stands, was the beginning of the transfer of patients.

These constructions proved to be fairly adequate for the hospital of the garrison, but when the strength was greatly increased in 1938, it was necessary to utilize the Station Hospital in Columbus. In November, 1940, construction started on a cantonment type hospital of 1,415 beds on a standard 2,000-bed lay-out plan. The cantonment hospital was finished in May, 1941. Since that time, many additional wards have been constructed and opened. All new wards are immediately occupied by patients.

Since the activation of the hospital in 1918, it has grown in size and also has developed a high state of efficiency and an excellent reputation due to the efforts of the following officers who have commanded it: Lt. Colonel C. Koerber, M. C.; Lt. Colonel W. VanDusen, M. C.; Lt. Colonel H. Halloran, M. C.; Lt. Colonel F. B. Baker, M. C.; Major D. P. Carr, M. C.; Colonel C. J. Manley, M. C.; Colonel L. J. Smith, M. C.; Brigadier-General Dean U. S. A.; Colonel E. A. Noyes, M. C.

The operation of a large Station Hospital, like the one here, is very complex. It is the headquarters of any large city hospital. Long hours are spent by the hospital personnel and officials, surgeons, doctors and nurses working to guard the health of the soldiers, with the highest state of efficiency. They are prepared to meet and handle any kind of an emergency that may arise. Men of the Medical Department are trained in the performance of various duties, requiring of them and the entire personnel and staff are on duty at all times to guard to the limit of their ability the health of the men in their charge.

Whether in peace time or in war, the Army Medical Department is constantly striving through research study to keep abreast of the latest and soundest methods in medicine, and to "Keep 'em Fit for Fighting."

Congratulations

ingful as stop, look, and listen. Live the spirit by
not buying until you know you are not paying
more than the ceiling price. Your merchant is
glad to tell you. Your interest will help keep
the pact alive.

COLUMBUS COCA COLA BOTTLING CO.

In the interest of educating the public on America's War Effort

1st Regiment Ricochets

Candidate John A. Roukema, born in Holland and from the south of things, a cousin to Hans Brinker... 1939 National 2 mile skate champ... 1940 Middle Atlantic outdoor champ at 220, 440, 880, 1 and 2 mile events... 1941 captured individual honors at Eastern Intercollegiate Championships copping the 220, 440, 880, 1 and 2 mile races... schooled at Colby College, Waterville, Maine... captained the famous Norwegian and American Skating Club and ditto for the Gay Blades Skating team... has enough cups and medals to fill a quota for a city-wide scrap drive... which, by the way, is not a bad idea... will probably wind up as a platoon leader in Libya...

Candidate Paul E. Roche... alias Frank Merriwell... Yale LaCrosse All-American, '38... Captain Yale 150 pound football team that copped the Eastern Conference Championship in '38... Phi Beta Kappa, Berzelius Senior Honor Society... College Athletic Secretary and Marshal of Yale's senior class vintage 1939... wound up as might be expected winning his letter with R. H. Macy & Co. as buyer '41, '42... married and has baby son, Guy... Yale, Phi Beta Kappa, All American LaCrosse... 1938, 1939, 1960... baby Guy will probably be Gimbel Bros. buyer... 1961...

Candidate James N. Coletta... well known magician... card and coin tricks... escapes... picking pockets (non-professional)... once showed his pickpocket stuff to an audience that included Andaman, world famous magician... walked back to the stage with his own wallet missing... a good guy not to have in a barracks black-jack game... proud poppa of a week old son... nothing to do with magic... at present working on a new act to be known as... 'The Disappearing Gig-Sheet'... Tactical Officers please note...

Candidate George Grant... born in Russia of American father and Russian mother... educated in French boarding school in Moscow... came to the U. S. in '26 before reaching his majority to retain citizenship... worked in Washington, D. C.,... went to Hollywood in 1930 and played in Paramount picture, 'Bedtime story' with Baby Leroy... picture laid an egg... went back to Russia to live it down... returned to U. S. in '37 and joined the Army three days after Pearl Harbor... 2 cousins who are officers in Russian Army... one in Air Corps and one in Cavalry...

First STR Is Daddy Of TIS Regiments

Unit Is Symbol of Growth Of Officer Training Program

The First Student Training Regiment at Fort Benning, commanded by Col. T. R. Gibson, holds the distinction of being the "Daddy" of all officer training units on the post. It was the nucleus of the vast training program which has sent out thousands of officers from the Infantry School since the attack on Pearl Harbor.

In speaking of the record of the 1st S. T. R., Colonel Tupper, commander of the Student Training Brigade, has said:

"As the former commander of the 1st S. T. R., I can't help but take a measure of pride in its work. In a large sense the 1st S. T. R. symbolizes the whole program and expansion of the Infantry School."

"The magnificent accomplishments of the training program of the Infantry School; Officer Candidate Classes, Motor Maintenance, Radio Communications, Advanced and Divisional Officer Classes, all identify their beginnings and growth with the 1st S. T. R. Many of the leaders of the regiments of the Student Training Brigade were former officers of the 1st S. T. R. I congratulate the present Officers of the 1st S. T. R. on their successful continuance of the traditions and standards that have become associated with this, the 'Mother Regiment' of the Infantry School."

The 1st S. T. R. had its beginnings in January of 1941, when the Student Training Units were formed out of the Infantry School Detachments.

The Student Training Units

Col. Gibson Termed Inspiration to Men

First STR C. O. Was Off Decorated for Gallantry

To the thousands of Officer Candidates trained and commissioned at the 1st Student Training Regiment, the record of their Regimental Commander, Col. Thomas Gibson, may well serve as an example and an inspiration.

Col. Gibson began his career as an Army officer as a graduate of the OC class at Ft. Sheridan, Ill., August 15, 1917. He received sealed orders upon graduation, and twenty days later was on French soil. He attended a British Machine Gun School for one month, and was assigned to duty with the 1st Division.

With the 1st Division, Col. Gibson shared and participated in the creation of one of the truly glorious records of World War I. It was as an infantryman that Col. Gibson shared the honor of being in the first American Regiment to cross the Rhine.

It was the 1st Regiment that received the honor of conducting the traditional ceremony of Dipping the Colors into the Rhine, symbolizing the victory over Germany and effectually beginning the occupation. During the occupation, Col. Gibson served with the 18th Infantry.

Col. Gibson has been awarded the Distinguished Service Cross for extraordinary heroism during the battle of Soissons, where he was wounded in action; the Silver Star with Oak Leaf Cluster, representing citations for several engagements, and the Purple Heart, in recognition for wounds received in battle.

He has received the Victory Medal with five battle clasps, indicating participation in five major battles of the last war.

There is much to be said in length about the present work of Col. Gibson, but somehow, that though sums it up.

NOBEL WINNER TWICE Madame Marie Curie was the first person to receive the Nobel Prize, a second degree. She received it in 1903, with her husband, for physics, and again in 1911 for chemistry.

Col. Gibson came to the 1st S. the present officer and enlisted men's Parachute courses had their beginnings within the 1st.

The training of motor maintenance and enlisted radio operator men has from the beginning been the work of the 1st S. T. R. COL. GIBSON COMMENTS

In speaking of the work and history of the Regiment, its present commander, Col. T. R. Gibson, has said:

"The 1st Student Training Regiment is proud of the role it has played in the program of the Infantry School. Proud and at the same time conscious that its responsibilities are great ones. We have a unique role to play. There is nothing of greater importance in the present situation than the training and schooling of the Officers and Technicians of the expanding Army that will bring tomorrow's victory."

"The Officers of the 1st S. T. R. are grateful for the opportunity to serve in this direction. It is a matter of great pride to us that we are directly contributing to the development of the leadership of our Army."

"The present staff of the 1st S. T. R. shall continue to make every effort in the future to guarantee that the Officers and men who go through our organization are equipped and ready to meet the responsibilities that befall them."

Army Grease Packs Heavy Kick

Large quantities of grease which the Army is collecting daily at Fort Benning as well as all other posts, camps and stations under the supervision of the salvage division of the Quartermaster Corps, is being turned into valuable explosives, according to Col. Stephen S. Massey, Fort Benning quartermaster.

The grease is sold by the Q. M. C. to soap manufacturers who extract all glycerin content and sell it to firms making high explosives. On the average, cooked grease yields about 10 per cent glycerin and 87 per cent soap stock.

Colonel Massey stated that the glycerin now being extracted from rendered bones, meat scraps and waste greases in the nation's army camps, is sufficient to manufacture about 1,500,000 pounds of dynamite monthly, or 18,000,000 pounds a year. It may also be used for English cordite, or smokeless powder for the Russians and Chinese.

Besides the soap stock salvage which amounts to over 60 million pounds annually, the raw bones collected in Army kitchens yields about 18 per cent glue. Once the glue is extracted from the bone scrap, the residue can further be used for poultry feed or fertilizer.

After all surplus greases and spent fats are removed, all edible garbage remaining is sold to farmers for feeding hogs; and the Q. M. C. estimates that at present

two pounds of pork is being produced each month from the food scraps of each soldier.

SIX TO SCHOOL Six enlisted men of the 10th Armored's "Tiger" Division left recently to pursue a course in gunnery at Fort Knox, Kentucky. Allen, Jr., of the 55th Engineer Battalion.

R. Milco of the 90th Armored Reconnaissance Battalion, Sergeant Earl H. Apper of the 11th Armored Regiment, Corporal David F. Wilson of the 11th Regiment, T-5 Zennon L. Nowakowski of Supply Battalion, T-1 Arthur V. Crego of the Maintenance Battalion and T-4 Grant W. Gunnery at Fort Knox, Kentucky.

COL. T. R. GIBSON

There is a strange thread that history weaves, linking the past with the present. It would be fitting, indeed, that some officers, graduates of the 1st Student Training Regiment, under Col. Gibson, shall also have the honor of standing on the shores of conquered Nazi Germany and participate in the Victorious Color Dipping.

There is much to be said in length about the present work of Col. Gibson, but somehow, that though sums it up.

Army Grease Packs Heavy Kick

Large quantities of grease which the Army is collecting daily at Fort Benning as well as all other posts, camps and stations under the supervision of the salvage division of the Quartermaster Corps, is being turned into valuable explosives, according to Col. Stephen S. Massey, Fort Benning quartermaster.

The grease is sold by the Q. M. C. to soap manufacturers who extract all glycerin content and sell it to firms making high explosives. On the average, cooked grease yields about 10 per cent glycerin and 87 per cent soap stock.

Colonel Massey stated that the glycerin now being extracted from rendered bones, meat scraps and waste greases in the nation's army camps, is sufficient to manufacture about 1,500,000 pounds of dynamite monthly, or 18,000,000 pounds a year. It may also be used for English cordite, or smokeless powder for the Russians and Chinese.

Besides the soap stock salvage which amounts to over 60 million pounds annually, the raw bones collected in Army kitchens yields about 18 per cent glue. Once the glue is extracted from the bone scrap, the residue can further be used for poultry feed or fertilizer.

After all surplus greases and spent fats are removed, all edible garbage remaining is sold to farmers for feeding hogs; and the Q. M. C. estimates that at present

two pounds of pork is being produced each month from the food scraps of each soldier.

SIX TO SCHOOL Six enlisted men of the 10th Armored's "Tiger" Division left recently to pursue a course in gunnery at Fort Knox, Kentucky. Allen, Jr., of the 55th Engineer Battalion.

R. Milco of the 90th Armored Reconnaissance Battalion, Sergeant Earl H. Apper of the 11th Armored Regiment, Corporal David F. Wilson of the 11th Regiment, T-5 Zennon L. Nowakowski of Supply Battalion, T-1 Arthur V. Crego of the Maintenance Battalion and T-4 Grant W. Gunnery at Fort Knox, Kentucky.

COL. T. R. GIBSON

There is a strange thread that history weaves, linking the past with the present. It would be fitting, indeed, that some officers, graduates of the 1st Student Training Regiment, under Col. Gibson, shall also have the honor of standing on the shores of conquered Nazi Germany and participate in the Victorious Color Dipping.

There is much to be said in length about the present work of Col. Gibson, but somehow, that though sums it up.

'Happy' Hunting Grounds In Army Record Section

Letter to Oshkosh Or Albuquerque All In Day's Work

The Infantry School's Record Section is sometimes referred to as the "Happy" Hunting Grounds.

"Where oh, where—is that letter to Oshkosh? It went out a month ago, and I haven't got those shears it requested yet."

"Where did you hide that request for my 10-day leave?"

"How can I qualify for the Flying Tiger?"

Such are the questions that Lt. Troy V. Moore, Records Section chief, and Master Sergeant Brian P. Riley, chief clerk, and their staff have daily almost without letup. They frequently pass the request to chief of the general file, Staff Sgt. George Stalker, or 201 chief clerk, Sgt. Abe Belsky.

It seems to be one continual large-scale hunting foray, as the section's staff tries to find the answers to the greatly varied questions. Usually, that "letter to Oshkosh" still reposes in the desk of the writer. Or they find it wasn't Oshkosh, it was Albuquerque, or it wasn't a month ago, it was six months ago or it wasn't a request for shears, but an order for a clip board.

But no matter. It's the job of the records section clerks to track down the desired correspondence, even if it doesn't exist. As a result, it's a common scene to have a flock of heads bent over folders, books of Army Regulations, file

cabinets and sheaths of papers trying to find that little slip of yellow paper for the Colonel.

Every office has its "Hold File No. 2" where it can be found usually in the lower right hand drawer of the desk. The "Hold File No. 2" is the bugaboo of the Records Section. One of the first tricks the Records Section Detectives learn, is to hunt for every office's "dead letter office."

ALL THAT DRAWER
Then when a piece of correspondence from that office fails to come to light after an exhaustive search of the records section files, a sly advance is made on said lower right hand drawer. And more often than not, there reposes the lost paper.

Lieutenant Moore and Sergeant Riley have had long experience in records section. They can remember when it only took three clerks and a few files to keep things straight. But today, the section is threatening to push the rest of the Adjutant General's section right out of the school building. They have row upon row of files, containing records of every man in the school. They keep records of officers and enlisted men, primarily for social and sports and Boy Scout activities.

Every bit of correspondence is recorded and filed. Every directive, every Army Regulation is ready and easily accessible—that is easily accessible if trained men such as Lieutenant Moore and Sergeant Riley are on hand to know how to dig it out. It's an art that comes only from years of training, an art that permits you to "sense" where the misplaced paper has been put.

If Lieutenant Moore or Sergeant Riley can't find it for you, you'd better look in your No. 2 hold file.

Army Children Prepare For Citizenship

Entire Program For Youngsters On Military Lines

Doing their share in the war efforts are the sons of officers and enlisted men at Ft. Benning these days.

Organized under the leadership of Major Virgil Ney of the Infantry School Publications Section, primarily for social and sports and Boy Scout activities, the youngsters have turned their organization into an all-out effort to put "boy-power behind the war effort."

Whenever or wherever the boys can be of use in any activity or campaign during the past year, they have offered their services—and the wartime activities of the group came to an all time high, when the youngsters conducted a scrap iron and rubber drive of their own.

They combed the residential areas, of the Post and brought in a total of more than 10 tons of scrap, which probably otherwise would have never been used. Brig. Gen. Walter Scott Fulton, commanding general, officially commended the boys for their efforts, and the boys received a group photo of the scrap drives, each boy who took part received a ribbon.

In addition, a group photo of the boys activities group at Ft. Benning was used as a cover on "Scouting," the National Scout Leaders Magazine and honorable mention was given to Troop 11 and Pack 1 in "Boys' Life," the nationally circulated boys magazine.

Recreational facilities for the children on an Army post naturally present about the same problems as those in a large city, and Major Ney has organized boys' activities to take advantage of the opportunities offered at a large Army post.

Three football teams have been organized—the Jeeps, Peeps and the Trailers, and they practice daily at 5 p. m. Their games are staged between the halves at the big games in Doughboy Stadium and draw as many cheers as the adult teams. The Trailers are the true "small fry" in the league, and some of them will be big time college stars in the future.

A new group at the Fort is the Benning Rangers, organized for boys from seven to nine years of age, who are not eligible for membership in the Boy Scout Cub Pack. This group is organized along the line of Rogers Rangers, and the First Battalion now is completely organized. Emphasis is placed on obedience and discipline.

MINIATURE SOLDIERS
The Rangers will have their own program, both recreational and physical training. A miniature obstacle course will be built for their use and each company will have its own captain and learn to act as scout to the colors. Eventually a big formal parade of the Ranger Battalion is planned under its own officers.

Peter Sherman, son of Lt. Col. Frank Sherman, is assistant commandant of the Rangers, acting under Major Ney's direction. Meetings are held each Friday at 5:15 p. m. at the Scout Cabin. Activities of Boy Scout Troop No. 11 and Cub Pack No. 1 have been making a vital contribution to the lives of the youngsters at Ft. Benning. In the Cubes, three meals have now been placed in competition for personal inspection awards. In this activity, too, several Den Mothers have been contributing their time. Mrs. M. C. Higgins has consistently devoted much of her spare time to this group.

A new course has been started during the past season in "Leadership" for the Scouts and Cubs.

Sure, We'll Find It—Someplace

That the pen is mightier than the sword is illustrated above as the powers-that-be in a typical Army Record Section look for your records. And, if the Record Section can't find your missing papers in their own files, chances are they'll find them in your own desk through the sly manner of sleuthing they have developed—as shown above.

"HOLD FILE—No. 2" By Courtesy of the Record Section

This group meets each Saturday afternoon at the Scout Cabin, where the youngsters are taught the principles of leadership and group direction.

PLAN BASKETBALL
Another new activity is a wrestling class for boys meeting each Tuesday night in the Main Post Gymnasium, where Lt. D. F. Furell of the Infantry School Publications Section teaches the art of self defense and a mild form of "Judo" adapted to boys.

As soon as the football season closes, basketball will begin, and all boys in the post are invited to participate in the sport. All boys also are invited to take part in the other boys' activities. Major Ney emphasized, The boys are asked to get in touch with Major Ney and indicate in which activity they are interested. Regardless of size or age, the individual boy will have an opportunity to play his game under proper coaching and leadership.

SOME KEGLER!

The boys stationed on the Hawaiian Islands have named Pvt. Bob Morris as the top service bowler in that neck of the woods. Bob has been bowling 'em over, over there, and is now looking around for a little stiffer competition. The mapwood destroyer is only 23, but has been yelling,

Lawson Bomb Sight

PFC. F. J. HOPKINS

This week's issue of Tail Skid introduced 1st Lieutenant Allison S. Perry, Jr., Assistant Base Operations Officer. As Assistant Base Operations Officer, Lieut. Perry assists the Base Commander Major John E. Albert, and sees that the field's equipment and personnel function to serve and assure safe flying operations for the squadrons assigned to Lawson Field.

Lieutenant Perry is a native of Lake Wales, Florida, attended the Lake Wales High School. Before entering the Army Air Force Flying School, he studied aeronautical engineering at Curtiss-Wright Tech, Los Angeles, California, and at Alabama Polytechnic Institute, Auburn, Alabama. A graduate of the Army Air Force Flying School, he took his Primary Training at Pine Bluff, his Basic Training at Randolph Field, Texas, and his Advanced Training at Brooks Field, Texas, where he was commissioned a Second Lieutenant on March 6, 1942. Before coming to Lawson, he was attached as a pilot in a School Squadron.

The Lawson Field Officers' Candidate Board has announced that five of the fields enlisted men will attend OCS. Three men who have already left to attend the Air Force Administrative OCS at Miami Beach, Florida, are Sgt. Edward A. Zraick, Cpl. Francis T. Killeavy and Cpl. Lawrence E. McDonnell. Cpl. John McQuaid and Pfc. Peter J. Hopkins will attend Medical

Administration OCS at Camp Barkeley, Texas.

Lawson Field's basketball league got underway with a good start. Two leagues, the American and National consisting of barracks and various squadrons on the field so far has proven that a good season is in store for everyone.

Athletics is under the supervision of Captain D. C. Moffet, Special Service Officer who was former head of the Department of Physical Education and Director of Intercollegiate Athletics at DePaul University.

M-Sgt. Al Chaffin of Headquarters really had luck this time in his fishing. He caught a 22-inch Black Mouth Bass but will not disclose his fishing grounds. Says the Sarge, "It's a military secret."

Mortgage Burning, Anniversary Service and Installing of Associate Pastor All to be Held Sunday at the

JIMMY MAYO, Pastor

"LET'S KEEP IT BOMB-PROOF"

Not for Power, not for Glory, not for Plunder—but for Preservation of the American Way of Life — for Freedom — for ourselves and all the peoples of the earth. That is what we are fighting for — That is the battle-cry of all the countries fighting under the United Nations banner, and because the cause is so just—Because freedom-loving people will never submit to the tyrant's yoke of slavery. Because Truthfulness, Honesty and Faith must prevail we are assured final victory will be ours.
